GOLD MEDAL (Face), Awarded September, 1873.

GOLD MEDAL (Reverse)

Advance Sheet and Price List,

CONTAINING LIST OF

FLOWER AND VEGETABLE SEEDS,

SOLD BY

BRIGGS & BRO.

Rochester, N. Y., and Chicago, Ill.,

ISSUED IN ADVANCE OF THE REGULAR JANUARY NUMBER OF THEIR ILLUSTRATED "FLORAL WORK" FOR 1875, CONTAINING FOUR HUNDRED ENGRAVINGS, MAGNIFICENT CHROMATIC COVER AND COLORED PLATES, WITH FULL INSTRUCTIONS FOR THE CARE AND CULTURE OF FLOWERS, SUMMER-FLOWERING BULBS, VEGETABLES, PLANTS, &c., SENT PREPAID TO ANY ADDRESS FOR TWENTY-FIVE CENTS. IT IS A COMPLETE GUIDE TO THE AMATEUR OR PROFESSIONAL GARDENER, AND SHOULD BE IN EVERY HOUSEHOLD.

HIS PRICE LIST contains a list of Seeds sold and prices, and will enable those who choose, to order such Seeds as they may desire before receiving the January Number. Please show this to your neighbor or friend; it may fall into the hands of many of our regular subscribers who will receive the January Number, and who have tested our Seeds to their full satisfaction, consequently it will be a favor to us if the present publication should find its way into the hands of those who have never had an opportunity to compare our prices with those of other seedsmen, as well as to test the quality of our goods. Customers ordering from this List will please so designate their orders. This will entitle them to our superb January Illustrated FLORAL WORK for 1876, free.

This is not to be confounded with our gorgeous **Illustrated and Descriptive Floral Quarterly** for January, although it is a complete list of our Flower and Vegetable Seeds, Bulbs, &c., &c. And we can say that all orders from this Price List will receive the same attention and procure the same articles as if ordered from the ILLUSTRATED WORK, which is different only in displaying floral illustrations, colored plates, and in more elaborate descriptions of the classes of Seeds.

Full and explicit directions for planting, &c., are printed on all our packets of Seeds.

GOLD MEDAL (Face), Awarded September, 1874.

GOLD MEDAL (Reverse).

Chromo No. 5 (1874), "The Reflection."

Chromo No. 6 (1875), "The New Collective."

Size, 12x24 inches each. Sent postpaid by mail for \$1.00 each, plain or varnished; or, \$1.50, varnished and mounted on canvas. They are also sent as Premiums on the purchase of Seeds. (See "How to Obtain Chromos" elsewhere).

GOLD MEDAL (Face).

GOLD MEDAL (Reverse).

CLUB INDUCEMENTS AND COLLECTIONS.

CLUB INDUCEMENTS.

There are many in a neighborhood who will not, perhaps, take the trouble to get a Catalogue (or Price List) from us, but who would, if it were exhibited to them, purchase seeds to some extent; and, therefore, to induce those who may receive the Catalogue (or Price List) to call upon their neighbors, obtain their orders, and thus assist us in enlarging our sales, we make the following *liberal offer*:

Parties remitting \$1.00 may select Seeds, in packets, at Catalogue prices, amounting to \$1.15	
“ “ 2.00	“ “ “ “ “ “ 2.35
“ “ 3.00	“ “ “ “ “ “ 3.65
“ “ 4.00	“ “ “ “ “ “ 4.95
“ “ 5.00	“ “ “ “ “ “ 6.25
“ “ 10.00	“ “ “ “ “ “ 13.00
“ “ 15.00	“ “ “ “ “ “ 20.00
“ “ 20.00	“ “ “ “ “ “ 27.00

On receipt of the amount of the order, the seeds will be forwarded by *mail* to any address in the United States or Ontario, and *postage prepaid*. The above offer is meant to be for Flower and Vegetable Seeds in *packets only*, and does not apply to seeds by the *ounce, quart or pint*. The same terms as the above, will be allowed to any *one party* ordering.

Any person ordering at these rates, and inclosing to us the amount of \$5.00, will be entitled to either one of our Chromos, except the Collective Chromo for 1872, which is out of print.

COLLECTIONS OF FLOWER SEEDS—FREE OF POSTAGE.

To those who may not have sufficient time or experience to satisfactorily make from the Catalogue, selections of Flower Seeds for themselves, and who wish only a few varieties, and those of the *most desirable* and *showy* kinds; or who may want the *leading* kinds of a *popular class*, we recommend the following, and will say, that the Collections consist of such varieties as would head the order of a practical florist, were he to select an assortment for himself. Collections Nos. 11, 12, 13, 14, 15, 16 and 17, each embrace a large variety of *showy sorts*, and whoever may order either of them or of the other Collections will, we *guarantee*, be *highly pleased*. Collection No. 12 contains the same assortment as No. 11, with several choice varieties added. The same is true of Nos. 14 and 15, as relates to Collection 13, and 17 as relates to Collection 16.

In making the following Collections we have *discounted liberally* from Catalogue retail prices, and, therefore, it will be understood, that the prices of the *Collections are net*. The Collections are put up in neat envelopes, and we will mail to any address one or more of them on receipt of the amount set opposite the Collection or Collections ordered, *prepay postage*, and *guarantee safe arrival*.

COLLECTIONS OF VEGETABLE SEEDS.

Knowing what varieties and quantities of seeds would be generally desirable for *Family* Vegetable Gardens, we have carefully made up *three* Collections, embracing early and late Peas, Beans and Corn and a good assortment of seeds of other Vegetables. Those who may purchase the Collections, we are sure will be pleased with the assortments. Every variety of seeds in the Collections is *first-class*.

We allow the *discounts* and *premiums* in the making up of the assortments, and therefore, the prices below are subject to *no deduction*. We would be pleased to have those who prefer it, make up their orders from the Catalogue.

No. 1,	Collection of	Choice Vegetables, for a Small Family Garden,	\$3.00
“ 2,	“ “	“ “ “ “ “ “ Medium “ “	5.00
“ 3,	“ “	“ “ “ “ “ “ Large “ “	8 00

PLEASE READ—MIXED FLOWER SEEDS.

⚠ The growers of Flower Seeds always take more care in growing separate colors or varieties of a class of flowers than they do in growing the mixed of the class. The mixed, growers sell at a much less price than they do the separate colors. The mixed appears to be the outlet for the odds and ends, and are sold comparatively cheap; but the separate colors, for which growers get the highest prices, are saved from the best plants and most perfect flowers. There is a strong competition among Florists in the growth of separate colors. When the height, habit and time of flowering of a class of flowers will permit, we mix the separate colors, to accommodate those who do not wish to invest so largely in one style of flower as to purchase all the separate colors. Our mixtures are made up of the imported, first-class separate colors, and mixed here by ourselves. Those, therefore, who purchase our mixed seeds, will be sure to get seeds of the same quality as the separate colors, and not a common, cheap article. For instance: our mixed Truffaut Aster is composed of the various separate colors which we offer under No. 53, and the mixture is made by ourselves. This plan of mixing is carried out in the mixtures of the other classes of Asters and with Pansies, Phloxes, Stocks, Verbenas, &c., &c. To the facts above alluded to may be attributed the wonderful success of our seeds, and especially Asters, which have outstripped all our competitors, as the Premiums received upon them wherever exhibited indicate. One good plant will give greater satisfaction than a whole bed of trash.

ADVICE TO OUR PATRONS.

OUR STOCK.

It need not be deemed egotistical in us to say, as the facts really warrant, that we carry the heaviest stock of goods in our line of any house in the world. The love of flowers, dictated by refined and cultivated taste, has greatly augmented; while the splendid inducements our climate and soil, even in its most unpropitious parts, offer to its cultivator, have combined to increase the demand for the choicest varieties of Flower and Vegetable Seeds. To meet that demand, our importations from foreign countries have been fuller and more extensive than ever before, while our facilities for the growth and cultivation of new and desirable varieties of Vegetables and Flowers, were never so complete.

ORDER BY NUMBER.—It will be noticed that the Flower Seeds are numbered at the left of the columns of the Price List. It will be much easier for those who order, simply to give the numbers of the varieties they require, instead of writing out the names of the flowers; and it would be more convenient for us in filling orders. For instance: For any one desiring the New Large-flowering Dwarf Imbriqué Pompon Aster, or Parsons' New White Mignonette, it is only necessary to place in the column designated "No. in Price List," the numbers 61 and 321. It will be necessary to give the names of the Vegetables. In all cases, please mark plainly the quantities required of each. Order sheets will be furnished with Price Lists, and if more are required, please write us.

HOW TO ORDER A CATALOGUE, SEEDS OR CHROMO.—Taking for granted that many thousand people will take the opportunity of possessing themselves of our New Catalogue, we would suggest the most natural way to order Seeds or obtain one of our new Chromos. In the first place, our address is simply BRIGGS & BROTHER, Rochester, New York, or Chicago, Ill. In the Catalogue will be found a Blank Order, which can be easily torn off and mailed to us after the order is written upon it. In looking over the Catalogue, give the numbers of the varieties of Flower Seeds ordered, which are to be found at the left hand side of the list, and write the names of the Vegetables in full.

HOW TO SEND MONEY.—If the following precautions are taken in the transmission of money, we will take the risk of the safe arrival of the funds, namely: by Post Office Money Orders, Drafts on New York, by Express, or small amounts in Registered Letters. The cost of the Post Office Order, Drafts, or Registered Letters &c., may be deducted from the remittance, on orders amounting to Two Dollars and upwards. Sums less than Two Dollars may be sent at our risk without registering.

SEND MONEY WITH THE ORDER.—Please send the pay at the time of ordering, *as we do not keep any book accounts in the Mail Department of our business.*

TO PREVENT MISTAKES.—Those who favor us with orders will bear in mind that it is of the utmost importance to give their NAME, POST OFFICE, COUNTY and STATE, in plain, legible writing.

PACKAGES SENT FREE AND GUARANTEED.—We will send small packages by Mail, and the larger by Express, *prepay charges*, and guarantee their safe delivery. If, after a reasonable time, the package should fail to reach the owner, we will, immediately after being notified of the fact, and receiving a duplicate copy of the order, with date, &c., refill the same and forward without additional cost to the party ordering. Parties ordering by Express, will please state if it is convenient to receive packages by Express, and give their nearest Express office.

WE SEND BY MAIL, PREPAID.—Bulbs, Flowers, Roots, Cuttings or Seeds, not to exceed four pounds, for which we pay two cents for every two ounces, thereby enabling parties to secure their order by mail, and free of transportation expenses. Of course, if the order is for more than four pounds, the number of packages is increased.

SHOW THIS TO YOUR FRIENDS.—And send us combined orders, thereby saving time and trouble to all parties. *No person* interested in Floriculture or Agriculture, should be without our Catalogues; and should any of our friends come, perchance, in possession of two copies, we would remind them that they will be doing us a personal favor by placing one of the copies in the hands of such parties as would be likely to desire Seeds.

LOOK AT YOUR ORDER.—Strange as it may seem, we receive each year hundreds of orders to which the parties had forgotten to subscribe their name and address. Look to this point.

OUR BULB CATALOGUE.—We issue yearly, in September, a Catalogue of Winter and Spring Flowering Bulbs, Hyacinths, Tulips, Crocuses, &c. This is sent free on application.

RELIABILITY OF SEEDS.—It is almost unnecessary, in view of the many evidences we have already presented, to assert the reliability of our seeds. But we can re-assure our friends that we have in stock the largest variety and quantity of exclusively first-class Seeds and Bulbs now held by any house in the world. Our seeds will grow if they are properly sown and attended to; and we urge our friends to study our publications, and govern themselves by the hints contained therein; although all of our packets have printed directions for planting, care and culture.

COMPARE PRICES.—We would suggest to those under whose eyes this Price List may come, that money will be saved by them if they favor us with their orders. We have made our prices to suit the demands of the times, and they are as low as they can well be made for a *first-class* article. Please compare our prices with those of other houses.

BE EXPLICIT.—We desire to impress upon our customers the importance of being explicit in their orders, and of specifying briefly and correctly the number in the Catalogue of Flower Seeds, or the variety or varieties of Vegetables they wish to obtain. By so doing they will facilitate our business and secure the most perfect conformity with their orders.

To facilitate the work of filling orders during the busy season, we put up in ADVANCE, PACKETS and PACKAGES, as per QUOTATIONS in this Price List. To prevent extra labor and delay during the hurrying time, we have adopted the rule to furnish no HALF packets, and no LESS quantities by WEIGHT or MEASURE, than those quoted. Quantities LESS than ONE-FOURTH pound will be charged at OUNCE RATES.

N. B.—In ordering by numbers it is absolutely necessary to give the date or year in which the Catalogue or Price List was published from which the order is taken, as the numbers are changed yearly.

SELECT ASSORTMENT
OF
CHOICE IMPORTED
FLOWER SEEDS
FLOWERING THE FIRST SEASON.

ABLÖPAPPUS, Nat. Ord. *Compositae*.

- 1—**Rubiginosus**—A half-hardy annual, producing flowers in abundance till late in the autumn; flowers golden yellow; plants about two and a half feet in height, - - - - - 10

ABRONIA, Nat. Ord. *Nyctaginaceae*.

- 2—**Umbellata**—Rosy lilac, white eye, - - - - - 10
3—**Arenaria**—Pure waxy yellow, - - - - - 10

AGARISTA, Nat. Ord. *Ericaceae*.

- 4—**Calliopsida**—Grows one and a half feet high, producing many stems from the same root, terminated by large Coreopsis-like flowers, of a delicate lemon color, - - - - - 10

AGERATUM, Nat. Ord. *Compositae*.

- 5—**Conspicuum**—White; very handsome; about eighteen inches, 5
6—**Mexicanum**—Blue; fifteen inches, - - - - - 5
7— " **albiflorum**—White-flowered, fine; fifteen inch. 5
8— " **nanum**—Dwarf, white, fine; 15 in. 5
9—**Cælestinum, Tom Thumb**—A dwarf, compact growing variety, with dark blue flowers; useful for bedding, &c.; fragrant, 5
10—**Lasseauxi**—A new, very free-flowering, bright rose-colored variety; robust habit, flowering freely. One of the best of the Ageratums. A novelty of 1872, - - - - - 10

ALONSOA, Nat. Ord. *Scrophulariaceae*.

- 11—**Grandiflora**—Large-flowered, scarlet; twenty inches, - - - 5
12—**Warzewiczii**—Bright scarlet; two feet, - - - - - 5

ALYSSUM, Nat. Ord. *Cruciferae*.

- 13—**Sweet (Maritima)**—The most desirable; flowers white, and will continue in bloom the whole summer; six inches, 5
14— " **Benthami compactum**—A close and compact growing variety of the above *white flowered*. Considered a valuable acquisition, - - - - - 10
15—**Wierzebecki**—Hardy perennial, with yellow flowers; blooms freely first season when started early, - - - - - 5

AMARANTHUS, Nat. Ord. *Amarantaceae*.

- 16—**Caudatus (Love-Lies-Bleeding)**—Long, pendant, drooping flowers, of a deep red color; very pretty; three feet, - - - 5
17—**Bicolor**—Fine variegated foliage; two feet, - - - - - 5
18—**Melancholicus ruber**—One of the very finest; plants of a blood red color; eighteen inches, - - - - - 5
19—**Cruentius (Prince's Feather)**—Similar to Love-Lies-Bleeding, with the exception that the flowers grow upright in large clusters; three feet, - - - - - 5
20—**Tricolor**—Leaves scarlet, yellow, green and variegated; very beautiful when well grown; two feet, - - - - - 5
21—**Speciosissimus**—Bronze foliage, fine; two feet, - - - - - 5
22—**Gordoni**—Bronzy crimson foliage, shading off to brilliant scarlet; compact habit; fine acquisition for bedding; fifteen in. 5
23—**Atropurpureus**—Of dwarf-bushy habit, one and one-half feet in height, covered with numerous half-drooping, bright blood red flower spikes, contrasting advantageously with the reddish grey metallic reflecting foliage, - - - - - 5
24—**Salicifolius (Fountain Plant)**—This remarkably beautiful annual is by far the finest Amaranthus ever offered to the public. The plant is of pyramidal form, attaining a height of two to three and one-half feet. The leaves, which are beautifully undulated, vary in the earlier stages of growth from a green to a bronzy-green shade, and from five to seven inches

PKT. CTS.

in length, by about a quarter of an inch in width. As the plants get stronger, the leaves at the end of all the principal branches assume a bright orange red color, and become more elongated, generally being from ten to fifteen inches in length, forming magnificent, bright colored plumes, and giving the plant a most elegant and picturesque appearance. From its extremely graceful habit and rich colors, this plant produces a striking effect when planted in large beds or masses; it also forms a very handsome object as a single specimen for the center of a vase or small bed, and is invaluable as a pot plant for autumn greenhouse decoration. It has been exhibited in Hamburg, London, Edinburgh and Brighton (England) and has invariably received first class awards. It cannot be too highly recommended, - - - - - 10

AMBLYOLEPIS, Nat. Ord. *Compositae*.

- 25—**Settigera**—A desirable, very fragrant annual, from Texas; yellow flowers; height about one foot, - - - - - 10

ANAGALLIS, Nat. Ord. *Primulaceae*.

- 26—**Grandiflora, Eugenia**—White and blue, - - - - - 10
27— " **Garibaldi**—Bright vermilion; one of the finest, 10
28— " **Napoleon III.**—Dark red; very fine, - - - - - 10
29— " **Philipsi**—Blue; flowers large, - - - - - 10
30— " **sanguinea**—Bright red; conspicuous and fine, - 10
31— " **Memoria de l'Etna**—Bright red, beautiful; *new*, 10
32— " **Parksi**—Large, rose, fine; *new*, - - - - - 10
32½— " **Our own mixture of the above.** (See article on mixtures, page 3), - - - - - 10
33— " **Superb mixed**, (best foreign mixture as imported)—Scarlet, lilac, red and blue, - - - - - 5

ANTIRRHINUM (Snap-Dragon), Nat. Ord. *Scrophulariaceae*.

- 34—**Majus Brilliant**—Scarlet and white; very showy, fine, - - 5
35— " **Crescia**—Deep scarlet; choice, - - - - - 5
36— " **Galathe**—Crimson, yellow and white; large, fine, - - 5
37— " **caryophylloides**—Splendidly striped, - - - - - 5
38— " **Firefly**—Orange, scarlet and white, - - - - - 5
39— " **Bella**—Rose, carmine and white, - - - - - 5
40— " **alba**—Pure white, - - - - - 5
41— " **nana**—*New*; dwarf, white; fifteen inches, - - - 10
42— " **Papillon**—Scarlet, white and yellow, - - - - - 5
43— " **bicolor**—True, - - - - - 5
44— " **Roi des Feus**—Scarlet, - - - - - 10
45— " **Ophir**—Golden yellow, - - - - - 10
46— " **pourpre superbe**—Dark purple, - - - - - 10
47— " **Extra fine**—Mixed, - - - - - 5
47½— " **Our own mixture of the above.** (See article on mixtures, page 3), - - - - - 10
48— " **Tom Thumb**—The Tom Thumb forms a flat tuft of numerous branches, thickly clothed with foliage, above which rise in multitude the flower spikes, four to six inches in length, densely set with flowers; most useful for bedding and edgings; splendid; mixed; 1 ft. 5

ARGEMONE, Nat. Ord. *Papaveraceae*.

- 49—**Grandiflora**—Large white flowers, in diameter 2 to 4 inches, - 5
50—**Hunnemanni**—Yellow and carmine; fine, - - - - - 5

ASPERULA, Nat. Ord. *Stellatae*.

- 51—**Azurea setosa**—A profuse-flowering, hardy annual, of dwarf, branching habit, with deliciously sweet-scented, bright azure blue flowers and elegant foliage. A valuable acquisition. Continues in bloom till frost. One foot, - 10

ASTER, Nat. Ord. Composite.		PKT. CTS.			PKT. CTS.
52	Truffaut's Peony-flowered Perfection—The greatest perfection in form, size and fullness of flower, of the Peony class. The TRUE PEONY PERFECTION. All the sorts are of vigorous growth, bearing the flowers well upright. Flowers when well grown measure more than four inches across. All admire the Truffaut Asters. The separate colors are perhaps the most desirable. Height two feet. Finest colors mixed.	10	72	Newest Large-flowering Robust Bouquet, Dwarf, Brilliant Deep Blood Red—A most beautiful new variety. A great attraction in our garden the past season—each plant a mass of flowers. Height ten to twelve inches.	15
53	Truffaut's Peony-flowered Perfection—Seventeen separate colors (Benary's superb collection). In ordering, give the No. 53 and also name the color or colors wanted. Crimson; Crimson, with white; Violet, with white; Deep Crimson; Deep Crimson, with white; Light Violet; Light Violet, with white; Rose; Rose, with white; Violet; Violet, with white; White; White, with crimson; Flesh color; Lilac Rose; Purplish Crimson, with white; New Brilliant Coppery Scarlet. In separate packets, each packet.	15	73	Dwarf Pyramidal Bouquet—Very early free bloomer; ten inches; finest mixed.	10
53½	Our own mixture of the above. (See article on mixtures.)	15	74	New Peony-flowered Cocardeau, Dwarf Bouquet Pyramidal—A very beautiful class, with white centers; eighteen inches; finest colors, mixed.	15
54	La Superb, New Peony-flowered Giant Perfection—The largest-flowered Peony-formed Aster—above five inches across. A magnificent novelty. Plants two feet; full blooming. Several splendid colors, mixed.	10	75	New Miniature Bouquet Pyramidal—Very constant in height and habit of plant; extremely free-flowering and pretty; height six inches; splendid, mixed.	15
55	La superb New Peony-flowered Giant Perfection—Eight distinct colors—Rose; Rose, with white; Light Violet; Violet; Purplish Red; Crimson; Copper color; Silver Grey. In separate packets, each packet.	15	76	Reid's New Quilled, mixed—The finest class of the Quilled Asters; twenty inches.	10
55½	Our own mixture of the above. (See article on mixtures.)	15	77	Original Chinese—Flowers very large, with long petals; the original variety of the China Aster.	10
56	New Rose—This new class is intermediate between the large-flowered Imbrique and Peony Perfection or Truffaut's. Very robust, with large flowers double to the center, having the outer petals imbricately arranged in fine order, and of great substance. A plant in full bloom is magnificent. Two feet. Colors most brilliant, of great variety, mixed.	10	78	Hedge-Hog or Porcupine, finest colors mixed—The flowers of this class of Asters are composed of long, quilled, sharply pointed and curious looking petals; hence the name. All the varieties are novel, showy and desirable.	10
57	New Rose—Fourteen distinct colors—Dazzling White; Brilliant Rose; Purplish Crimson; Indigo; Indigo, with white; Dark Crimson, with white; Deep Violet, with white; Brilliant Crimson, veiled with white; Deep Purple; Brilliant Deep Blood Red; White, inside rose chamois; Maroon Crimson; Brilliant Copper color; White, with rose center. In separate packets. In ordering, give the No. 57 and also name the color or colors desired. Each color or packet.	15	THE FOLLOWING WERE THE NOVELTIES IN ASTERS FOR 1873:		
57½	Our own mixture of the above. (See article on mixtures.)	15	79	Newest Improved Peony Perfection, Brilliant Lilac Blue—Color very striking; flowers of the greatest perfection.	20
58	Tall Chrysanthemum-flowered—All colors of this very desirable class, mixed; twenty inches.	10	80	Emperor, Brown Violet with White—This is a magnificent large Peony-flowered novelty, surpassing all the other colors of this section by its elegant habit and doubleness of flowers. Height 10 inches; flowers two and one-quarter inches across. We exhibited several new varieties of Asters at the Western New York Fair, in this city, September, 1873, among which were some fine specimens in pots of the "Emperor," which received a First Premium as the best new Aster. This variety is very unlike the New Giant Emperor Aster mentioned above, and of which we have a very poor opinion.	20
59	New Dwarf Chrysanthemum-flowered—A new class, and desirable on account of its large and perfect flowers, great beauty and late blooming; all colors, mixed; about 12 inch.	10	81	Newest Cellular, victoria, Peach Blossom—A most charming novelty, equal in habit of plant to the old favorite Victoria Aster. The petals being tubular, are open at their ends, thus forming small cells. We also exhibited this Aster in pots at the Western New York Fair. It is an entirely different style of Aster from the "Emperor." Many thought it deserved the first premium. In height about eighteen inches.	20
60	New Chrysanthemum-flowered Dwarf—Snow-white, large and perfect-flowered; superb; one foot.	10	82	Newest Shakspeare Hedge-Hog, Dark Violet—The dense, tubular petals of this gem, spreading ray-like in large masses to all sides, give the flower the perfect form of a globe. A first-class novelty.	20
61	New Large-flowered Dwarf Imbrique Pompon—Extremely beautiful; about fifteen inches in height; upright branching, with very large flowers—two to two and a half inches across; perfectly double, compact and of the greatest perfection. Recommended as a novelty of the highest merit, and which must become a general favorite; several fine colors, mixed.	15	83	New Dwarf Double Large-flowered Chrysanthemum, Dark Crimson—This is of a dark red color, and a very valuable addition to the Chrysanthemum class of Asters.	15
62	New Large-flowering Dwarf Imbrique Pompon—In ordering, give the No. 62 and also the color or colors desired. Eight colors of this novelty—Brilliant Deep Crimson; Pure White; Deep Violet; Reddish Violet; Reddish Lilac; Snow White; Crimson, with white; Crimson-rose, veiled with white, each.	20	84	Bismarck Shining Blood Red—A most showy new color of this beautiful section of Asters, which is especially remarkable by the shining satin-glanced color; wonderfully suitable for pot culture; will make a brilliant, effective display.	25
62½	Our own mixture of the above. (See article on mixtures.)	20	85	Boltze's New Bouquet Copper Rose—The exceedingly pretty new color of this rich flowering variety of Aster will be found very useful for edgings and small beds, and will make a most charming little pot plant.	25
63	New Cocardeau Imbrique Pompon—A most beautiful Aster; lilac, white center, and rose, white center, mixed; 18 inches.	10	86	New Schiller—A dwarf bouquet Aster of great beauty and peculiar habit. It is late, about fifteen inches in height and an abundant bloomer.	15
64	New Peony-flowered Globe—A superb, robust-growing variety, with self-supporting, spreading branches. Very beautiful habit; free blooming, flowers of fine form; very large, two and a half inches across, and very double. In height fifteen inches; several bright and distinct colors, mixed.	10	BALSAMS (Impatiens), Nat. Ord. Balsaminaceæ.		
65	New Peony-flowered Globe—Seven distinct varieties of this magnificent class—Deep Indigo; Deep Violet; Bright Rose, veiled with white; Purplish Crimson; White, veiled with azure blue; Dark Crimson; Pure White. Separate packets.	15	87	Camellia—Very choice; saved from extra large-flowered prize varieties; fine, mixed; two feet.	10
65½	Our own mixture of the above. (See article on mixtures.)	15	88	Double Camellia-flowered Spotted German—Two feet.	10
66	Pyramidal-flowered German—Habit upright, branching and fine; abundant bloomer; flowers two to two and a half inches across; very double and compact; mixed.	10	89	Rose-flowered French—Perfectly double; fine, mixed; 2 feet.	10
67	New Giant Emperor—The size, beauty, brilliancy and perfection of this class of Asters are mentioned by foreign seedsmen in the most enthusiastic terms. With us, however, it has never warranted such praise. Mixed.	15	90	Rose-flora caryophylloides—New; Carnation striped; tall, large-flowered; Rose Balsam; ten fine colors, mixed; two feet.	15
68	Chinensis Mont Blanc (<i>quaximus plenissimus albus</i>)—"This acquisition belongs to the Pyramidal section in the way of Victoria Asters. Of extremely vigorous growth, it forms large bushes of about two and a half feet in height, profusely covered with immensely large flowers, measuring upwards of five inches in diameter, and very double. The color is a dazzling pure white. The greatest perfection of Asters yet obtained. A novelty."	20	91	Striata punctata Solferino—Satin white, streaked, striped and spotted with lilac and crimson; 2 ft.	20
69	New Victoria Large-flowered—Habit pyramidal; flowers nearly as large as the Truffaut Aster; double, well formed, and rich in colors; about two feet high; finest mixed.	10	92	" " Victoria—Brilliant salmony scarlet, finely spotted and streaked on white ground; quite new and lovely color; extremely beautiful; a magnificent novelty; 2 ft.	20
70	New Dwarf Victoria—Four distinct colors—Crimson; Rose; Rose, with white; Snow-white. In separate packets, each.	15	93	Rose-flora nana caryophylloides—New Carnation dwarf-flowered; 12 splendid colors, mixed; one foot.	15
70½	Our own mixture of the above. (See article on mixtures.)	15	94	Improved Rose—Five of the most showy, self-colored varieties of this class, in separate packets, each.	15
71	New Large-flowering Robust Bouquet, Dwarf—A beautiful class of bouquet-formed Asters, being perfectly constant in height and habit, and lasting well in flower; the best for edgings and dwarf groups. They excel in variety and brilliancy of colors, and last in flower till frost; height about one foot. Best colors, mixed.	15	95	" " Our own mixture of the above. (See article on mixtures, page 3).	15
			96	New Dwarf—Five distinct colors—Pale Yellow; Chamois-rose; Lilac; Scarlet; White, tinted rose. In ordering give the No. 96 and name the color or colors wanted. In separate packets, each packet.	15
			96½	" " Our own mixture of the above. (See article relating to mixtures, page 3).	10
			97	Double Dwarf Camellia-flowered or Spotted—One foot.	10
			98	Fine Double German, mixed. (See article on mixtures).	10
			99	Impatiens Balsamina Imperialis (the Emperor Balsam)—An immense, large-flowered variety, as imbricately double as Camellia-imbriata; dark blue, regularly blotched with pure white; constant in color and habit; produces seeds very sparingly. A novelty of 1873.	20
			100	Impatiens Balsamina punctata Kermesina—A new variety of Victoria Balsam; white, densely spotted with crimson. A novelty of 1873.	20

BARTONIA, Nat. Ord. *Loasaceæ*.

- | | | |
|--|-----------|----|
| 101—Aurea—Bright orange; eighteen inches, - - - - - | PKT. CTS. | 5 |
| 102—Nuda—A splendid hardy perennial, with large white flowers, blooming the entire season; two feet, - - - - - | | 10 |

BRACHYCOME, Nat. Ord. *Compositæ*.

- | | |
|--|---|
| 103—Iberidifolium—Fine blue; ten inches, - - - - - | 5 |
| 104—Alba—White; ten inches, - - - - - | 5 |
| 105—Blue and White, mixed, - - - - - | 5 |

BROWALLIA, Nat. Ord. *Scrophulariaceæ*.

- | | |
|---|---|
| 106—White, Blue, Deep Rose, &c., mixed—Handsome, half-hardy annuals; very showy; produce an abundance of beautiful and striking flowers; desirable either for greenhouse or garden. Set about eighteen inches apart; eighteen inch. | 5 |
|---|---|

CACALIA, Nat. Ord. *Compositæ*.

- | | |
|--|---|
| 107—Coccinea—Scarlet; about eighteen inches in height, - - - - - | 5 |
| 108—Aurea—Yellow, - - - - - | 5 |

CATCHFLY (*Silene*), Nat. Ord. *Caryophyllaceæ*.

- | | | |
|--|-----------|---|
| 152—Armeria (<i>Lobel's Catchfly</i>)—Red, White and Rose, mixed. Height fifteen inches. Brilliant and profuse flowering hardy annuals, of easy culture, continuing a long time in bloom. For pretty effect, should be grown in groups. Thin to twelve inches apart, - - - - - | PKT. CTS. | 5 |
|--|-----------|---|

CELOSIA (Cockscomb), Nat. Ord. *Amarantaceæ*.

- | | |
|--|----|
| 153—Cristata, Cockscomb, Tall—Atrounginea aurea, chamois, purpurea, deepest fine rose, sulphurea and violacea; imported, mixed, - - - - - | 5 |
| 153½— " " " Our own mixture of separate colors. (See article about mixtures, page 3), - - - - - | 10 |
| 154— " " " nana, Dwarf—Crimson, extra, amarantina, chamois, lutea, rosea and sanguinea; imported, mixed, - - - - - | 5 |
| 154½— " " " Our own mixture of separate colors. (See article about mixtures, page 3), - - - - - | 10 |
| 155—Pyramidalis—Coccinea, scarlet; aurantiaca, scarlet fringed with orange; nana aurantiaca, yellow, splendid foliage, and varicolor; varieties hybrida foliis atrob; uneis, reddish brown foliage and golden brown foliage; all these varieties, mixed. Three feet, - - - - - | 10 |
| 156—Spicata rosea—Extremely pretty plant; free bloomer; flowers if picked early are useful for winter ornaments, - - - - - | 10 |
| 157—New crimson-feathered—Magnificent; extremely delicate and showy—many of the plants even more so than the so called "Japan." Three feet, - - - - - | 15 |
| 158—Japonica, or New Japan Cockscomb—New variety of Cockscomb, claimed by a neighboring seedsman to have been imported from Japan, but as we have since learned first seen by him in the possession of a lady in Ontario County, from whom he obtained the seed. A fair Celosia, but in beauty and interest far inferior to the Variegated Cockscomb. Leaf scarlet or crimson, the comb delicately cut and of a deep scarlet hue. Seed saved from most perfect specimens only, - - - - - | 10 |
| 159—Huttonii—This beautiful plant was introduced by Messrs. Jas. Verron & Sons, through their collector of rare specimens of the floral kingdom, the late Mr. Hutton, after whom it was named. The plant is of compact form and bushy habit, profusely branched, each leading branch being tipped with a small spike of bright crimson flowers. In color the plant resembles the well known <i>Tresina Lindentii</i> , the upper surface of the leaf being of a deep scarlet color, while the under side is of a bright crimson shade. Height one and one-half to two feet, by about one and one-half feet in diameter. As a bedding or sub-tropical plant it will take a high rank, from its fine habit and rich and effective coloring. Plants propagated by cuttings taken off in early summer make splendid objects for greenhouse decoration during the winter months. We pronounce this plant to be the finest and most effective red leaf plant grown from seed in cultivation. We have grown it the past season and think that too much praise cannot be accorded it. A novelty of 1872, - - - - - | 20 |
| 160—Cristata Kermesina Tom Thumb—A new Dwarf Cockscomb, five to six inches high only, forming large combs of a most splendid crimson. Both the height and color are quite constant. In our grounds we find this to be by far the finest type of the Celosia cristata ever offered, coming true to color and description, and has been admired by all who saw it. Also a novelty of 1872, - - - - - | 15 |
| 161—Cristata nana Copper Chamois—A beautiful and highly interesting color, which has never before been obtained in this genus, and for such to be recommended, - - - - - | 15 |
| 162—NEW VARIEGATED COCKSCOMB (CELOSIA CRISTATA VARIEGATA)—This is an introduction of 1872, of which we gave in our January Number for that year a colored plate, and a description as furnished us by the foreign grower. This novelty the past two seasons upon our grounds came invariably true to description, except that in place of the large Cockscomb-shaped head it produced in the center large and beautifully striped and variegated tufts or clusters—small, striped and variegated Cockscomb-shaped flowers appearing upon the branches. It increased in beauty as it became older. It is certainly the most singularly showy and beautiful of the entire Cockscomb family. (See New Catalogue for Cockscomb matter), - - - - - | 20 |

CENTAUREA, Nat. Ord. *Compositæ*.

- | | |
|---|---|
| 163—Cyanus (<i>Bachelor's Button</i>)—Mixed; two feet, - - - - - | 5 |
| 164—Moschata (<i>Sweet Sultan</i>)—Blue, white and red, mixed; 18 in. - - - - - | 5 |
| 165— " atropurpurea—Deep purple; new; eighteen inch. - - - - - | 5 |
| 166—Depressa—Blue, white and red, mixed; height ten inches, - - - - - | 5 |
| 167—Involucrata—Yellow, fine; very spreading; fifteen inches, - - - - - | 5 |

CENTAURIDIUM, Nat. Ord. *Compositæ*.

- | | |
|--|---|
| 168—Drummondii—An elegant, hardy annual, from Texas; free bloomer. Succeeds well in any good garden soil; flowers yellow, and quite showy, - - - - - | 5 |
|--|---|

Mrs. E. W. Dodge, of Lawn Ridge, Ill., Sept. 24, 1874, writes as follows:

"Last year I raised one plant of the Variegated Cockscomb; from that plant I have this year raised a number, far superior to that, of which I will send you a specimen. Our State Fair was held last week. I was there on Friday—took a sample of Cockscombs, of different varieties. They were pronounced 'the best they ever saw.' Mr. — of Rochester said the Variegated was a failure with them, and they had pronounced it a humbug. He said he thought your success was no better than his. I gave him the plant I had with me to take home."

I. G. PLANK, Danvers, Ill.,

"You requested in your Catalogue for Jan., 1873, that your customers should report their success with the Variegated Cockscomb. I purchased seed of you last spring and raised several flowers this season that were variegated, and this flower in particular was a very nice red and yellow striped; even the stem of the plant was striped with red and yellow. I bought other seeds of you that gave good satisfaction."

Mrs. GEORGE N. JOHNSON, Leroyville Pa.: "I send you a specimen of the seed I raised from the New Variegated Cockscomb. They were perfect; almost as large again as the colored plate in your Catalogue. As a lady said, it was a perfect beauty."

200— " pumilum (<i>candelabrum</i> , <i>Koerberer</i>)—Tom Thumb class, ten inches in height, with lively foliage and numerous flower spikes, densely set with beautiful double flowers, the whole forming an elegant pyramid. Flowers throughout the season, - - -	10
201— Consolida var. candelabrum —A new variety of Larkspurs, with fine double flowers, and growth of plant similar to a chandelier. A <i>novelty</i> of 1872. Mixed, - - -	10
202— Nudicaule —With bright scarlet Larkspur flowers; in appearance like a brilliant Tropaeolum, such as <i>T. tricolorum</i> ; fine novelty, and where it succeeds will be considered a gem of the first water. <i>Novelty</i> of 1872, - - -	15

Delphinium Imperiale flore pleno (*Emperor Larkspur*)—

This new style of Larkspur, a *novelty* of 1872, cannot fail to become as universal a favorite as the *Candelabrum* variety, introduced a few years ago. It is of symmetrical bushy habit, branching out five inches from the ground, forming fine, compact, well-shaped specimens of one and one-half feet in circumference; height eighteen inches. For redundancy of bloom, the *Imperial Larkspur* is certainly unequalled—a single plant being rarely seen with less than one hundred close, erect spikes of flowers upon it. Both in respect of habit and doubleness of flower, this novelty is possessed of great constancy, whereby it is particularly adapted for groups, &c.; in fact, for general decoration, its utility cannot be over estimated. The flowers in a dried state will be esteemed for *winter bouquets*. In planting out, a clear space of eighteen inches each way should be allowed, so that the plants may attain complete development. We offer the following brilliant separate Larkspurs:

203— Imperiale flore pleno (<i>Emperor Larkspur</i>), Dark Blue , -	15
204— " " " " Red Striped , -	15
205— " " " " tricolor , -	15

- 247—**Nivalis**, white; **tricolor rosea**, rose, white and purple, **mixed**; fifteen inches; habits alike, - - - - - 5
- 248—**Achillæfolia major**—From California. It is greatly superior to, and distinct from, the old sort of achillæfolia in habit, foliage and size of bloom. Erect and branching growth. Height two to two and one-half feet. Leaf is light, elegant, deeply cut and serrated. Flowers four times the size of old sort, of a bright cobalt blue shade. *Novelty* of '72, - - - - - 10

GODETIA, Nat. Ord. *Onagraceae*.

- 249—**Lindleyana**, purple, carmine center; **Lindleyana flore pleno**, rosy carmine, double; **Schamini**, white, rose belt in center, and **The Bride**, white and scarlet, brilliant—**mixed**; 8 in. - - - - - 5
- 250—**Tom Thumb rosea alba**, red and white, and other dwarf varieties, **mixed**; ten inches, - - - - - 5
- 251—**All colors mixed**. (See article in relation to mixtures, p. 3), - - - - - 5
- 252—**Whitney**—Beautiful variety, and the finest of the Godetias. *Novelty* of 1872, - - - - - 10

HAWKWEEED, Nat. Ord. *Compositæ*.

- 253—Red and white, **mixed**; twenty inches, - - - - - 5
- 254—Silvery and yellow, **mixed**; twenty inches, - - - - - 5

HEDYSARUM (French Honeysuckle).

See list of "Flowering the Second Season."

HELIANTHUS (Sunflower), Nat. Ord. *Compositæ*.

- 255—**Argophyllus fl. pl. striata**—Double yellow flowers, striped with brown; compact in growth; five feet, - - - - - 5
- 256—**Double Green-centered**—New; fine yellow, very double and unusually large flowers; grows from five to eight feet, - - - - - 5
- 257—**Grandiflora plenissimus**—Flowers very large and double; bright orange; five feet, - - - - - 5

HIBISCUS, Nat. Ord. *Malvaceae*.

- 258—**Africanus**—Cream colored, brown center; eighteen inches, - - - - - 5
- 259—**Calisureus**—White, dark brown center; eighteen inches, - - - - - 5
- 260—**Coccineus**—Crimson, superb; three feet, - - - - - 10
- 261—**Thunbergi**—Yellow; two feet, - - - - - 10
- 262—**Immutabilis**—White; three feet, - - - - - 10

ALTHEA SINENSIS (Hollyhock), Nat. Ord. *Malvaceae*.

- 263—**Chinese Double**—Hardy annual variety of the Hollyhock; double and very showy; height about two and a half feet. Sown seed very early in spring. All colors, mixed, including new deep scarlet, - - - - - 5

HUNNEMANNIA, Nat. Ord. *Papaveraceae*.

- 264—**Fumariæfolia**—Very pretty and exceedingly showy, half-hardy perennial, with tulip-shaped, yellow flowers; from Mexico. In height two feet. Thin or transplant to 15 inches apart, - - - - - 5

HYMENOXYIS, Nat. Ord. *Compositæ*.

- 265—**Californica**—Showy, hardy annual, from California. Flowers bright yellow, centered with orange; blossoms freely. Excellent for small beds or edgings. Height about one foot, - - - - - 5

ISOTOMA, Nat. Ord. *Lobeliaceae*.

- 266—**Petræa**—Red; ten inches, - - - - - 10
- 267—**Axillaris**—Blue; ten inches, - - - - - 10

KAULFUSSIA, Nat. Ord. *Compositæ*.

- 268—**Amelloides**—Very pretty, hardy annual; blossoms freely. Can be recommended for beds or groups. Height eight inches. Plant from six to eight inches apart. Bright red, white, rose, red centered, and brilliant violet—**mixed**, - - - - - 5

LAVATERA, Nat. Ord. *Malvaceae*.

- 269—**Rose and White, mixed**—Profuse blooming, handsome, hardy annuals; very showy, well adapted and exceedingly effective when used as a background to other plants. Thin to fifteen inches apart, - - - - - 5

LEPTOSIPHON, Nat. Ord. *Polemoniaceae*.

- 270—**Hybridus, New French**—This class cannot be too strongly recommended, comprising as it does every variety of color—dark maroon, orange, lilac, purple, crimson, violet, golden yellow, and white, combined with an unusual profusion of bloom, which renders it invaluable for edging, &c.; 8 inch. - - - - - 10
- 271—**All colors, mixed**; one foot. (See article on mixtures, p. 3), - - - - - 5

LIMNANTHES, Nat. Ord. *Tropæolaceae*.

- 272—Elegant and slightly fragrant annuals. Very free blooming. Excellent for beds or edgings. Easy of culture, growing freely in any soil. **Yellow**, margined with white; **White**, rose-colored and **sulphur-colored—mixed**; eight to ten inches. (See article about mixtures, page 3), - - - - - 5

LINARIA, Nat. Ord. *Scrophulariaceae*.

- 273—A pretty, free blooming genus of Snap-Dragon-like, hardy annuals. Are recommended for their beauty and variety of colors. Succeed well in any garden soil, with ordinary care. Thin to one foot apart. Rich deep purple, pure white, white, striped with purple, &c.—**mixed**. (See article on mixtures), - - - - - 5

LINUM, Nat. Ord. *Linaceae*.

- 274—**Grandiflora coccineum**—One of the handsomest, most effective and showy of bedding plants, producing a profusion of beautiful, saucer-shaped flowers, of a rich, *brilliant scarlet*, with crimson center; eighteen inches, - - - - - 5
- 275—**Grandiflora album**—Pure white; contrasts beautifully with the scarlet; eighteen inches, - - - - - 5

LOBELIA, Nat. Ord. *Lobeliaceae*.

- 276—**Erinus**—Deep blue; excellent bedder, - - - - - 10
- 277— " **speciosa**—True *Crystal Palace* variety; dark blue, with a clear white eye and dark colored foliage, - - - - - 10
- 278— " **alba**—White, fine, - - - - - 10
- 279— " **grandiflora**—Dark brown, - - - - - 10
- 280— " **marmorata**—White and blue, marbled, - - - - - 10
- 281— " **Paxtoniana**—Flowers larger than *speciosa*; prevailing color blue, pure white center, - - - - - 10
- 281½—**Crystal Palace compacta**—The flowers large, produced in great abundance, of a fine ultramarine blue. *Novelty* of '72, - - - - - 15
- 282—**Gracilis**—A very delicate growing variety; white, blue, rose and light blue, mixed, - - - - - 10

See list of Biennials and Perennials for *Lobelia cardinalis*, *Lobelia hybrida grandiflora* and *Lobelia Victoria*, which are perennials, but will bloom the first season from seed if started early under glass.

LUPINUS (Lupine), Nat. Ord. *Leguminosae*.

- 283—**Hartwegi**—Several delicate colors, mixed, - - - - - 5
- 284—**Alba coccineus**—Rich rosy red half way up the spike, thence to the apex pure white. The general effect is very striking, - - - - - 10
- 285—**Dunnetti atroviolacea**—Violet brown and yellow, delicate and pretty, - - - - - 5
- 286—**Tricolor elegans**—Purple, violet and white, - - - - - 5
- 287—**Hybridus atrococcineus**—Beautiful crimson and scarlet, white tip; spikes large, - - - - - 5
- 288—**All the above mixed**—As they are of about the same dwarfish habit (2 feet) and contrast finely. (See article on mixtures), - - - - - 5
- 289—**Affinis**—Delicate white, blue and purple; from California, - - - - - 5
- 290—**Subcarnosus**—Ultramarine blue, crimson and purple; the richest in colors of all the Lupins, - - - - - 10
- 291—**Nanus**—Blue and lilac shaded; very pretty, - - - - - 5
- 292— " **albus**—Pure white, - - - - - 5
- 293—**Last four varieties mixed**—All of the same dwarfish and spreading habit; foliage fine and delicate; height fifteen to eighteen inches. Thin to fifteen inches apart, - - - - - 5
- 294—**Cruikshanki**—Blue, white and yellow; three feet, - - - - - 5
- 295—**Crystal Palace compacta**—The flowers large, produced in great abundance, of a fine ultramarine blue. *Novelty* of '72, - - - - - 15

MALOPE, Nat. Ord. *Malvaceae*.

- 296—Showy and handsome, half hardy annuals, of branching habit, producing blossoms in great profusion. If seed is sown in frame, they will bloom early. Set sixteen inches apart. **Grandiflora**—Purple, white and crimson, **mixed**; two ft. - - - - - 5

MALVA, Nat. Ord. *Malvaceae*.

- 297—Pretty, free blooming, half hardy annuals, particularly suitable for border plants, succeeding well in any ordinary garden soil. Red, red and white, and variegated, &c.—**mixed**; 2 ft. - - - - - 5

MARIGOLD (*Tagetes*), Nat. Ord. *Compositæ*.

- 298—**African, Double Tall Orange and Sulphur**—Quilled and plain, mixed, - - - - - 5
- 299— " **Dwarf Orange and Sulphur**—Mixed, - - - - - 5
- 300—**French**, " **Yellow, Double New Dwarf Orange and Double New Dwarf Orange Quilled, mixed**, - - - - - 5
- 301— " " **Striped**, - - - - - 5
- 302— " " **Tall Striped, yellow and brown, and Golden Striped, mixed**, - - - - - 5
- 303— " " **Dunnett's New Orange**—Very choice, - - - - - 5
- 304— " " **Miniature, selected, brown and yellow striped, yellow edged, splendid, and Miniature Orange, selected, mixed**, - - - - - 10
- 305— " **Tall, mixed**—Selected, finest. (See article in relation to mixtures, page 3), - - - - - 5
- 306— " **Dwarf, mixed**—Selected, finest, - - - - - 5

	PKT. CTS.
307—(Tagetes) <i>erecta nana fistulosa sulphurea fl. pl.</i> —A quilled, dwarf, shining, sulphur yellow African Marigold, of remarkable beauty in form of flower. <i>Novelty of 1872.</i> - - - - -	10
308— “ <i>patula nana regia</i> , <i>Beauty of the Dwarfs</i> —A new French Marigold; quilled, golden yellow, marbled with glossy brown; remarkably beautiful form of flower; exquisitely fine in color. <i>Novelty of 1872.</i> - - - - -	10
309— “ <i>signata pumila</i> —A splendid dwarf variety, of spreading habit; <i>profuse</i> bloomer; <i>very</i> showy, and as a rich golden plant especially adapted for bedding. It made a magnificent show upon our grounds the last season. Height twenty inches. Thin to 15 inches. A single plant is beautiful, - - - - -	10

MARTYNIA, Nat. Ord. *Pedaliaceae*.

310— <i>Cranioilaria</i> —White, - - - - -	5
311— <i>Fragrans</i> —Purple; quite fragrant, - - - - -	5
312— <i>Lutea</i> —Yellow, - - - - -	5
313— <i>Proboscidea</i> —Blue. Seed pods when young used for pickles, - - - - -	5

MESEMBRIANTHEMUM, Nat. Ord. *Ficoideae*

314— <i>Capitatum</i> —Light yellow; one foot, - - - - -	5
315— <i>Crystallinum</i> (<i>Ice Plant</i>)—Singularly icy foliage, - - - - -	5
316— <i>Glabrum</i> —Pale yellow; nine inches, - - - - -	5
317— <i>Tricolor</i> —Rosy pink, centered with purple, and <i>tricolor-album</i> , white, purple centered, mixed; six inches, - - - - -	5

MIGNONETTE, Nat. Ord. *Resedaceae*.

318—(<i>Reseda odorata</i>)—Common Sweet Mignonette, per oz. 25c. - - - - -	5
319— “ “ <i>grandiflora</i> —Similar to the Common in habit, but of more robust growth and larger flowers, - - - - -	10
320—(<i>Reseda odorata perfecta globosa ameliorata</i>)—“ Noted for its luxuriant growth, conspicuous color, and especially for its <i>powerful</i> , sweet fragrance, surpassing by far the old varieties; globular as to the habit of the plant; has large, broad, bullated, dark green foliage, with long, massive, abruptly pointed spikes, densely set with large flowers, which are crowded by monstrous sized anthers of a bright cinnamon color, giving the whole flower spike a conspicuous bright red appearance. Plants of it have been exhibited which were above two feet in height, and as much in diameter—models of health and vigor.” - - - - -	10
321—(<i>Reseda odorata perfecta grandiflora pyramidalis</i>)—“A pyramidal variety of the ameliorated, throwing up its branches in pyramidal form; has large, light green foliage and very long, densely crowded flower spikes, terminating into a point. The flowers are as large as the ameliorated before described, of the same red appearance and powerfully scented.” <i>New.</i> - - - - -	10
322—(<i>Reseda odorata</i>) <i>Giant New Crimson-flowered</i> —A <i>new</i> and distinct variety of Mignonette; very robust in habit, with <i>very large</i> spikes of handsome flowers; of <i>exquisite</i> fragrance, and is a free and perpetual bloomer. <i>Novelty.</i> - - - - -	10
323—(<i>Reseda odorata eximica</i>) <i>Parsons' New White Mignonette</i> —The following is what is said of it: “This <i>new</i> Mignonette is much superior in <i>odor</i> , <i>habit</i> and <i>color</i> (being nearly <i>pure white</i>) to the other varieties, and cannot fail to become a general favorite. The spikes are large and beautifully shaped. One plant of it suffices to perfume a whole house. It was exhibited at <i>four</i> of the <i>principal</i> shows of 1870, and obtained on each occasion the <i>highest</i> honors that could be awarded.” - - - - -	10
324—(<i>Reseda odorata</i>) <i>Parsons' New Tree</i> —A <i>new</i> and <i>superior</i> variety of the Tree Mignonette, produced by careful selection for a number of years, and without doubt the <i>best</i> in <i>cultivation</i> , - - - - -	10

The following two varieties of Mignonette were *novelties* of 1872. They have proved themselves to be very distinct and showy. We recommend them as being desirable, and especially the New Dwarf Compact Mignonette:

325—“ <i>Pyramidal Bouquet Mignonette</i> —Forms a dense, short pyramid of free growth, the numerous branches being terminated by large spikes of intense red flowers—as many as three hundred of them being produced on full grown specimens. The foliage is luxuriant, and of dark green. This variety is recommended for pot culture and the open border.” - - - - -	10
326—“ <i>New Dwarf Compact Mignonette</i> —Seems to be very desirable and very distinct in character. It is called <i>Reseda odorata nana compacta multiflora</i> , and forms a dense, semi-globular bush of about ten inches high and eighteen inches across, the robust and vigorous branches being clothed with dark green leaves and decorated with innumerable close spikes of reddish-tinted flowers. These flowers are produced without intermission from spring till late in the autumn, the blooming period being of longer duration in <i>this</i> than in <i>any other</i> variety, owing to the <i>successional</i> branching growths. Its fine dwarf habit adapts it for planting near the edge of the flower border, while, if cultivated in good soil, it will also have a fine effect as a single specimen. For pot culture or for market purposes, it is very highly recommended.” - - - - -	15

MIMULUS, Nat. Ord. *Scrophulariaceae*.

	PKT. CTS.
327— <i>Cupreus</i> —A <i>novelty</i> , producing a multitude of orange-scarlet blossoms, - - - - -	10
328— <i>Hybridus tigrinus</i> —Splendid tigered and spotted variety; 6 in. - - - - -	10
329— “ “ <i>flore-pleno</i> —The splendid double tigered and spotted varieties of Mr. BULL; constant; six inches, - - - - -	15
330— “ “ <i>Bruneus</i> (<i>Benary</i>)—Flowers large, deep yellow, spotted; fine, new, constant; eight inches, - - - - -	10
331— <i>Moschatus</i> (<i>Musk Plant</i>)—Much esteemed; six inches, - - - - -	10
332— <i>Fine, mixed</i> —Dark spotted varieties, - - - - -	10
333— <i>Superb, mixed</i> —From largest named flowers, - - - - -	10
334— <i>Roezii</i> —A new species, of dwarf habit and bright yellow flowers, the throat being prettily dotted with red; fine for groups and pot culture. A desirable <i>novelty</i> of 1872, - - - - -	15

MIRABILIS, Nat. Ord. *Nyctaginaceae*.

335— <i>Jalapa</i> , (<i>Marvel of Peru</i>) <i>Gold Striped</i> , - - - - -	5
336— “ “ “ <i>Red Striped</i> , - - - - -	5
337— “ “ “ <i>Scarlet</i> , - - - - -	5
338— “ “ “ <i>Silver Striped</i> , - - - - -	5
339— “ “ “ <i>White</i> , - - - - -	5
340— “ “ “ <i>Yellow</i> , - - - - -	5
341— “ “ “ <i>follo variegata</i> —Of various colors; leaves finely striped, - - - - -	5
342— “ “ “ <i>All the above mixed</i> , - - - - -	5
343— “ “ “ <i>longiflora</i> —Trailing habit; flowers white, sweet-scented; slender, funnel-shaped, and about four inches long, - - - - -	10
344— “ “ “ <i>violacea</i> —Height and habit as above; flowers violet, - - - - -	10
345— “ “ “ <i>Last two varieties mixed</i> . (See article on mixtures, page 3), - - - - -	10

MYOSOTIS (*Forget-Me-Not*).

These world-wide favorites find under head of “Flowering the Second Season.”

NASTURTIUM (*Tropaeolum Minor*), Nat. Ord. *Tropaeolaceae*.

346— <i>Tom Thumb</i> , <i>Crystal Palace Gem</i> —Yellow, spotted with maroon, - - - - -	1
347— “ “ “ <i>Dark Crimson</i> , - - - - -	5
348— “ “ “ <i>Carter's Scarlet</i> , - - - - -	5
349— “ “ “ <i>Beauty</i> —Yellow, blotched with crimson, - - - - -	10
350— “ “ “ <i>rosea</i> — <i>New</i> ; habit like <i>Scarlet Tom Thumb</i> , - - - - -	10
351— “ “ “ <i>Pearl</i> —White; choice, - - - - -	5
352— “ “ “ <i>All the above mixed</i> —Same height and habit, - - - - -	10
353— “ “ “ <i>King of—Splendid</i> variety; brilliant scarlet, - - - - -	10
354— “ “ “ <i>King Theodore</i> —Choice; flowers very dark, - - - - -	10
355— “ “ “ <i>Last two mixed</i> —Habit slender; leaf small, foliage dark purplish green; <i>very fine</i> , - - - - -	10
356— “ “ “ <i>Golden King of—New</i> . Similar in habit to the other varieties of Tom Thumb, but producing deep golden yellow flowers well above the dark green foliage. Recommended as a <i>fine bedder</i> , - - - - -	10
357— “ “ “ <i>oreulea rosea</i> — <i>New</i> . This is a <i>distinct</i> and <i>superior</i> variety, producing flowers of a <i>new color</i> in Tropaeolums, viz: a <i>brilliant rose</i> , shaded and underlaid with a peach-blue. Has been greatly admired in Europe, and is there considered a <i>first-class novelty</i> , - - - - -	15

NEMESIA, Nat. Ord. *Scrophulariaceae*.

358—Exceedingly pretty and profuse blooming, half-hardy annuals. The varieties which we offer should be afforded a place in every garden. Plant in groups or masses; plants should stand about eight inches apart. Colors of <i>versicolor compacta elegans</i> and <i>la superb, mixed</i> . Ten inches, - - - - -	10
---	----

NEMOPHILA, Nat. Ord. *Hydrophyllaceae*.

359— <i>Insignis</i> —Splendid light blue; eight inches, - - - - -	5
360— <i>Maculata</i> —White, large purple spots; eight inches, - - - - -	5
361— <i>Atomaria oculata</i> —Light blue, blotched with black; 6 in. - - - - -	5
362— <i>Several colors mixed</i> . (See article on mixtures, page 3), - - - - -	5

NIGELLA (*Love in a Mist*), Nat. Ord. *Ranunculaceae*.

363— <i>Damascena</i> —Double light blue, and <i>Damascena nana</i> , blue and white— <i>mixed</i> . One foot, - - - - -	5
364— <i>Hispanica</i> , blue, showy, and <i>alba</i> , pure white, <i>mixed</i> ; 1 ft. - - - - -	5

NOLANA, Nat. Ord. *Nolanaceae*.

365— <i>Atriplicifolia</i> —Blue, white and yellow; ten inches, - - - - -	5
366— “ “ “ <i>alba</i> —White, yellow centered; ten inches, - - - - -	5
367— “ “ “ <i>subcaerulea</i> —Pretty dove-colored sort; 10 in. - - - - -	5
368— “ “ “ <i>lanceolata</i> —Blue; ten inches, - - - - -	5
369— “ “ “ <i>Above mixed</i> . (See article on mixtures, p. 3), - - - - -	5

NYCTERINIA, Nat. Ord. Scrophulariaceae.

- 370-Capensis-White, yellow centered; eight inches, - - - - 10
371-Selaginoides-Pink, yellow centered; eight inches, - - - - 10
372- " alba-Pure white; eight inches, - - - - 10
373-Above mixed. (See article on mixtures), - - - - 10

OBELISCARIA, Nat. Ord. Compositae.

- 374-Half hardy perennial, to be treated as an annual. It produces bright, showy flowers, somewhat singular in appearance, the centers resembling acorns; succeeding well in good soil. Pulcherrima-Rich crimson and yellow; 18 inch. 5

OENOTHERA (Evening Primrose), Nat. Ord. Onagraceae.

- 375-Biennis hirsutissima-Crimson; half-hardy annual; two feet, 5
376-Bistorta Veitchii-Fine yellow, with red spot at base of each petal; half-hardy annual; one foot, - - - - 5
377-Cinnabarina-Fine rich orange and salmon; one foot, - - - - 5
378-Rosca, or coccinea-Fine dwarf, rose-colored variety, - - 10
379-Drummondii-Fine yellow; two feet, - - - - 5
380- " nana-Fine dwarf variety of the preceding, - - - - 10
381-Lamarckiana grandiflora-Is beyond doubt the finest and most showy of the class, though all are excellent; its blossoms of large yellow flowers, borne in heavy clusters, at once recommend it for superiority; three feet, - - - - 5
382-Acaulis alba-Flowers very large and beautiful-about four inches across and four or five inches in length; pure white-as transparent looking as the mother of pearl, producing one or more beautiful flowers every evening. Start plants in hot-bed or pot in the house, and transplant to 6 or 8 inches apart,- 10

OXYURA, Nat. Ord. Compositae.

- 383-Chrysanthemoides-A free blooming, showy, hardy annual, from California, growing from twelve to fifteen inches high; flowers golden yellow, edged with pure white. Thin to eighteen inches apart, - - - - 5

PALAFOXIA, Nat. Ord. Compositae.

- 384-Hookeriana-A fine, new, hardy annual, of branching habit; flowers rosy crimson, with a dark purple center; will continue in bloom a long time, - - - - 5

PALAVA, Nat. Ord. Malvaceae.

- 385-Flexuosa-Novelty from Bolivia; height about fifteen inches; branches freely; is clothed with neat and graceful foliage, and produces in the greatest abundance its charming flowers of bright rosy pink, with black eye. Flowers measure an inch in diameter, and are thrown well above the foliage. It is one of the most beautiful annuals known, and is really an acquisition. We speak from our own knowledge. It succeeds well in the open air, and is also well adapted for pot culture. Half-hardy. Transplant or thin to fifteen inches apart, - - - - 15

PANSY (Viola Tricolor), Nat. Ord. Violaceae.

- 386-Dark Blue-Constant, fine and desirable, - - - - 15
387-Sky Blue-Very constant and fine, - - - - 15
388-Pure Yellow-Constant and beautiful, - - - - 15
389-Yellow margined-Bordered with yellow; fine, - - - - 15
390-Bronze auricula-flowered-Bronze, margined with rose; new, 15
391-Pure White-Very constant and fine, - - - - 15
392-Red-Bright bronze or copper color, - - - - 15
393-Fancy Striped-Variiegated; colors new and fine, - - - 15
394-Violet-Bordered with white; fine, like fancy Geraniums, - 15
395-Faust, or King of Blacks-Deep coal-black color; constant, 15
395 1/2-Our mixture of the above. (See article on mixtures, p. 3), 15
396-Extra English mixed varieties-From named flowers. (See a file on mixtures), - - - - 20
397-Extra mixed German varieties-From named flowers, as imported, - - - - 10
398-Odier, or Five Blotched-Mixed colors; a new and beautiful strain, - - - - 20
399-Viola tricolor maxima, New Pansy, Queen of the Dwarfs-A lovely new strain of Pansies, unique in perfection as to size and form of flowers, as well as in beauty and variety of color, compactness and equal growth; of pretty habit and appearance. Novelty of 1873, - - - - 20
400-Viola tricolor maxima, robusta, new, compact-growing Pansy-This is represented as an improvement on the well known type. Each plant forms a compact bush, covered with exceedingly large flowers of various colors. Novelty of 1872, - - - - 20
401-Tricolor maxima (Emperor William)-The large-flowered Pansies receive here a very valuable addition, the distinguishing qualities of which are its brilliant color of splendid ultramarine blue, with well defined edge of purple violet, and the great consistency of its large blooms, borne well above the foliage. A great recommendation is its coming true from seed; this advantage, combined with the beautiful color, makes this novelty of exceeding utility for the edges of flower borders, &c., &c. Novelty of 1873, - - - - 25

- 402-Tricolor maxima, Great Eastern-Color pure white, with centers and broad margins of rich violet purple; flowers large, borne in great profusion; of vigorous habit. A novelty of 1873, - - - - 25

PERILLA, Nat. Ord. Labiate.

- 403-Nankinensis-A half-hardy annual, grown for its fine bronze foliage; useful for contrast in bedding, for which it is especially adapted. Deserves more than an ordinary share of attention. Leaves a purplish black or deep mulberry, 5

PETUNIA, Nat. Ord. Solanaceae.

- 404-Grandiflora venosa-Large-flowering; mixed colors, - - - 15
405- " reticulata-Finely veined, - - - - 20
406- " Kermesina splendens-Crimson, white throat, - - - 15
407- " marginata-Large flowers, green bordered, - - - 15
408- " striata-Finely striped, - - - - 20
409- " White, Carmine, Bright Deep Crimson, Dark Red, edged with Green; Large Striped, Deep Rose, Deep Lilac, Purple and Violet-all mixed, - - - - 10
410-Dunnett's New Hybrids-Striped and blotched; extra fine, - 15
411-Inimitable maculata-New; dark purple and crimson, blotched with white; magnificent, - - - - 15
412-Countess of Ellesmere-Deep rose, white throat; choice, - 10
413-Fine Fringed-Producing bright colors, beautifully fringed, 20
413 1/2-Our own mixture of the above varieties. (See article relating to mixtures, page 3), - - - - 10
414-Grandiflora, Double, Extra Large-flowered-Producing a good percentage of splendid double flowers, as large as Roses; perfectly magnificent, - - - - 50 seeds for 20

PHACELIA, Nat. Ord. Hydrophyllaceae.

- 415-Bipinnatifida, or congesta-Somewhat interesting and singular hardy annual, with fine, light blue flowers and full foliage. Height eight inches. Thin to a foot apart,- 5

PHLOX DRUMMONDI, Nat. Ord. Polemoniaceae.

- 416-Alba-Pure white, - - - - 10
417-Atrococcinea-Dark scarlet, - - - - 10
418-Atropurpurea-Dark purple, - - - - 10
419-Leopoldiana-Crimson and white,- - - - 10
420-Magenta-Very pretty, - - - - 10
421-Napoleon the Third-Dark crimson, - - - - 10
422-Oculata alba-White, with crimson eye, - - - - 10
423-Radowitzi-Deep rose, striped with white, - - - - 10
424- " Kermesina striata-Crimson and white, finely striped; new, - - - - 10
425-Victoria Regina-Purple, - - - - 10
426-Chamois Rose-Delicate rose; new, - - - - 10
427-Isabellina-Chamois yellow; new, - - - - 10
428-Large Blue-Fine, large purple flowers, with white eye, - 10
429-Rosea-Soft rose color; beautiful, - - - - 10
430- " alba oculata-Rose, with large white eye; very fine, 10
431-General Grant-Distinct variety; bright purple; novelty, - 10
432-Our own mixture of the above varieties. (See article on mixtures, page 3), - - - - 10
433-Violacea pura-Pure dark violet; very showy and constant; new, beautiful, - - - - 10
434-Heynholdi (Benary)-Novelty; new true scarlet. Plant and flowers small. Rich soil is required. Plants may stand six inches apart,- - - - 20
435-Heynholdi cardinalis-Sent out by E. BENARY, who describes it as of robust growth, with large, fresh dark green foliage, of compact habit, producing a profusion of brilliant flowers, rivaling the Geraniums, Verbenas, &c., - - - - 20

PLATYSTEMON, Nat. Ord. Ranunculaceae.

- 436-Californicus-A very pretty, hardy annual, with fragrant, yellow flowers; free bloomer; of dwarf and spreading habit; excellent for small beds, baskets or edgings; height one foot. Thin plants to a foot apart,- 5

PODOLEPIS, Nat. Ord. Compositae.

- 437-A class of pretty, free blooming annuals; graceful in habit; well adapted for beds or mixed borders; quite effective. Sow seed in a light, rich soil; thin plants to eight inches apart. Light Yellow, Pink, White, &c., mixed, - - - - 5

POPPY, Nat. Ord. Papaveraceae.

- 438-Double Scarlet-About two feet, - - - - 5
439- " Striped-About two feet, - - - - 5
440- " White-About two feet, - - - - 5
441-Above colors mixed. (See article on mixtures, page 3), - - 5
442-Double New Paony-Mixed colors; two feet,- - - - 5
443-Dwarf French-Eighteen inches, - - - - 5
444- " Scarlet-Twenty inches, - - - - 5
445-Carnation-Finest colors mixed; two feet, - - - - 5
446-Somniferum (Opium Poppy)-True; single; white, - oz. 15c. 5

PORTULACA, Nat. Ord. *Portulacaceae*.

	PKT. CTS.
447— <i>Alba striata</i> —White, striped with rose and red, - - - - -	5
448— <i>Aurea striata</i> —Light yellow, striped with gold, - - - - -	5
449— <i>Aurea vera</i> —Deep golden yellow, - - - - -	5
450— <i>Thellusoni</i> —Fine crimson, - - - - -	5
451— <i>Thorburni</i> —Deep orange, - - - - -	5
452— <i>Caryophylloides</i> —White and crimson, - - - - -	5
453— <i>Rosea</i> —Fine rose, - - - - -	5
454— <i>Splendens</i> —Rosy purple, - - - - -	5
455—All the above varieties mixed. (See article on mixtures), - - - - -	5

The following is a full and choice list of the **Rose-flowered Portulaca**. It is as perfectly double as the *Rose*, and generally constant. Nothing, in our opinion, excels in *splendor* a bed of Double Portulacas.

456— Finest Double Rose-flowered, alba —White, - - - - -	15
457—“ “ “ “ aurea —Straw-colored, - - - - -	15
458—“ “ “ “ splendens —Rosy purple, - - - - -	15
459—“ “ “ “ Thellusoni —Fine crimson, - - - - -	15
460—“ “ “ “ sulphurea —Sulphur color, - - - - -	15
461—“ “ “ “ Carnation —Striped, - - - - -	15
462—“ “ “ “ rosea —Fine rose, - - - - -	15
463—“ “ “ “ Lilac , - - - - -	15
464—“ “ “ “ Chamois —Rose striped, - - - - -	15
463½—“ “ “ “ Our own Mixture of above , - - - - -	15
465—“ “ “ “ The mixture, as imported , - - - - -	10

RICINUS (Castor Oil Bean), Nat. Ord. *Euphorbiaceae*.

466— <i>Africanus hybridus</i> —Rose colored hybrid; new, - - - - -	10
467— <i>Nanus macrocarpus</i> —Dwarf; new; two to three feet, - - - - -	10
468— <i>Brailiensis</i> —Rich spikes of green fruit, - - - - -	10
469— <i>Communis (Palma Christi, or Castor Oil Plant)</i> , per oz. 25c. - - - - -	5
470— <i>Purpurea major</i> —Purple; splendid, - - - - -	10
471— <i>Sanguineus</i> —Blood red stalks; one of the best; six feet, - - - - -	10
472— <i>Africanus albidus</i> —New; fruit white; stem and leaves silvery white, - - - - -	10
473— <i>Borboniensis arboreus</i> —A splendid new variety, with immense leaves, growing to the height of fifteen feet; quite tree-like in character, - - - - -	10
474— <i>Elegantissimus</i> —A red foliaged, bushy species, branching from the base, - - - - -	15
475— <i>Guyanensis</i> —New, producing fine rose-colored fruits; extra, - - - - -	10
476— <i>Philippinensis purpureus</i> —With red nerved leaves and red colored stem; fine; ten feet, - - - - -	15
476½—Mixed colors. (See article in relation to mixtures, page 3), - - - - -	10

RUBECKIA, Nat. Ord. *Compositae*.

477— <i>Amplexicaulis</i> —A fine, hardy annual; flowers large, striped with fine yellow and purple; very showy. Easy of cultivation. Height eighteen inches; thin to a foot apart, - - - - -	5
---	---

SALPIGLOSSIS, Nat. Ord. *Scrophulariaceae*.

478— <i>Atrococcinea</i> —Deep scarlet, finely spotted; new, - - - - -	10
479— <i>Atropurpurea</i> —Deep purple, - - - - -	10
480— <i>Azurea</i> —Sky blue, - - - - -	10
481— <i>Dark Violet</i> , - - - - -	10
482— <i>Sulphurea</i> —Sulphur yellow, - - - - -	10
483—Above mixed, finest selected. (See article on mixtures, p. 3), - - - - -	10
484— <i>Nana atropurpurea</i> , dwarf, purple; <i>nana cerulea</i> , dwarf, blue; <i>nana coccinea</i> , dwarf, scarlet; <i>nanasulphurea</i> , dwarf, sulphur yellow—all mixed, - - - - -	10

SALVIA.

See under head of "Flowering the Second Season."

SANVITALIA, Nat. Ord. *Compositae*.

485— <i>Procumbens flore-pleno</i> —A beautiful, hardy annual, of low, creeping habit, producing in great abundance double, bright yellow flowers. A single plant on fair soil will fully cover more than two feet in diameter. This charming plant will bloom throughout the summer. Height about eighteen inches; thin plants to one foot apart, - - - - -	10
--	----

SAPONARIA, Nat. Ord. *Caryophyllaceae*.

486— <i>Calabrica</i> —Rose-colored and pure white, mixed. Charming little plant, of spreading habit, and the longest blooming of all dwarf annuals, producing masses of minute cross or star-shaped white and rose-colored flowers. Unequaled for edgings and bedding. Sow as early as the ground will work mellow; thin to ten inches apart. Height six inch. - - - - -	5
---	---

SCABIOSA (Mourning Bride), Nat. Ord. *Dispaceae*.

487— <i>Atropurpurea</i> —Deep purple; two feet, - - - - -	5
488— <i>Dwarf Scarlet</i> —Fifteen inches, - - - - -	5
489—“ Carmine —Fifteen inches, - - - - -	5
490—“ candissima —Pure white; desirable; fifteen inches, - - - - -	5
491—All the Dwarf colors mixed, 15 inch. (See about mixtures), - - - - -	5
492—“ Tall “ two feet high, - - - - -	5
493— <i>Stellata</i> —Starry. Seed pods good to mix with Everlasting Flowers for winter ornaments; twenty inches, - - - - -	5
494— <i>Nana fl. pl.</i> —A new, double, dwarf, variegated; the flowers, which have all the beautiful varieties of colors of the Scabiosa, are quite double and beautiful; blooms till late in the fall; one foot, - - - - -	10

495— <i>Nana striata fl. pl.</i> , Newest Striped Double Dwarf Scabiosa , Large-flowered—A fine Carnation striped variety of this well liked class of plants. A striking novelty and extremely double. Novelty of 1872, - - - - -	10
--	----

SCHIZANTHUS, Nat. Ord. *Scrophulariaceae*.

496— <i>Grahami</i> —Orange and lilac; choice, - - - - -	5
497— <i>Oculatus atropurpureus</i> —A Novelty, highly recommended; rich crimson purple, with black eye, - - - - -	5
498— <i>Grandiflora oculatus</i> —Flowers of various colors, blue centered; choice; new variety, - - - - -	5
499— <i>Humilis</i> —Crimson and lilac, - - - - -	5
500— <i>Hectusus</i> —Deep rose, tipped with orange crimson, - - - - -	5
501—“ alba —White, with crimson tip; very choice, - - - - -	5
502— <i>Papilionaceus</i> —This is a new and very desirable variety, the flowers of which present the appearance of a group of beautiful butterflies, delicately spotted and laced with purple and yellow, shading to orange and crimson, - - - - -	5
503— Finest colors mixed , - - - - -	5

SENSITIVE PLANT (Mimosa), Nat. Ord. *Leguminosae*.

504— <i>Pudica</i> —A tender annual, grown as a curiosity, the leaves of which shrink and fall on being slightly touched—hence the name. It is important that the seed be started in heat. Succeeds best in pots and in warm borders. A large bed in one of our flower gardens, with the same exposure as other plants, did splendidly the last season, some of the plants spreading over a space of more than three feet in diameter. Visitors were much interested. Transplant to eighteen inches apart, - - - - -	5
--	---

SILENE (Catchfly), Nat. Ord. *Caryophyllaceae*.

505—Fine rose, lively pink, pink, white centered, mixed. One ft. - - - - -	5
506— <i>Pendula</i> —Red and white, mixed. Eight inches, - - - - -	5

SOLANUM (Ornamental Egg Plant), Nat. Ord. *Solanaceae*.

507— <i>White Egg</i> —White fruited; two feet, - - - - -	10
508— <i>Scarlet Egg</i> —Scarlet fruited; two feet, - - - - -	10
509— <i>Marginatum (cablense argenteum)</i> —Yellow fruited; three ft. - - - - -	10
510— <i>Texanum</i> —Scarlet fruit; fine waxy appearance; two feet, - - - - -	10
511— <i>Wetherill's hybrids</i> —Suitable for table decoration, bearing crimson orange-shaded berries in great profusion. Novelty of 1872. A beautiful plant for winter decorations, - - - - -	20
512— <i>Hybridum compactum</i> —Novelty of 1872. In this plant we have one of the best subjects for winter decoration that we are acquainted with; its habit is all that could be desired, forming neat bushes about fifteen inches in height, and being thickly covered with orange scarlet berries, about the size of cherries, making it very desirable for winter ornamentation. Christmas time it is appropriate in the highest degree, and will give more satisfaction than any plant we can think of. Its culture is simple: the seed should be sown early in April; transplant as soon as large enough—keep growing, not allowing the plant to suffer for want of water, and by the fall they will be covered with berries in abundance. After trying all the varieties of berry-bearing Solanums, we have come to the conclusion that this is by far the best variety in cultivation. Give it a trial, and no doubt you will be satisfied with the results, - - - - -	25

SPHENOGYNE, Nat. Ord. *Compositae*.

513—The following are beautiful, free-flowering, hardy plants, of spreading habit. Quite desirable for beds, mixed borders or edgings; easy of cultivation. Plants should stand about a foot apart. <i>Speciosa aurea</i> , golden yellow, and <i>sulphurea</i> , bright sulphur color—mixed. One foot, - - - - -	5
---	---

SPRAGUEA, Nat. Ord. *Portulacaceae*.

514— <i>Umbellata</i> —A plant of very singular habit of growth; very spreading, the flower stems naked, thick and fleshy, extending over the ground about eighteen inches either way from the center of the plant, bearing a cluster of small, pretty pink flowers at the end of each. Cannot be recommended as charming or graceful, nor for edgings; fine for rock-work. A new introduction. In height about four inches. Plants should stand a foot apart, - - - - -	20
--	----

STOCK, TEN-WEEKS (Mathiola annua), Nat. Ord. *Cruciferae*.

515— <i>German, Miniature Bouquet</i> —Fine for beds, edgings, &c.; height from six to eight inches; finest mixed, - - - - -	15
516—“ Dwarf —Fine dwarf; colors bright; free bloomer; mixed colors, - - - - -	10
517—“ Five different colors —In separate packets—White, Rose, Crimson, Scarlet and Dark Blue. In ordering separate colors, give the No. 516, 518 or 532, and name the color or colors desired; each, - - - - -	15
517½—“ Our own mixture of above separate colors . (See article relating to mixtures, page 3), - - - - -	15

ORNAMENTAL CLIMBING PLANTS.

CALAMPELIS, Nat. Ord. *Bignoniaceae*.

572—**Scabra**—Beautiful climbing plant; fine orange flowers; blossoms freely. The best success is obtained from strong plants set out late in May or early in June; and we therefore recommend the starting of them in hot-bed, - - 10

CARDIOSPERMUM, Nat. Ord. *Sapindaceae*.

573—**Halicacabum**—A half-hardy annual, called Love-in-a-Puff, or Balloon Vine, on account of its curious, inflated, singular appearance. Support is necessary for its full development, 10

COBÆA, Nat. Ord. *Polemoniaceae*.

574—**Scandens**—A very rapid growing and useful climbing plant, of fine foliage. Is well adapted for in-door use. Plants should be started in a hot-bed. We do not advise the sowing of seed in the open ground, as there is frequent disposition to rot; therefore, great care should be taken in sowing seed. It has purple, bell-shaped flowers, - - 10

CONVOLVULUS MAJOR (Morning Glory), Nat. Ord. *Convolvulaceae*.

575—Major, Blue, - - - - - 5
576— " Crimson, - - - - - 5
577— " Dark Purple, - - - - - 5
578— " Rose, - - - - - 5
579— " Striped, - - - - - 5
580— " White, - - - - - 5
581— " Michauxii—Fine striped, - - - - - 5
582— " incarnata—Bright red, - - - - - 5
583— " atrosanguinea—Dark red, - - - - - 5
584— " tricolor—New; three colors; fine, - - - - - 5
585— " All the above splendid colors mixed, - - - - - 5

☞ For Dwarf Morning Glory (*Convolvulus minor*), see page 9.

DOLICHOS (Hyacinth Bean), Nat. Ord. *Leguminosae*.

586—**Lablab** (Hyacinth Bean)—Fine climber; white, purple and black flowers, - - - - - 5
587— " " **albus nanus**—White; dwarf, - - - - - 5
588— **Spec. giganteus**—Strong grower, with purple flowers, - - 10
589— **Bicortortus**—Curious; seed pods turned into a double ring, - 10

GOURDS (Ornamental), Nat. Ord. *Cucurbitaceae*.

590—**Calabash**, or "Dipper Gourd"—Fruit like a dipper, - - - 5
591—**Hercules' Club**—Large fruit, shaped like a club, - - - 5
592—**Orange**—Known as Mock Orange, - - - - - 5
593—**Pear-shaped**—Green and yellow; finely striped - - - 5
594—**Smallest Lenon**—Very pretty, little yellow fruit, - - - 5
595—**Powder Horn**—Fruit resembling a powder horn, - - - 5
596—**Bottle**—Two colors mixed, - - - - - 5
597—**Striped Apple**—Yellow, finely striped, - - - - - 5
598—**Abroba viridifolia**—Handsome climber; finely cut, dark glossy foliage, and small scarlet fruit, - - - - - 10
599—**Bryonopsis erythrocarpa**—Extremely ornamental, with splendid scarlet fruit, edged with white, - - - - - 10
600—**Coccinea Indica**—Splendid climber; elegant foliage and fruit, - 10
601—**Cyclanthera explosans**—Curious Gourds; fruit exploding with a loud noise when ripe. **New and desirable**, - - - - - 10
602— " **pedata**—A desirable variety of the preceding, - - 10
603—**Momordica Balsamina**—Very handsome foliage, with orange and red fruit; beautiful, - - - - - 10
604—**Tricosanthes Colabrina**—True Serpent Gourd; fruit shaped like a serpent; novel and beautiful, - - - - - 10
605— " **cucumerina**—Cucumber-like fruit, - - - - - 10
606—**Cucumis dipsacus**—Nine feet; teasel-shaped yellow fruit, - 10
607— " **grossularia**—Gooseberry-like, small, green fruit, - 10

[Nos 593, 599, 600, 601, 602, 603, 604, 606 and 607 are, owing to their splendid foliage and interesting fruit, the most desirable for covering lattice work, &c., where elegant foliaged plants are required.]

IPOMÆA, Nat. Ord. *Convolvulaceae*.

608—**Hederacea atroviolacea**—Flowers dark violet and white; fine, 10
609— " **superba**—Fine leaves and large, sky blue flowers, edged with white, - - - - - 10
610— " **grandiflora alba**, large, white flowers; **grandiflora alba picta carminea**, silver marbled, flowers heart-shaped, white, dotted with brilliant carmine; and **grandiflora alba lilacina**, silver marbled, flowers white, spotted with clear lilac - - - - - 10
611— " **grandiflora atro-carminea intus alba**—*Silver marbled*, three lobed leaves, flowers dark carmine, with large, white throat, - - - - - 10
☞ The three last above varieties are **novelties**.
612—**Limbata elegantissima**—A splendid variety, with rich, blue flowers, and white margin, - - - - - 10
613—**Rubrocærulea**—Very fine, with large, sky-blue flowers, - - 10
614—**Leari**—Blue and violet; *magnificent*; one of the choicest, - 15

PKT. CTS.
Quamoclit (Cypress Vine)—One of the most beautiful of the climbers; foliage dark green, finely cut, and really elegant. Flowers small and attractive.

615— " " " **Scarlet**, - - - - - 10
616— " " " **White**, - - - - - 10
617— " " " **Rose**, - - - - - 10
618— " " " **Above three varieties mixed**—(See about mixtures, page 3), - - - - - 10

LOASA, Nat. Ord. *Loasaceae*.

619—**Aurantiaca**—Bright orange, - - - - - 10
620—**Herberti**—Scarlet; fine, - - - - - 5
621—**Tricolor**—Hardy annual; yellow shaded flower, - - - - 10

LOPHOSPERMUM, Nat. Ord. *Scrophulariaceae*.

622—A class of extremely handsome climbers, suitable for baskets, vases, rockwork, &c.; produce showy, fox-glove shaped flowers. Succeed best in a light, rich soil. To obtain strong plants, seeds should be sown in a frame. **Scandens**, pink, and **Hendersoni**, fine rose—**mixed**, - - 10

MAURANDYA, Nat. Ord. *Scrophulariaceae*.

623—**Barclayana**—Blue and white, - - - - - 10
624— " **purpurea grandiflora**—Fine dark blue; new, - - 10
625— " **Scarlet**—Very showy, - - - - - 10
626— " **Finest mixed**, - - - - - 10

PEAS, FLOWERING (Lathyrus), Nat. Ord. *Leguminosae*.

627—**Lord Anson's, Blue**—Fine, delicate flowers; two feet, - - 5
628— " **White**—Fine, delicate flowers; two feet, - - - 5
629—**Tangier, Scarlet**—Desirable; four feet, - - - - - 5
630— " **Painted Lady**—Finely striped; four feet, - - - - 5
631—**Sweet, Blue-edged**—Blue and pink; fine, lb. \$2.00; oz. 20c. 5
632— " **Painted Lady**—Rose and white, - lb. \$1.50; oz. 15c. 5
633— " **Scarlet**—Striped with white, - lb. \$1.50; oz. 15c. 5
634— " **Invincible**—Very fine new scarlet, - lb. \$2.00; oz. 20c. 10
635— " **Black**, - - - - - lb. \$2.00; oz. 20c. 10
636— " **White**, - - - - - lb. \$1.50; oz. 15c. 5
637— " **Purple**, - - - - - lb. \$1.50; oz. 15c. 5
638— " **Striped**, - - - - - lb. \$1.50; oz. 15c. 5
639— " **Scarlet**, - - - - - lb. \$1.50; oz. 15c. 5
640— " **Crown Prince of Prussia**—Beautiful novelty; color a bright blush; uniform throughout the flower, - - - 10
641— " **All colors mixed**—Choice, (See article on mixtures, page 3), - - - - - per lb. \$1.00; per oz. 10c. 5

PHASEOLUS (Running Flowering Beans), Nat. Ord. *Leguminosae*.

642—**Bicolor**—Scarlet and white, - - - - - 5
643—**Painted Lady**—A fine variety, - - - - - 5
644—**White Lady**, - - - - - 5

SCHYPHANTHUS, Nat. Ord. *Loasaceae*.

645—**Elegans**—An elegant, fine climbing plant, much like the *Loasa* in habit and appearance. Half-hardy perennial. Seed should be sown in frame, to afford plants a vigorous start before setting out. Very fine, with interesting yellow flowers, - - - - - 10

THUNBERGIA, Nat. Ord. *Acanthaceae*.

646—**Alata**—Fine; yellow, with dark eye, - - - - - 10
647— " **alba**—White, dark eye, - - - - - 10
648—**Bakeri**—Pure white; fine, - - - - - 10
649—**Sulphurea**—Light yellow, or sulphur color, - - - - - 10
650—**Finest mixed**, (See article on mixtures, page 3), - - - 10

TROPÆOLUM (Nasturtium), Nat. Ord. *Tropæolaceae*.

651—**Majus atropurpureum**—Fine; dark crimson, - - - - - 10
652— " **coccineum**—Bright scarlet, - - - - - 10
653— " **Dunnett's New Orange**, - - - - - 10
654— " **New Bronze**—Finely bronzed; choice, - - - - - 10
655— " **Finest colors mixed**, - - - - - 10
656—**Lobbianum, Brilliant**—Dark scarlet, - - - - - 10
657— " **Fire Fly**—Brilliant scarlet, - - - - - 10
658— " **Glory**—Fine scarlet, - - - - - 10
659— " **Monsieur Colmet**—Bright yellow, spotted with crimson; distinct and fine, - - - - - 15
660— " **Prince of Wales**—Splendid scarlet, - - - - - 10
661— " **Finest colors mixed**, - - - - - 10
662—**Peregrinum** "Canary Bird Flower"—A most elegant and popular climber; should be started in a frame; admirable in baskets, vases, green-houses, &c., - - - - - 10

TWEEDIA, Nat. Ord. *Asclepiadaceae*.

663—**Cærulea**—Fine, hardy climbing plant, with blue flowers. We recommend the sowing seed early, in frame or dwelling house, 10

EVERLASTING FLOWERS.

ACROCLINIUM, Nat. Ord. Composite.		PKT. CTS.	HELIPTERUM, Nat. Ord. Composite.		PKT. CTS.
664—	Roseum—Fine rose color,	5	691—	Anthemoides—Pure white; an elegant and profuse bloomer,	15
665—	Album—Pure white,	5	692—	Corymbiflora—Star-shaped white flowers,	15
666—	Both varieties mixed,	5	693—	Sanfordi—One of the very finest Everlastings in cultivation, with beautiful small yellow flowers; very desirable; new,	15
AMMOBIUM, Nat. Ord. Composite.			POLYCOLYMNA, Nat. Ord. Composite.		
667—	Alatum—A very serviceable, white Everlasting, growing about two feet high. Pretty for garden; choice for winter bouquets,	5	694—	Stuartii—Strong growing annuals, producing yellow and white flowers; serviceable for winter ornaments. Of easy culture. Height eighteen inches; yellow and white,	5
GOMPIHRENA (Globe Amaranth), Nat. Ord. Amaranaceae.			RHODANTHE, Nat. Ord. Composite.		
668—	Globosa alba—White,	5	695—	Atrosanguinea—New, beautiful; deep purple, violet center,	20
669—	aurea superba—Orange; large and fine,	5	696—	Maculata—Fine rosy purple; desirable,	10
670—	carnea—Flesh colored,	5	697—	alba—Silvery white flowers; new,	10
671—	rubra—Fine purple crimson,	5	698—	Manglesi—The old and splendid variety; more delicate than the others, and best suited for house culture,	10
672—	striata—White and red striped,	5	STATICE, Nat. Ord. Composite.		
673—	variegata—Colors variegated,	5	699—	Bonduella—Flowers yellow; desirable,	10
674—	All the above colors mixed,	5	700—	Incana hybrida (nana)—The best. Twelve varieties mixed,	10
GNAPHALIUM, Nat. Ord. Composite.			701—	Sinuata—Light orange and yellow flowers,	10
675—	Fetidum—Vigorous growing Everlasting; very useful for winter bouquets. Succeed well in any common garden soil; yellow; two feet,	10	702—	Spicata—This charming, early flowering Caucasian annual variety, continues in bloom a long period. The plant forms a spreading tuft of lively emerald green, from which arise a multitude of ear-like spikes of lovely, rosy pink flowers. Beautiful dwarf beds or edgings can be made with it; for pot culture it is exceedingly useful and pretty. Is especially valuable for winter bouquets,	20
HELICHRYSUM, Nat. Ord. Composite.			WAITZIA, Nat. Ord. Composite.		
676—	Monstrosum, Double White—Two feet,	10	703—	Alba purpurea—Purple and white; one foot,	20

731—	chinensis—Distinct and fine; new,	10	757—	Zea Japonica, fol. var. (Japanese Corn)—Foliage is evenly striped; in its early stage of growth tinted with rose. Not very desirable as a foliage plant and hardly worthy of cultivation,	10
732—	Diplachne fascicularis—Compact bunch of flowers; perennial,	10			
733—	Echinochloa colona—New, very fine leaves, spotted with red,	10			
734—	Eleusine coracana—Graceful and pretty,	10			
735—	oligostachya—Elegant and fine,	10			
736—	Mixed,	10			
737—	Elymus hystrix—A fine perennial variety,	10			

COMPARE OUR PRICES.—Those who have never purchased Seed of us will do well to **COMPARE OUR PRICES** with those in other Catalogues. Our superior facilities for growing and producing Seeds of the **BEST** quality enables us to put them at lower figures than they were ever offered at before (with perhaps an exception or two where there is a great scarcity) and in such cases our prices are lower than those of others; and we are determined to increase the general demand for Seeds by wiping out all "fancy" prices. Those who wish to compete with us will be compelled to come "right down to the ground floor" on prices. We will then have the satisfaction of knowing that customers are getting their Seeds at a fair price, while we confidently await the result of comparison as to quality.

Select Assortment of Choice Imported Flower Seeds—Flowering the Second Season—Herbaceous Biennials and Perennials.

ACANTHUS, Nat. Ord. *Acanthaceae*.

	PKT.	CTS.
758— <i>Mollis</i> —Purple and white; three feet, - - - - -	-	10
759— <i>Latifolius</i> —White; three feet, - - - - -	-	10

	PKT.	CTS.
933— <i>Nierembergia frutescens</i> —Lilac and white; an elegant, free blooming plant; superior for bedding, baskets, &c.; fine, new novelty,	25	
934— <i>Smilax (Myrsiphyllum asparagoides)</i> —An elegant twiner, with glossy green leaves; much used in floral decorations, and by ladies in dressing their heads for festive occasions,	25	
935— <i>Solanum, Weatherill's hybrids</i> —Suitable for table decoration, bearing crimson orange-shaded berries in great profusion. Novelty of 1872,	25	
936— “ <i>hybridum compactum</i> —Produces large orange-scarlet berries in abundance; superior for house and green-house winter decoration. We recommend it as the <i>finest</i> of all the <i>Solanums</i> . May be used as a substitute for <i>Holly Berries</i> , in Christmas church decorations, &c.,	40	
937— <i>Swainsonia, alba violacea, atro-carminea, Osborni-grandiflora, and rosea</i> —mixed. A highly ornamental shrub. Soak seed in warm water before sowing,	50	
938— <i>Tacsonia Van Vloexemi</i> —A splendid climbing plant, flowering abundantly nearly the entire season. Flowers about five inches in diameter; of the richest crimson and scarlet. To advance germination, the outer skin of the seed should be cut before sowing,	50	

SUMMER-FLOWERING BULB DEPARTMENT.

When *Bulbs and Seeds are ordered together, and the weather is cold and severe, it would be unsafe then to forward the Bulbs. The Seeds, in such cases, will be promptly forwarded, and the Bulbs will follow as soon as it is safe to send them.*  ALL BULBS WILL BE SENT FREE BY MAIL.

GLADIOLUS.

Lady Paxton —Red, tipped with white.
Lady Jane Ellis —Creamy-white, tipped with purple.
Lady of the Lake —Blush, edged with purple; large flowers.
Lord Dundreary —Yellow, tipped with brown.
Lord Lyon —Violet; large, finest flower; constant.
Memorandum —White, tipped with rose; constant, fine.
Mr. Dix —Bright crimson scarlet; extra.
Mr. Wilds —White, tipped with rosy purple.
Mrs. Burgess —Bluish purple.
Mrs. Dodds —White, tipped with purple.
Mrs. Eckford —Large, fine blush; very distinct.
Mrs. Edwards —Rosy lilac.
Mrs. Hogg —Clear rose; extra fine; constant.
Mrs. Miller —Sulphur, tipped with rose.
Mrs. Pigott —Pure white; fine form.
Mrs. Turner —White, heavily laced with purple.
Netty Buckle —Blush, tinted with pink.
Nora Crena —Scarlet buff, tipped with white.
Novelty —Salmon, edged with buff.
Oblata —Pure white.
Gliver Twist —Purple, white striped.
Paradise Williams —Deep scarlet; extra fine.
Paul of Paisley —Lilac; high, deep center.
Peri —Color light, suffused with pink.
Pluto —Very dark purple, edged with white.
Pretender —White, edged with lilac; fine.
Princess —White, large; full; fine form.
Princess Alice —White, edged and striped with purple.
Purity —Pure white; excellent.
Queen of Beauties —Straw, striped with purple.
Queen Mab —Red, tipped with white.
Queen of Whites —Splendid white; extra.
Rainbow —Red, shaded with lilac.
Rose Queen —Rosy purple.
Round-head —Bronze; superb.
Royal Purple —Rich deep purple.
Royalty —Golden yellow; deep center.
Salamander —Striped; large, good.
Sappho —Golden purple, tipped deep purple.
Snowdrop —Pure white.
Snowdrift —Large; pure white.
Snowflake —Pure white; fine bloomer.
Snowball —Pure snowy-white.
Star of Meedling —Golden yellow.
Summertide —Crimson, striped and tipped.
Triumph de Roubaix —Rosy amber, tipped with white.
Vesuvius —Intense bright scarlet; free bloomer.
Virgo Maria —White.
Woman in White —Pure white; good.
Yellow Beauty —Extra fine yellow.
Yellow Boy —Golden yellow; fine form.
Yellow Standard —Pure yellow; deep, fine form; excellent.

POMPONE DAHLIAS.

Price, 30 cts each; \$3.00 per doz.

Ardens —Bright scarlet.
Blushing Bride —Blush white, shaded with rose; lovely.
Burning Coal —Deep yellow, edged with scarlet.
Child of Faith —Creamy-white; free bloomer.
Coronet —Blush white, lilac tinted.
Fairy Child —Rich crimson, margined with white.
Figaro —Buff, edged with crimson; extra fine.
Fire-ball —Deep, brilliant scarlet.
Gaiety —Blush white, tipped with purple.
Gem of Lilliputs —Dark scarlet; beautiful.
Goldfinch —Beautiful, soft yellow.
Little Dear —Blush white, tipped with violet.
" Gold-light —Yellow, tipped with scarlet.
" Kate —Deep purple; fine form.
" Nymph —Pure white, shaded with rose.
" Pet —Delicate blush, tinted with fawn.
" Wonder —Crimson; fine form.
Rose of Gold —Orange red.
Seraph —Buff yellow, tipped with red.
Sunset —Golden yellow, tipped with buff.
The Pet —Dark maroon, tipped with white.
White Bedder —White; extra fine; beautiful.

ANEMONES.

Anemone Japonica —Rosy-red flowers; two feet, 25c. each; \$2.50 doz.	
" alba (Honoring Jobert) —Large flowers of pure white, 25c. " 2.50 "	

TRITOMA UVARIA.

Price—Each, 25 cents; per dozen, \$3.50.

White Round or Oval Seeded Wax or Butter—A new variety imported from Germany, for the first time, spring of 1871. Pods WAXY YELLOW, RICH, TENDER and STRINGLESS—similar to the *Flat White Seeded Wax*, much more desirable than the *Black Seeded Wax or Butter Bean*. It is very prolific, and a most excellent Snap Bean; pt. 40c.; $\frac{1}{4}$ pt. 20c., - - - - - 10
White Marrowfat—Very good snap beans; excellent shelled, green or dry; fine for baking; beans large, white and nearly round; pt. 25c.; $\frac{1}{4}$ pt. 15c., - - - - - 10

BEANS, Running or Pole.

Concord—A cross between the White Cranberry and Horticultural, and has the excellent character of the two; very desirable; pt. 35c.; $\frac{1}{4}$ pt. 20c., - - - - - 10
Speckled Cranberry, or Horticultural—Productive; fine for SNAP BEANS or SHELLS; pt. 30c.; $\frac{1}{4}$ pt. 15c., - - - - - 10
Giant, or Wax—PODS WAXY YELLOW, tender and good as a SNAP BEAN, but not so desirable as the Dwarf Wax or Butter Beans. Beans red when ripe; pt. 70c.; $\frac{1}{4}$ pt. 40c., - - - - - 20
Large White Lima—None equal this as a SHELLED BEAN; very rich and finely flavored; pt. 35c.; $\frac{1}{4}$ pt. 20c., - - - - - 10

BEEF.

Dark Red Egyptian Turnip—New and excellent sort, from EGYPT; in form like the Dutch Early Turnip. Good form; early, very dark, and of fine flavor; lb. \$2.50; $\frac{1}{4}$ lb. \$1.25; $\frac{1}{4}$ lb. 65c.; $\frac{1}{4}$ lb. 30c.; oz. 20c., - - - - - 10
Dark Black Red Erfurt, finest Long—Imported. New here, and for the fourth time offered. This is, no doubt, a very tender, long and very dark blood beet, - - - - - oz. 20c. 10
Round Early Red Blood—A fine French, tender variety of Turnip Beet; lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 30c.; oz. 20c., - - - - - 10
Dewing's Improved Blood Turnip—A very early, tender and delicate Turnip Beet, of fine form and smooth skin; very desirable for either family use or the market gardener. Regarded as earlier but not so solid as the common Early Blood Turnip Beet; lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 30.; $\frac{1}{4}$ lb. 20c.; oz. 15c., - - - - - 10
Crapaudine, or Bark—An excellent French sort, remarkable for its shagreened and somewhat scaly bark that covers its skin; flesh intense red, very sweet, fine flavor, tender and delicate; lb. \$3.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 30c.; oz. 15c., - - - - - 10
Extra Early Bassano—Flatfish, good size; flesh white, circled with bright pink; sugary and well flavored. Fine for summer or winter; lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{4}$ lb. 15c.; oz. 10c., - - - - - 5
Early Blood Turnip—Favorite; flesh deep blood red; fine; - lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{4}$ lb. 15c.; oz. 10c., - - - - - 5
Round Yellow Turnip—Similar in shape to the Blood Turnip; roots yellow and sweet; lb. \$1.50; $\frac{1}{4}$ lb. 75c.; $\frac{1}{4}$ lb. 40c.; $\frac{1}{4}$ lb. 25c.; oz. 15c., - - - - - 10
Henderson's Dwarf Pine Apple—Medium size; flesh deep blood red, fine grained, sweet, tender, excellent; lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 30c.; oz. 20c., - - - - - 1
Extra Long Dark Blood—Best winter; smooth tender, sweet; lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{4}$ lb. 15c.; oz. 10c., - - - - - 5
Carter's St. Osyth—New English variety; deep red; lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 30c.; oz. 20c., - - - - - 10
Carter's Perfection Salad—Small sized, short top variety; of delicate texture and sweet flavor; even growth and dark foliage; the best variety for salad purposes, - - - - - oz. 25c. 10
Beck's Improved Sea Kail—Exclusively for greens; stems cooked as Asparagus, to which many think it superior, and leaves as Spinach. May be cut frequently. We recommend it as an excellent and desirable vegetable. It is grown with very little trouble. Cultivation the same as for the common beet; lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 30c.; oz. 15c., - - - - - 10
Imperial Sugar—Very sweet; contains a larger per centage of sugar than any other; lb. 75c.; $\frac{1}{4}$ lb. 40c.; $\frac{1}{4}$ lb. 20c.; $\frac{1}{4}$ lb. 15c.; oz. 10c. 5
Swiss Chard, or Large Ribbed White Silver—This variety of Beet is also cultivated for its leaf stalks, which are cooked and served up in the same manner as Asparagus. The young leaves are used for greens as Spinach. It is a tender and delicious vegetable. Cultivation the same as for Beck's Sea Kail Beet; lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 30c.; $\frac{1}{4}$ lb. 20c.; oz. 15c., - - - - - 10
Swiss Chard, or Large Ribbed Yellow Silver—This is comparatively a new variety of the Swiss Chard, and is highly recommended. It is grown for the same purpose as the White Silver, and the cultivation is the same; lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 30c.; $\frac{1}{4}$ lb. 20c.; oz. 15c., - - - - - 10
White French Sugar—Use the same as Yellow Sugar; lb. 75c.; $\frac{1}{4}$ lb. 40c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{4}$ lb. 15c.; oz. 10c., - - - - - 5
Yellow French Sugar—For cattle; good for table when young; lb. 75c.; $\frac{1}{4}$ lb. 40c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{4}$ lb. 15c.; oz. 10c., - - - - - 5
Mangel Wurtzel, Long Red—For cattle; yields largely; lb. 75c.; $\frac{1}{4}$ lb. 40c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{4}$ lb. 15c.; oz. 10c., - - - - - 5
 " " **Long Yellow**—For cattle; lb. 75c.; $\frac{1}{4}$ lb. 40c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{4}$ lb. 15c.; oz. 10c., - - - - - 5
 " " **Carter's Improved Orange Globe**—Cattle; lb. 80c.; $\frac{1}{4}$ lb. 40c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{4}$ lb. 15c.; oz. 10c. 5
Carter's Improved Mammoth Long Red Mangel—Long, large, fine, smooth-rooted; lb. 80c.; $\frac{1}{4}$ lb. 40c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{4}$ lb. 15c.; oz. 10c. 5
 " " **Olive-shaped Yellow**—For cattle; lb. 75c.; $\frac{1}{4}$ lb. 40c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{4}$ lb. 15c.; oz. 10c., - - - - - 5
 " " **Briggs' Premium Long Red**—Extra fine, long scarlet; new. We have no hesitation in pronouncing this the best Long Red Mangel Wurtzel extant. Very large; grows well out of the ground; small top; lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{4}$ lb. 15c.; oz. 10c., - - - - - 5

BROCOLI.

PAP. CTS.

Carter's Summer—An excellent and early summer variety, - oz. 60c.; $\frac{1}{4}$ oz. 30c., - - - - - 10
Early Purple Cape—Popular sort; heads well, and is very hardy; oz. 50c.; $\frac{1}{4}$ oz. 25c., - - - - - 10
Southampton—A large, fine, white and hardy variety; oz. 40c.; $\frac{1}{4}$ oz. 20c., - - - - - 5

BRUSSELS SPROUTS.

Brussels Sprouts—Of the Cabbage family, producing numerous small heads upon the side of the stem, as well as a cabbage-like head at the top. The small heads are very tender and of fine flavor, in the fall after frosts. May be stored in the cellar for winter. Use the same as Cabbage. Cultivation same as for winter cabbage, - lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 30c.; oz. 15c., - - - - - 5

CABBAGE.

Little Pixie, or Tom Thumb—Earliest variety; heads small, nearly round; excellent, - lb. \$2.25; $\frac{1}{4}$ lb. \$1.15; $\frac{1}{4}$ lb. 60c.; $\frac{1}{4}$ lb. 35c.; oz. 20c., - - - - - 10
Early Wakefield, Imported—Grown from the True Jersey; popular with market gardeners; early, and sure header; lb. \$4.00; $\frac{1}{4}$ lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 50c.; oz. 25c.; $\frac{1}{4}$ oz. 15c., - - - - - 10
Early Wakefield, True Jersey (American seed)—This is the variety which is so very popular with the New York market gardeners; very early, and sure to head; lb. \$3.00; $\frac{1}{4}$ lb. \$3.00; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{4}$ lb. 75c.; oz. 50c.; $\frac{1}{4}$ oz. 30c., - - - - - 10
Early Wyman—A new, early variety, and spoken of by the market gardeners in the neighborhood of Boston as being one of the best and most profitable early market cabbages grown. Very early, large size, and of finest quality, - oz. \$1.00; $\frac{1}{4}$ oz. 50c. 20
Wheeler's Imperial—A little later than Early York; about the same as Wakefield; heads larger than either, cone shaped, and very hard; sure to head; excellent and early; lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 60c.; $\frac{1}{4}$ lb. 35c.; oz. 20c., - - - - - 10
Early York—Old and popular, one of the earliest and best, - lb. \$1.75; $\frac{1}{4}$ lb. 90c.; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; oz. 15c., - - - - - 5
Large Early York—Similar to Early York, but a little later and larger; summer and fall, - lb. \$1.75; $\frac{1}{4}$ lb. 90c.; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; oz. 15c., - - - - - 5
Kemp's Incomparable—Represented by the English growers as being as early, or even earlier than Early York; heads cone-shaped, close, hard, and as large as Winningstadt, and of fine quality; sure to head. No doubt a most desirable, early variety; lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 30c.; oz. 20c., - - - - - 10
Carter's Superfine Early Dwarf—Represented as being as early as the Little Pixie; heads small, compact and of fine flavor and quality, - lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 30c.; oz. 20c. 10
Fearnought—Claimed by English growers to be as early as Early York; heads larger, solid and excellent. Desirable for family or market; lb. \$3.00; $\frac{1}{4}$ lb. 1.50; $\frac{1}{4}$ lb. 75c.; $\frac{1}{4}$ lb. 40c.; oz. 25c. 10
Burnell's King of the Dwarfs—Claimed by Mr. BURNELL to be the earliest cabbage grown, but represented by others as identical with Carter's Superfine Early Dwarf; lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 30c.; oz. 20c., - - - - - 10
Early Winningstadt—Imported; heads cone-shaped, good size and solid; very fine for summer, fall or winter; lb. \$2.50; $\frac{1}{4}$ lb. \$1.25; $\frac{1}{4}$ lb. 65c.; $\frac{1}{4}$ lb. 35c.; oz. 20c., - - - - - 10
Early Winningstadt, fine American—Choice, - lb. \$3.00; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{4}$ lb. 75c.; $\frac{1}{4}$ lb. 40c.; oz. 25c.; $\frac{1}{4}$ oz. 15c., - - - - - 10
Early Sugarloaf—Cone-shaped and desirable variety, - lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 50c.; $\frac{1}{4}$ lb. 30c.; oz. 20c., - - - - - 5
Enfield Market—Very early; heads large and solid, - lb. \$2.25; $\frac{1}{4}$ lb. \$1.15; $\frac{1}{4}$ lb. 60c.; $\frac{1}{4}$ lb. 35c.; oz. 20c., - - - - - 5
Large French Oxheart—Very popular market sort; heads firm, close; later than Early York lb. \$2.50; $\frac{1}{4}$ lb. \$1.25; $\frac{1}{4}$ lb. 65c.; $\frac{1}{4}$ lb. 35c.; oz. 20c., - - - - - 5
Imperial Oxheart—Quite as early as Large York; heads larger, cone or heart-shaped; firm, close, tender, and of excellent flavor; superior to the Large French; produces less large leaves; lb. \$3.00; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{4}$ lb. 75c.; $\frac{1}{4}$ lb. 40c.; oz. 25c., - - - - - 10
Large Early Schweinfurth—Largest heading early variety in cultivation; heads tender and excellent; fine for summer and fall use; a favorite wherever it has been introduced. The German growers offer two qualities of seed of this variety; ours is the selected—best, - lb. \$3.00; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. \$2.00; $\frac{1}{4}$ lb. \$1.25; oz. 60c.; $\frac{1}{4}$ oz. 35c., - - - - - 20
Fottler's Improved Brunswick—An excellent second early variety of Drumhead Cabbage, coming in just after Early Wyman. It is much used by the Boston market gardeners. On good soil every plant produces a good, firm, solid head, of excellent quality, often weighing from twenty to thirty pounds, - lb. \$4.00; $\frac{1}{4}$ lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 60c.; oz. 35c.; $\frac{1}{4}$ oz. 20c., - - - - - 10
St. John's Bay Early Drumhead—A distinct, fine, large heading, early variety; nearly as early as Winningstadt; head round, compact, and of a dark green color. Excellent for summer, fall and winter use, - lb. \$4.00; $\frac{1}{4}$ lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{4}$ lb. 60c.; oz. 35c.; $\frac{1}{4}$ oz. 20c., - - - - - 10
Filderkraut—A variety lately introduced from Germany, where it is very popular; heads cone-shaped, quite pointed, large, solid and of good quality; very desirable for fall or winter use; lb. \$3.00; $\frac{1}{4}$ lb. \$1.50; $\frac{1}{4}$ lb. 75c.; $\frac{1}{4}$ lb. 40c.; oz. 25c., - - - - - 10
Early Blood Red—A fine, early variety, and also excellent for winter; good for pickling. For winter use, sow seed about middle of May, - lb. \$2.50; $\frac{1}{4}$ lb. \$1.25; $\frac{1}{4}$ lb. 65c.; $\frac{1}{4}$ lb. 35c.; oz. 20c. 5
Flat Brunswick Drumhead—Fine, large, late winter sort; lb. \$3.50; $\frac{1}{4}$ lb. \$1.75; $\frac{1}{4}$ lb. 90c.; $\frac{1}{4}$ lb. 50c.; oz. 30c., - - - - - 10

Fine Large Red Dutch—An old favorite; heads large, roundish and solid; excellent for salad and pickling for winter use; lb. \$2.00; ½ lb. \$1.00; ¼ lb. 50c.; ½ oz. 20c. PAP. CTS. 5

Chappell's Blood Red Pickling—Heads are large, round and close; deep red; fine for salad and pickling, lb. \$3.50; ½ lb. \$1.75; ¼ lb. 90c.; ½ oz. 30c. 10

Erfurt Large White—Heads flattish, large, compact, tender and excellent; a new variety, - lb. \$4.00; ½ lb. \$2.00; ¼ lb. \$1.00; ½ oz. 35c.; ¼ oz. 20c. 10

Large Late Flat Dutch—Imported; good fall and winter; lb. \$2.00; ½ lb. \$1.00; ¼ lb. 50c.; ½ oz. 20c. 5

Premium Flat Dutch, fine American—A superior variety for fall and winter use; heads large, bluish, green, solid, flattish, crisp, tender, and of excellent flavor. On rich ground, during a fair season, with good culture, all the plants not crippled in the growing or transplanting, will make large, solid, marketable heads, of uniform size and shape; keeps well; lb. \$4.00; ½ lb. \$2.00; ¼ lb. \$1.00; ½ lb. 60c.; ¼ lb. 30c.; ½ oz. 20c. 10

Mason's Premium Drumhead—Imported, fine winter sort, - lb. \$2.00; ½ lb. \$1.00; ¼ lb. 60c.; ½ oz. 20c. 5

Large Late Drumhead, fine American—Excellent fall and winter variety; heads large, round, somewhat flattened, compact, and of a lightish color; lb. \$4.00; ½ lb. \$2.00; ¼ lb. \$1.00; ½ lb. 60c.; ¼ oz. 30c.; ½ oz. 20c. 10

Stone Mason Marblehead—Very reliable, compact heading, fall and winter sort; of good size and fine quality; extensively grown in vicinity of Boston; lb. \$4.00; ½ lb. \$2.00; ¼ lb. \$1.00; ½ lb. 60c.; ¼ oz. 35c.; ½ oz. 20c. 10

Mammoth Marblehead—A variety noted for its enormous size and fine quality. Mr. ALLEY, the originator of this Cabbage, has grown them measuring six feet around the solid head. With good cultivation, on very rich ground, and during a favorable season, average weight twenty-five to thirty pounds; lb. \$8.00; ½ lb. \$4.00; ¼ lb. \$2.00; ½ lb. \$1.00; ½ oz. 30c.; ¼ oz. 35c. 10

Robinson's Champion Ox—A cattle variety; grows to a large size, and of fair quality; lb. \$2.00; ½ lb. \$1.00; ¼ lb. 60c.; ½ lb. 35c.; ½ oz. 20c. 5

Early Dwarf Elm Savoy—Little later than Large York; leaves wrinkled, of a fine, deep green color; heads small, round, solid, tender and of fine flavor; lb. \$2.50; ½ lb. \$1.25; ¼ lb. 70c.; ½ lb. 40c.; ½ oz. 25c. 10

Dwarf Green-leaved Savoy—Leaves wrinkled, dark green; heads round, of medium size, loose, tender, rich; agreeable flavor; excellent for cooking; lb. \$2.00; ½ lb. \$1.00; ¼ lb. 50c.; ½ lb. 30c.; ½ oz. 20c. 5

Drumhead Savoy, Winter variety—Leaves wrinkled, dark green; heads large, flattish, compact, tender, rich and of fine flavor; excellent for cooking; lb. \$2.00; ½ lb. \$1.00; ¼ lb. 50c.; ½ lb. 30c.; ½ oz. 20c. 5

Le Mans Wonder (A. Chevallier Le Mans)—This is a new kind of Cabbage, sent out last season for the first time, by A. CHEVALLIER, of Le Mans, France; said to be a mammoth variety of excellent quality. The representations made in regard to it, are to us incredulous, and we will therefore, not repeat them. The most moderate foreign description of it is as follows: "A splendid, huge head, well shaped, extremely close, of an exquisite quality; highly valuable in every respect." It is worthy a trial. 25

CAULIFLOWER.

Erfurt Earliest Dwarf—The earliest variety grown for forcing, - oz. \$2.00; ½ oz. \$1.00 20

Erfurt Large Early White—Early, large, - oz. \$2.00; ½ oz. \$1.00 20

Imperial, New—Large, early French variety; highly recommended, - oz. \$2.00; ½ oz. \$1.00 25

Veitch's Autumn Giant—"The heads of this new superior variety, are magnificent—beautifully white, large, firm and compact, and being thoroughly protected by the foliage, remain longer fit for use than any other sort. It was awarded a First Class Certificate by the Royal Horticultural Society."—*Gardener's Chronicle, London, England.* Our own experience with this variety is, that it is a vigorous grower, heads very large and superior in quality. Plants, however, must be put out early, or they will not fully head before the ground will freeze, - oz. \$2.00; ½ oz. \$1.50. 20

Early Paris—Large, fine heads; very popular; oz. \$1.50; ½ oz. 80c. 20

Extra Early Paris—For forcing; very early; solid head; oz. \$2.00; ½ oz. \$1.00. 25

Frogmore Forcing—A short stemmed, fine and early variety; oz. \$1.50; ½ oz. 75c. 20

Early Walcheren—Heads large, white, firm and close; oz. \$1.00; ½ oz. 50c. 10

Early London—Fine, white and compact head; hardy; oz. \$1.00; ½ oz. 50c. 10

Stadtholder—A strong growing, German variety; solid; oz. \$1.00; ½ oz. 50c. 10

Large Asiatic—Intermediate; large, white, solid; oz. \$1.00; ½ oz. 50c. 10

Carter's Dwarf Mammoth—Very early; hardy; dwarf, compact head, - oz. \$1.00; ½ oz. 50c. 10

Italian New Early Giant—A few seeds of this variety were sent us for testing, the season of 1872. We grew about one hundred and fifty heads by the side of several other choice varieties, giving each an equal chance. Those who saw the exhibition, readily selected this as the best of all. There are several kinds earlier; this, however, is not late. This variety did equally well the present season. It is a thrifty and uniform grower. Not one plant missed making a fine, large, close, white head. It produces sufficient leaves, which grow in such manner as to nicely protect the heads from the sun. The heads cook tender and are of fine flavor, - oz. \$3.00; ½ oz. \$1.50 50

Le Normand—Hardy, heads large, solid; fine; oz. \$2.00; ½ oz. \$1.00 20

" **Short Stemmed, New**—Extra large; delicate and choice, - oz. \$2.00; ½ oz. \$1.00 20

CARROT.

Early Very Short, Scarlet French Horn Forcing—For early use; early and of fine flavor, - lb. \$1.50; ½ lb. 75c.; ¼ lb. 40c.; ½ lb. 25c.; ½ oz. 15c. 10

Early French Scarlet Short Horn—Excellent for table, and grown by many for stock, as it is regarded as a large yielder and of rich quality; lb. \$1.00; ½ lb. 50c.; ¼ lb. 30c.; ½ lb. 20c.; ½ oz. 15c. 5

Early Red Half Long—Very sweet variety; highly recommended for table or cattle; lb. \$1.00; ½ lb. 50c.; ¼ lb. 30c.; ½ lb. 20c.; ½ oz. 15c. 5

Long Orange—A standard field variety; most desirable for stock and good for table; lb. \$1.00; ½ lb. 50c.; ¼ lb. 30c.; ½ lb. 20c.; ½ oz. 15c. 5

James' Intermediate—Fine yellow; English field carrot; much grown for stock; lb. \$1.50; ½ lb. 75c.; ¼ lb. 40c.; ½ lb. 25c.; ½ oz. 15c. 5

Long Surrev—Long-rooted, deep orange sort; much grown in England for stock; good for table; lb. \$1.50; ½ lb. 75c.; ¼ lb. 40c.; ½ lb. 25c.; ½ oz. 15c. 5

Long Red Altringham—A fine variety for the table or stock; lb. \$1.00; ½ lb. 50c.; ¼ lb. 30c.; ½ lb. 20c.; ½ oz. 15c. 5

Large Orange Belgian Green Top—A very productive field carrot; grows somewhat out of the ground, which makes it an easier job to pull a crop; lb. \$1.00; ½ lb. 50c.; ¼ lb. 30c.; ½ lb. 20c.; ½ oz. 15c. 5

Large White Belgian Green Top—This is also a very productive and desirable field variety; grows about one third out of the ground, and is easily gathered; lb. \$1.00; ½ lb. 50c.; ¼ lb. 30c.; ½ lb. 20c.; ½ oz. 15c. 5

CELERY.

Turner's Incomparable Dwarf White—Very stiff, close habit; solid, crisp, juicy, and of fine flavor; keeps well; highly recommended; oz. 25c.; ½ oz. 15c. 5

Carter's Incomparable Dwarf Dark Crimson—Same quality as preceding; fine crimson, - oz. 30c.; ½ oz. 15c. 10

Cole's Crystal New White—Dwarf habit; solid; crisp; good flavor; oz. 25c.; ½ oz. 15c. 5

Haywood's Dwarf White Queen—A new sort; heads short, solid, crisp, and of fine flavor; comes to us from England endorsed as the best variety grown; oz. 30c.; ½ oz. 15c. 10

Brighton Hero, new—Pinkish color; recommended as being fine; oz. 25c.; ½ oz. 15c. 10

Seymour's Superior White Solid—Fine, large size; of vigorous growth, - oz. 25c.; ½ oz. 15c. 5

Lion's Paw—Broad, short stemmed, flat stalk; white and crisp; oz. 25c.; ½ oz. 15c. 5

Goodwin's White—Solid and crisp; very fine; oz. 25c.; ½ oz. 15c. 5

Sealey's Leviathan—Very large, solid and white; superior; recommended, - oz. 25c.; ½ oz. 15c. 5

Manchester Champion Red—Same in size and shape as Sealey's Leviathan, differing materially only in color; oz. 30c.; ½ oz. 15c. 5

Laing's Mammoth Red—Very large and solid; fine flavor; oz. 25c.; ½ oz. 15c. 5

Boston Market—Medium size; solid, tender and crisp; Boston favorite, - oz. 40c.; ½ oz. 25c. 10

Ivory's Nonsuch—An excellent, new, red variety; oz. 25c.; ½ oz. 15c. 5

Sandringham Dwarf White, or Prince of Wales—A very choice and new variety; very dwarf and solid, - oz. 40c.; ½ oz. 25c. 10

Turnip Rooted (Celeriac)—Roots used for flavoring soups; oz. 25c. 5

" " **Erfurt Best**—Superior for soups; oz. 40c.; ½ oz. 25c. 10

Seed for Soups—Per lb. \$1.00; oz. 10c. 10

CHICORY.

Long Red Magdeburg—Best substitute for coffee; best sort; lb. \$1.00; ½ lb. 60c.; ¼ lb. 35c.; ½ lb. 20c.; oz. 10c. 5

 For Large Curled, or Ruffle-leaved, and other varieties of *Chicorium Endivio*, see Endive.

SWEET CORN.

Early Market—The earliest variety with which we are acquainted; eight rowed; ears smallish, kernels large; quality good; pint, 25c.; ½ pint, 15c. 10

Briggs' Large Early Sweet—The earliest and largest eared early Sweet Corn grown—proved to be such by actual test made by ourselves with several of the most popular sorts; fills out well at the tips; varies in color, some being of a pink tinge; quality excellent; eight rowed, - pint, 40c.; ½ pint, 20c. 10

Early Minnesota—A very early and excellent Sweet Corn. During a fair season will mature sufficiently for boiling in less than two months; ears large; very uniform in size; eight rowed; pint, 25c.; ½ pint, 15c. 10

Russell's Prolific Early Sweet—About one week later than the Minnesota; is larger, very productive, and of superior quality. A fine variety for market gardeners, as well as for private gardens generally; twelve rowed, - pint, 25c.; ½ pint, 15c. 10

Early Eight Rowed Sweet—Fit for use about the same time as Russell's Prolific, or perhaps a little earlier. Is an excellent variety, - pint, 25c. 10

Crosby's Early Twelve Rowed Sweet—This variety is a few days earlier than Stowell's Evergreen, but somewhat later than any of the above kinds; is full kerned, sweet and delicious, and a favorite in the Boston market, - pint, 25c.; ½ pint, 15c. 10

- Darling's Extra Early Sugar... PAP. CTS. 10
Moore's Early Concord Sweet... 10
Stowell's Evergreen... 10
Egyptian Joint Popping... 10
Connecticut Popping... 10
Rice Parching... 10

CORN SALAD.

- Corn Salad—Cultivated for its tender leaves; receives much favor as a winter and early spring salad. Sow early in September, in shallow drills, and through the winter cover lightly with straw or leaves. For salad; or leaves may be used as greens; lb. \$1.50; oz. 20c., 10

CRESS, OR PEPPERGRASS.

- Plain Leaved—Choice for salad; very tender; oz. 10c., 5
Fine Double Curled—Desirable for salad and garnishing; oz. 10c. 5
Henderson's Australian, or Golden—New; fine, piquant flavor; the finest of all cress; oz. 10c., 5
Broad Leaved Garden—A coarse variety, used for soups and feeding poultry; oz. 10c., 5
Perennial American—Hardy; somewhat resembling the Water variety; oz. 20c., 10
Water—An aquatic variety. Seed should be sown on the edges of streams, &c.; oz. 60c.; 1/4 oz. 35c., 15

CUCUMBER.

- Early Russian—Good and very early garden variety; very productive; good for cutting up and for pickles, lb. \$2.00; 1/4 lb. \$1.00; 1/2 lb. 50c.; 1/3 lb. 35c.; oz. 20c., 5
Early Frame—An early and standard variety; medium size and good flavor; lb. \$1.25; 1/4 lb. 65c.; 1/2 lb. 35c.; 1/3 lb. 25c.; oz. 15c. 5
Early White Spine—Superior for table; very productive; medium size, straight, well formed; good for pickles; lb. \$1.25; 1/4 lb. 65c.; 1/2 lb. 35c.; oz. 15c., 5
Early Green Cluster—Grows in clusters; early, productive, lb. \$1.25; 1/4 lb. 65c.; 1/2 lb. 35c.; 1/3 lb. 25c.; oz. 15c., 5
Early Short Green—Productive; good for table and pickles; lb. \$1.25; 1/4 lb. 65c.; 1/2 lb. 35c.; 1/3 lb. 25c.; oz. 15c., 5
Improved Long Green—Crisp, tender, and of good flavor; hardy and productive. Makes a good pickle; lb. \$1.50; 1/4 lb. 75c.; 1/2 lb. 35c.; 1/3 lb. 25c.; oz. 15c., 5
London Long Green—About one foot in length; flesh greenish white, firm, crisp; flavor good; desirable; lb. \$2.00; 1/4 lb. \$1.00; 1/2 lb. 60c.; 1/3 lb. 35c.; oz. 20c., 10

The following are popular foreign varieties. In our opinion they are better adapted for frame or house culture. Some of the varieties which we characterize as hardy, will give tolerable satisfaction if started early in boxes covered with glass, and transplanted.

- Small Green Prickly, or Gherkin—Excellent for table or pickles, 15
Small West India Gherkin—Used exclusively for pickles. In our opinion not desirable for any use, 15
Chinese Long Green—Long, quite hardy and productive, 15
Long Green Southgate—Receives much favor in England; hardy, 15
Wood's Long Ridge—A superior, hardy variety; excellent, 15
Lord Kenyon's Favorite—Fine for winter forcing; 12 to 18 inches, 20
Glory of Arnstadt—Straight, smooth and thick; dark green; 18 to 20 inches, 20
Stockwood Selected—A choice and hardy variety; 18 to 20 inches, 15
Mill's Jewess—An excellent variety; dark green; 18 to 24 inches, 20
Bedfordshire Surprise—Hardy and productive variety; succeeds in open ground, 15
Roman Emperor—Fine fruit; dark green; prolific; 12 to 15 inch, 20
Cutbill's Highland Mary—Deep green; smooth, prolific; 18 to 20 in, 20
Gladiator—An excellent, fine and large variety, 20
Sion House Improved—Dark green variety; solid and very fine; twenty to twenty-four inches, 20
Sir Colin Campbell—A popular and large English variety, 20
Victory of Bath—Well adapted for forcing or general crop, 20
Godfrey's Black Spine—A new variety; long and very fine, 20
Giant of Arnstadt—A splendid bearer; best forcer; 20 to 24 inch, 25
Hamilton's British Challenge—The English grower says of it: "This Cucumber surpasses any variety ever raised. It is of extraordinary length. I have grown it forty inches long. It combines all the recognized no plus ultra of perfection, i. e., splendid form." 25
Hamilton's Gollah—The grower says of this: "The largest of all the White Spines, with scarcely any neck, and the freest bearer I ever grow, frequently showing seven fruit at a joint." 25

- "Sooly Qua"—A Chinese variety of enormous size, growing 5 feet in length; considered by the Chinese a great delicacy, both boiled and raw; ornamental foliage. We have never tested its edible qualities; requires to be started very early; 2 seeds, 25
Serpent, or Snake—The French say that "this variety is good for vinegar pickling." It is remarkable for its curious form, the fruit being elongated and flexuous. The specimen from which the cut in the Cucumber Plate was made, was brought from France by the writer, and measured over five and one-half feet in length, 15
Toong Qua—Curious vegetable from China, claimed by the introducer to reach the weight of over seventy pounds; two feet six inches long and three feet in circumference; flesh about two inches in thickness, beautifully white and very tender; 2 seeds, 25

DANDELION.

- Dandelion—Cultivated for greens, and used the same as Spinach, - 10

EGG PLANT.

- Early Long Purple—Hardy and productive; six to eight inches long; oz. 35c.; 1/2 oz. 20c., 5
Improved New York—Extra large and choice; fine flavor; oz. 50c.; 1/2 oz. 30c., 5
Round Purple—Four to five inches in diameter; six to seven inches deep; oz. 40c.; 1/2 oz. 25c., 5
China White, Long—Fruit is white, cylindrical, elongated, bent at the end and turned to the ground, having much analogy with cucumbers, the flesh being more melting and less stringy than in other varieties; matures late, 10
Guadeloupe Striped—Fruit is small, oval, white, marbled and streaked with white. A very ornamental species, - 10
White—Choice variety for ornamental use; very showy, - 10

ENDIVE.

- Broad-leaved Batavian—Leaves broad, nearly plain; light green; best for soups, &c., - oz. 35c. 10
French Moss Curled Green—Moss-like appearance; beautifully curled; a desirable variety, - oz. 50c. 10
Green Curled—The common, and the best known kind, - oz. 30c. 10
Large Curled, or Ruffle-leaved—This variety is most largely grown and recommended by the French for salad, - lb. \$1.50; 1/4 lb. 75c.; 1/2 lb. 40c.; 1/3 lb. 25c.; oz. 15c., - 10

KAIL, OR BORECOLE.

- Green Curled Scotch—Crowns of the plants and young shoots are tender and delicate, especially after having been exposed to frosts. Plants should stand about 2 1/2 feet apart, - oz. 15c. 5
Carter's Improved Garnishing—Makes excellent greens. Is best when cooked after being acted upon by frost; very desirable for garnishing; may be used with good effect for bouquets. The colors of the leaves vary from rich crimson to white laced and fringed. Transplant to 2 1/2 feet apart; oz. 40c.; 1/2 oz. 20c. 10
Dwarf German Greens, or Sprouts—This is a very dwarf variety of Kail; leaves yellowish green, delicately fringed, and of fine flavor. It makes excellent winter and spring greens when set out in a light cellar or otherwise protected from the severity of the weather. In the South, however, and even in the warm soils and exposures in the middle States, Borecole will stand the winter in open beds without any protection, - lb. \$1.50; 1/4 lb. 75c.; 1/2 lb. 40c.; 1/3 lb. 25c.; oz. 15c., 5
Acme—A very dwarf, curled Kail, growing close to the ground, with glaucous green leaves, intersected by a scarlet mid-rib. It is really a superb thing, being very hardy, very early, prolific, tender, mild, and of a brilliant green when boiled. Supposed to be a hybrid between Dwarf Green Curled and Sea Kail. Transplant to two and one-half feet apart; oz. 50c. 1/2 oz. 25c. 10
Sea Kail—A perennial plant. The young shoots and stalks are boiled and used as Cauliflower or Asparagus, and are delicate and very much prized. Sow the seed in April, in a bed, and the following spring transplant in rows three feet apart and fifteen inches in the rows. Hoe and keep clear of weeds, and take off the flower buds should any appear. In autumn clear away the decaying leaves, dig a trench between the rows, and put the earth upon the plants, forming a flat ridge, one foot across at the top, over the plants, to the depth of eight inches; water the ridges the following spring, and when the surface is broken by the rising plants, remove the earth, and cut the young shoots close to their base for cooking. The cutting will last about six weeks; then the earth should be removed to the crown of the plants, and the plants permitted to grow till fall, taking off the flower buds and again earthing up in the fall and cut in the spring, and so continue. The shoots for eating may be grown under pots or tight boxes, - 10

KOHL RABI, OR TURNIP CABBAGE.

- Early Smooth Purple—Tender and fine for table; lb. \$2.00; 1/4 lb. \$1.00; 1/2 lb. 50c.; 1/3 lb. 25c.; oz. 15c., 5
White Giant—New, Very large and choice; lb. \$2.00; 1/4 lb. \$1.00; 1/2 lb. 50c.; 1/3 lb. 25c.; oz. 15c., 5
Large Late Green—An excellent variety for stock; lb. \$2.00; 1/4 lb. \$1.00; 1/2 lb. 50c.; 1/3 lb. 25c.; oz. 15c., 5
Late Giant Purple—New, large and tender; lb. \$2.00; 1/4 lb. \$1.00; 1/2 lb. 50c.; 1/3 lb. 25c.; oz. 15c., 5

LEEK.

- Early London**—A fine, early variety, and easily grown; oz. 35c.; 4 oz. 20c. 10
- London Broad Leaf, or Flag**—A very strong growing, long stemmed, productive variety, of fine quality; leaves are broad and grow on opposite sides like the flag; much used, - oz. 35c.; 4 oz. 20c. 10
- Musselburgh**—Quite distinct in habit from the London Broad Leaf. The leaves are narrow and grow upright; stem about the same size as the Broad Leaf, but as it grows compact more of it may be eaten; flavor mild, - oz. 35c.; 4 oz. 20c. 10

LETTUCE.

- Briggs' Improved**—Selected from thirty different varieties imported from Germany five years ago; of pink color; heads well, is tender, well flavored, and is tardy in running to seed, - oz. 40c.; 4 oz. 25c. 10
- Early Curled Silesian**—A fine, early variety; good size and very tender, - oz. 25c.; 4 oz. 15c. 5
- Victoria Cabbage**—A large, early and hardy variety; one of the best, - oz. 25c.; 4 oz. 15c. 5
- Red Edge Victoria**—A very fine, new, early heading variety, - oz. 30c.; 4 oz. 15c. 10
- Early White Cabbage**—Fine, large head; remarkably tender, - oz. 25c.; 4 oz. 15c. 5
- Early Egg**—Very early; small, solid head; fine quality, - oz. 25c.; 4 oz. 15c. 5
- White Silesian**—Early; head not as solid as some, but tender, - oz. 25c.; 4 oz. 15c. 5
- Large Drumhead**—One of the finest and largest varieties; very hardy, - oz. 25c.; 4 oz. 15c. 5
- Malta Drumhead, or Ice Cabbage**—Very large; quite hardy and crisp, - oz. 25c.; 4 oz. 15c. 5
- Large Pale Green Asiatic**—A large and desirable variety, - oz. 25c.; 4 oz. 15c. 5
- Neapolitan Cabbage**—Dwarf; very large; one of the best for summer, - oz. 25c.; 4 oz. 15c. 5
- Lee's Immense Hardy Green Cabbage**—A new variety; the largest Cabbage Lettuce grown, - oz. 25c.; 4 oz. 15c. 5
- Large Princess**—Choice Cabbage variety; excellent, - oz. 25c.; 4 oz. 15c. 5
- Tennis Ball**—One of the earliest and best heading varieties; superior, - oz. 25c.; 4 oz. 15c. 5
- Bossin**—A new, very large Cabbage variety, from Paris; rather coarse, - oz. 25c.; 4 oz. 15c. 5
- Tom Thumb, Wheeler's True**—A new English, dwarf variety; crisp, - oz. 25c.; 4 oz. 15c. 5
- Moor Park**—A new English variety, heading well; of fine flavor; oz. 25c.; 4 oz. 15c. 5
- Dickson's "All the Year Round"**—Hardy, crisp and compact Cabbage variety, - oz. 35c.; 4 oz. 20c. 10
- Boston Curled**—Very good, fine and ornamental; excellent flavor; oz. 25c.; 4 oz. 15c. 5
- Frankfort Head**—Large head and very choice; excellent for hot-bed or garden; desirable both for family or market garden purposes, - oz. 25c.; 4 oz. 15c. 5
- Philadelphia Butter**—Remarkably tender; good size and desirable; oz. 25c.; 4 oz. 15c. 5
- Satisfaction**—This is a new English variety of the Cabbage class of Lettuces. Heads represented as large, compact, white, crisp and tender, and as remaining a long time fit for use, as it is slow running up to seed, - oz. 40c.; 4 oz. 25c. 10

☞ All the above are Cabbage varieties.

- Carter's Giant White Cos**—New, large, long leaved, excellent variety. The Cos is used in England to a much greater extent than the Cabbage varieties, - oz. 35c.; 4 oz. 20c. 10
- London White Cos**—A very tender and finely flavored sort, claimed by the English seedsmen from whom we imported it, to be the best, - oz. 35c.; 4 oz. 20c. 10
- Golden Cos**—One of the best of the Cos varieties; long leaved; oz. 35c.; 4 oz. 20c. 10
- Paris White Cos**—Tender and crisp; good flavor; a favorite French variety, - oz. 25c.; 4 oz. 15c. 5
- Ivory's Nonsuch**—A new English variety of the Cos, - oz. 20c.; 4 oz. 15c. 10
- Snow's Matchless**—Is also a new English variety, and said to be superior, - oz. 40c.; 4 oz. 25c. 10

The leaves of such of the Cos varieties as do not turn in sufficiently, should be, when well grown, gathered in at top and tied, so that those within may blanch.

MARTYNIA.

- Martynia Proboseida**—A hardy annual plant, with a strong, branching stem; grows about three feet high. The young pods, which are used for pickling, are produced in great abundance, and should be gathered when about half grown, or while tender and succulent. Plant on any rich garden soil, two by three feet, leaving one plant in a place, - oz. 65c.; 4 oz. 35c. 10

MUSK MELON.

- Skillman's Fine Nette**—Flesh green, sugary, fine; early, - lb. \$1.00; 1/2 lb. 75c.; 1/4 lb. 40c.; 1/8 lb. 25c.; oz. 15c. 5
- Fine Green Nutmeg**—Fruit oval, good size, rich, sweet, - lb. \$1.50; 1/2 lb. 75c.; 1/4 lb. 40c.; 1/8 lb. 25c.; oz. 15c. 5
- Prolific Nutmeg**—Round; flesh thick, green, excellent, - lb. \$2.00; 1/2 lb. \$1.00; 1/4 lb. 60c.; 1/8 lb. 35c.; oz. 20c. 10

- Fine Long Yellow**—Form oval; choice; productive, - lb. \$1.50; 1/2 lb. 75c.; 1/4 lb. 40c.; 1/8 lb. 25c.; oz. 15c. 5
- Early Christina**—Small; flesh yellow, sweet, juicy, - lb. \$2.00; 1/2 lb. \$1.00; 1/4 lb. 60c.; 1/8 lb. 35c.; oz. 20c. 10
- White Japanese**—Thick flesh, musky flavor, sweet; fine, - lb. \$2.00; 1/2 lb. \$1.00; 1/4 lb. 60c.; 1/8 lb. 35c.; oz. 20c. 10
- Sutton's Green Citron**—Flatfish, ribbed; medium size; flesh green; sugary flavor. We know of no better Musk Melon for family or market use, than this Green Citron, - lb. \$2.00; 1/2 lb. \$1.00; 1/4 lb. 60c.; 1/8 lb. 35c.; oz. 20c. 10
- Persian**—Oval; thin skin; large, rich and sweet, - lb. \$2.00; 1/2 lb. \$1.00; 1/4 lb. 60c.; 1/8 lb. 35c.; oz. 20c. 5
- Jenny Lind**—Earliest; small fruit, fine quality, - lb. \$2.00; 1/2 lb. \$1.00; 1/4 lb. 60c.; 1/8 lb. 35c.; oz. 20c. 5
- Pine Apple**—Early; juicy, sweet and perfumed, - lb. \$1.50; 1/2 lb. 75c.; 1/4 lb. 40c.; 1/8 lb. 25c.; oz. 15c. 5
- Casaba**—A new, large, oblong variety. When well grown, weight from 10 to 15 lbs. Flesh yellowish green, rich, very sweet, melting and delicious. One of the best, - lb. \$2.00; 1/2 lb. 1.00; 1/4 lb. 60c.; 1/8 lb. 35c.; oz. 20c. 10

WATER MELON.

- Long Island**—An old variety; long, large and excellent, - lb. \$1.00; 1/2 lb. 50c.; 1/4 lb. 30c.; oz. 10c. 5
- Mountain Sweet**—Leading market sort; flesh scarlet, solid, sweet, delicious, - lb. \$1.00; 1/2 lb. 50c.; 1/4 lb. 30c.; oz. 15c. 10
- Mountain Sprout**—Not so desirable as the preceding, - lb. \$1.50; 1/2 lb. 75c.; 1/4 lb. 40c.; 1/8 lb. 25c.; oz. 15c. 10
- Ice Cream**—Oval; pale green; flesh white, sweet, tender, - lb. \$2.00; 1/2 lb. \$1.00; 1/4 lb. 60c.; 1/8 lb. 35c.; oz. 20c. 10
- Black Spanish**—Oblong; large; latish; flesh red and sugary; productive, - lb. \$1.25; 1/2 lb. 65c.; 1/4 lb. 35c.; oz. 15c. 10
- California**—The shape of this Melon is very well represented by the figure in the Melon Plate. It grows to a large size, is solid and thin skinned; flesh yellowish white, sweet, rich. Seeds have a peculiar appearance. Melon is excellent, - lb. \$1.00; 1/2 lb. 50c.; 1/4 lb. 30c.; oz. 15c. 10
- Phinney's Early**—Oval shape; dark skin, mottled with light green; productive; grows to large size; flesh deep red, and of superior quality, - lb. \$2.00; 1/2 lb. \$1.00; 1/4 lb. 50c.; 1/8 lb. 30c.; oz. 20c. 10
- Goodwin's Imperial**—Round; light green, speckled with dark green; grows to a very desirable size; flesh rich and well flavored, - oz. 35c.; 4 oz. 20c. 10
- Apple Seeded**—Early; round and small; a very nice little Melon; good keeper, - oz. 40c.; 4 oz. 20c. 10
- New Orange**—Oval; medium size; flesh red, tender, sweet; oz. 25c. 10
- Citron**—Spherical; flesh white, solid; for preserves, &c., - lb. \$2.50; 1/2 lb. \$1.25; 1/4 lb. 65c.; 1/8 lb. 40c.; oz. 20c. 10

MUSTARD.

- White English**—Most desirable for salads or culinary purposes; lb. 50c.; 1/2 lb. 25c.; 1/4 lb. 20c.; oz. 10c. 5
- Chinese**—A new salad variety, with leaves fully twice the size of the ordinary white; stems more succulent; color a vivid green; flavor pleasantly sweet, pungent; superior for salad, - lb. 50c.; 1/2 lb. 25c.; 1/4 lb. 15c.; oz. 10c. 5

NASTURTIUM—INDIAN CRESS.

- New Tall Dark**—Flowers dark crimson; 1/2 lb. 75c.; 1/4 lb. 40c.; oz. 25c. 10
- Yellow**—Flowers a rich yellow, - 1/2 lb. 75c.; 1/4 lb. 40c.; oz. 25c. 10

OKRA.

- Long Green**—Pods long and green; productive, but late, - oz. 10c. 5
- Dwarf White**—Earliest and most desirable for the North, - oz. 10c. 5

ONION.

- Extra Early Red**—This variety was produced by selecting for a series of years the earliest for seed. In size and shape it is very much like the Danvers Yellow. It yields well, and is desirable because it ripens up thoroughly early in the fall, - lb. \$5.00; 1/2 lb. \$2.50; 1/4 lb. \$1.25; 1/8 lb. 65c.; oz. 40c. 10
- Early Large Red Wethersfield**—This is, without doubt, the best and most productive Red Onion for the main crop. It is a variety that has been worked up by careful selection from the Large Red Wethersfield; it is quite distinct, ripening earlier and producing a thicker and more solid bulb, - lb. \$4.50; 1/2 lb. \$2.25; 1/4 lb. \$1.15; 1/8 lb. 60c.; oz. 35c. 10
- Large Red Wethersfield**—Is very much grown at Wethersfield; it is a large, thick, deep red, very productive sort, and of good quality; the seed should be sown very early in spring, in order to have the whole crop ripen, - lb. \$4.00; 1/2 lb. \$2.00; 1/4 lb. \$1.00; 1/8 lb. 50c.; oz. 30c. 10
- Large Yellow Dutch**—The common Yellow; flatfish, good size, productive; of excellent quality, and a long keeper; a good family or market variety, - lb. \$4.50; 1/2 lb. \$2.25; 1/4 lb. \$1.15; 1/8 lb. 60c.; oz. 35c. 10
- Early Round or Globe Danvers**—A superior, profitable, and very desirable variety. Our stock of this excellent variety is superior, and is from our own grower, at Wethersfield. Our stock of seed of this kind is pronounced by all seedsmen at Wethersfield, perfection, - lb. \$5.00; 1/2 lb. \$2.50; 1/4 lb. \$1.25; 1/8 lb. 65c.; oz. 35c. 10
- Yellow Danvers (imported, grown from American stock seed)**—Form globular; ripens up early and well; very productive; of excellent quality, and a long keeper, - lb. \$3.00; 1/2 lb. \$1.50; 1/4 lb. 75c.; 1/8 lb. 40c.; oz. 25c. 10

PAP. CTS.

White Portugal, American—Mild and desirable summer variety; grows to good size, - lb. \$5.00; $\frac{1}{2}$ lb. \$2.50; $\frac{1}{4}$ lb. \$1.25; $\frac{1}{8}$ lb. 75c.; oz. 35c.

Silver Skinned—Similar to White Portugal; ripens early, - lb. \$3.00; $\frac{1}{2}$ lb. \$1.50; $\frac{1}{4}$ lb. 75c.; $\frac{1}{8}$ lb. 40c.; oz. 25c.

The following are imported varieties, not particularly recommended as bottoming well, though some ripen up thoroughly and make good, hard bulbs, and keep well:

Covent Garden Pickling—The true small variety, used exclusively for pickling; color yellow. It is the kind put up extensively by Messrs. CROSSE & BLACKWELL, of London, whose jars are on sale at thousands of stores in this country. Seed should be sown thick, - lb. \$2.00; $\frac{1}{2}$ lb. \$1.00; $\frac{1}{4}$ lb. 60c.; $\frac{1}{8}$ lb. 40c.; oz. 20c.

White Lisbon—Very large, globular variety; white, - lb. \$2.00; $\frac{1}{2}$ lb. \$1.00; $\frac{1}{4}$ lb. 60c.; $\frac{1}{8}$ lb. 35c.; oz. 20c.

Large Stranburg—Danvers Onion-shaped; large; flesh color, - lb. \$2.00; $\frac{1}{2}$ lb. \$1.00; $\frac{1}{4}$ lb. 60c.; $\frac{1}{8}$ lb. 35c.; oz. 20c.

Large Madeira or Giant, Oval or Flat—Very large, coarse; lb. \$2.50; $\frac{1}{2}$ lb. \$1.25; $\frac{1}{4}$ lb. 65c.; $\frac{1}{8}$ lb. 40c.; oz. 25c.

Large Madeira or Giant, Round—Large; coarse quality, - lb. \$2.50; $\frac{1}{2}$ lb. \$1.25; $\frac{1}{4}$ lb. 65c.; $\frac{1}{8}$ lb. 40c.; oz. 25c.

Large White Globe—Large; fine grained, mild; for a regular and symmetrical; ripens up well. We saw specimens of last year's growth which had ripened off most perfectly, - lb. \$3.00; $\frac{1}{2}$ lb. \$1.50; $\frac{1}{4}$ lb. 75c.; $\frac{1}{8}$ lb. 40c.; oz. 25c.

Early White Naples—A new and distinct variety, of quick growth and mild flavor, originally selected from the Red Italian Tripoli Onion for its distinctive qualities of size, earliness and beautiful skin. Special Certificate Royal Horticultural Society, 8th June, 1870, for three specimens weighing 3 lbs. 7 oz., - lb. \$4.00; $\frac{1}{2}$ lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{8}$ lb. 60c.; oz. 35c.; $\frac{1}{2}$ oz. 20c.

Large Blood Red Italian Tripoli—A new, very large, Blood Red variety. In shape like the Danvers Yellow; said to be of mild and delicate flavor, - lb. \$5.00; $\frac{1}{2}$ lb. \$2.50; $\frac{1}{4}$ lb. \$1.25; $\frac{1}{8}$ lb. 65c.; oz. 40c.; $\frac{1}{2}$ oz. 25c.

Large Flat White Italian Tripoli—A new, very large, white, flat variety, similar in quality to the preceding. It is represented to us that the Italian growers have produced of this and the above variety, onions weighing four pounds each; lb. \$5.00; $\frac{1}{2}$ lb. \$2.50; $\frac{1}{4}$ lb. \$1.25; $\frac{1}{8}$ lb. 65c.; oz. 40c.; $\frac{1}{2}$ oz. 25c.

New Giant Rocca of Naples—A splendid variety of Onion, of delicate flavor, large, globular shape and light brown skin. A special certificate was awarded to Messrs. JAMES CARTER & Co., by the Royal Horticultural Society, 21st December, 1869, for specimens, each weighing 3 lbs. 9 oz." This Onion also received a Silver Medal at Boston, the past season. The seed of all the above new varieties, should be sown very early, in deep, rich soil, - lb. \$4.00; $\frac{1}{2}$ lb. \$2.00; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{8}$ lb. 60c.; oz. 35c.; $\frac{1}{2}$ oz. 20c.

New Neapolitan (Marzajola Onion)—The grower states that this variety is by far the earliest onion in cultivation; very distinct; lb. \$5.00; $\frac{1}{2}$ lb. \$2.50; $\frac{1}{4}$ lb. \$1.25; $\frac{1}{8}$ lb. 80c.; oz. 50c.; $\frac{1}{2}$ oz. 35c.

Queen, new—We quote: "This Onion has been selected and grown in Italy by the raiser of our celebrated Tripoli Onions. It is one and one-fourth to one and one-half inches in diameter, beautifully white, and of excellent flavor; but the principal recommendation is the marvelous rapidity of its growth. We have no hesitation in saying that it is one of the finest keeping onions ever offered, keeping sound from harvest to harvest, and retaining to the last its most exquisite flavor." - lb. \$3.00; $\frac{1}{2}$ lb. \$4.00; $\frac{1}{4}$ lb. \$2.00; $\frac{1}{8}$ lb. \$1.00; oz. 60c.

NOTE.—The crop of Onion seed throughout the country is very light. The crop on our Western Seed farm was nearly a total failure, and the crops around Rochester are not more than a fourth of an average. The crops at Wethersfield, Conn., are also short, as the quantity of ground to seed onions was less than usual, but the quality of the seed is excellent. From our growers at Wethersfield we have secured the largest and most complete stock in the country. In fact no seed house in this country has a stock of Wethersfield grown seed but ourselves, a fact which should not be lost sight of when ordering seed. As far as quality is concerned, we never had so fine a lot of seed as at present. Bear in mind that the best at a fair price is always the cheapest. Seed may be ordered of BRIGGS & BROTHER, at either Rochester, N. Y., or Chicago, Ill.

PARSLEY.

Fine Double Curled—A fine dwarf variety; very desirable, - lb. 60c.; $\frac{1}{2}$ lb. 35c.; $\frac{1}{4}$ lb. 20c.; $\frac{1}{8}$ lb. 15c.; oz. 10c.

Fine Giant Curled—Very large; fine curled; desirable, - lb. 60c.; $\frac{1}{2}$ lb. 35c.; $\frac{1}{4}$ lb. 20c.; $\frac{1}{8}$ lb. 15c.; oz. 10c.

Myatt's Garnishing—Pale green; extra curled, - lb. 60c.; $\frac{1}{2}$ lb. 35c.; $\frac{1}{4}$ lb. 20c.; $\frac{1}{8}$ lb. 15c.; oz. 10c.

Enfield Matchless—Very fine; desirable for garnishing, - lb. 60c.; $\frac{1}{2}$ lb. 35c.; $\frac{1}{4}$ lb. 20c.; $\frac{1}{8}$ lb. 15c.; oz. 10c.

Carter's Moss Curled—Like Myatt's; fine for garnishing, - lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{8}$ lb. 15c.; oz. 10c.

Drummond's Scotch—A fine double, curled variety, - lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{8}$ lb. 15c.; oz. 10c.

Covent Garden—Unapproachable for garnishing purposes, and no other type of Parsley equals this in quality. First-class Certificate of Royal Horticultural Society, Aug. 3d, 1870, - lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{8}$ lb. 15c.; oz. 10c.

PARSNIP.

PAP. CTS.

Long White Dutch—Very long and sweet; a standard variety; lb. 80c.; $\frac{1}{2}$ lb. 40c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{8}$ lb. 15c.; oz. 10c.

Abbott's Improved Hollow Crowned—Very superior variety; lb. 80c.; $\frac{1}{2}$ lb. 40c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{8}$ lb. 15c.; oz. 10c.

The Student—New; grows about 15 inches in length; fine, - lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 30c.; $\frac{1}{8}$ lb. 20c.; oz. 10c.

Carter's New Maltese—Claimed to be an improvement over other sorts, - lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{8}$ lb. 15c.; oz. 10c.

PEAS, Choice American and European Varieties.

FIRST EARLY.

Laxton's Alpha—Blue wrinkled Pea; exquisite flavor, remarkable for its earliness and prolific bearing; claimed to have beaten McLean's Advancer and Little Gem, in these respects; 2 feet; qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 20c.

McLean's Little Gem—The very best early dwarf wrinkled Pea grown. Our stock is superior, and consists of our own growing and imported, - qt. 65c.; pt. 35c.; $\frac{1}{2}$ pt. 20c.

McLean's "Blue Peter"—"A remarkably dwarf variety, with dark green foliage. A splendid bearer, and of exquisite flavor, with large and well filled pods—a decided improvement on 'Little Gem,' and that is saying a great deal." - qt. 80c.; pt. 40c.; $\frac{1}{2}$ pt. 25c.

McLean's Advancer—Dwarf, wrinkled marrow; very early, only a little later than McLean's Little Gem; pods are large and fill well; two and one-half feet, - qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 20c.

Tom Thumb, true—Very early, dwarf, productive and excellent. We can recommend this as very desirable. No garden should be without it. Our stock is genuine and very choice; 9 inch; qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 20c.

Carter's First Crop—Is recommended as a very early variety; claimed by some to be the earliest and most productive early Pea grown. This claim we do not fully endorse, believing as we do, our *Early Kent* to be superior in both particulars, - qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 20c.

Kentish Invicta—Kentish Invicta is a round blue Pea, about two feet in height, with straight, handsome, well filled pods; is earlier than the best stocks of Daniel O'Rourke, whilst the fact of its being a blue Pea, proclaims it to be infinitely superior in flavor to any white variety grown; qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 20c.

Extra Early Kent, true—Very early and productive; Peas large, rich, and of fine flavor. The demand on us from market gardeners, &c., both North and South, for this extremely early and choice variety, is really immense, and is yearly increasing, amounting now to several thousand bushels per year—a proof that there is no other pea yet introduced that can take its place as an early sort. An inferior or bogus article is sold to seedmen, under the name of "Early Kent." We first introduced this Pea, and by careful selection have kept up its character; three feet, - qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 15c.

Early Daniel O'Rourke—One of the earliest; good size; two and one-half feet, - qt. 50c.; pt. 25c.; $\frac{1}{2}$ pt. 15c.

Waite's Caractacus—Productive, early; strong grower; two-and one-half feet, - qt. 50c.; pt. 25c.; $\frac{1}{2}$ pt. 15c.

SECOND CROP.

Bishop's Early Dwarf—Early, good bearer; a desirable dwarf; one foot, - qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 20c.

Bishop's New Long Podded—Fine quality, early, prolific; one and one-half feet, - qt. 65c.; pt. 35c.; $\frac{1}{2}$ pt. 20c.

Laxton's Prolific Early Long Pod—Very popular in England; three feet, - qt. 50c.; pt. 25c.; $\frac{1}{2}$ pt. 15c.

McLean's Epicurean—White, wrinkled, very productive and superior, - qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 20c.

McLean's Premier—Large, wrinkled, very productive and superior; $\frac{3}{4}$ feet, - qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 20c.

McLean's Princess Royal—Second early garden Pea; very productive; pods large, peas white and very large; a leading London market pea; two feet, - qt. 50c.; pt. 25c.; $\frac{1}{2}$ pt. 15c.

Napoleon—Blue, wrinkled, very rich, sweet, tender and fine; $\frac{3}{4}$ to 3 feet, - qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 20c.

Harrison's Perfection—Smooth, white marrow, rich and productive; three feet, - qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 20c.

Eugenie—White, wrinkled; medium size; sweet and good; $\frac{3}{4}$ to 3 feet, - qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 20c.

MAIN CROP.

Carter's Surprise—Prolific; peas large, smooth, blue; a fine market variety; $\frac{3}{4}$ feet, - qt. 50c.; pt. 25c.; $\frac{1}{2}$ pt. 15c.

Peabody—Tom Thumb habit; branching, productive; fine flavor; $\frac{1}{2}$ feet, - qt. 75c.; pt. 40c.; $\frac{1}{2}$ pt. 25c.

McLean's Wonderful—Said to be the best wrinkled Pea; sugary; two feet, - qt. 75c.; pt. 40c.; $\frac{1}{2}$ pt. 25c.

Yorkshire Hero—Fine, large, blue, wrinkled; good quality; prolific; $\frac{3}{4}$ feet, - qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 20c.

Dwarf Blue Imperial—Good quality; two and one-half feet, - qt. 50c.; pt. 25c.; $\frac{1}{2}$ pt. 15c.

Dwarf Waterloo Marrow—Tom Thumb habit; splendid; new; fifteen inches, - qt. 60c.; pt. 30c.; $\frac{1}{2}$ pt. 20c.

Champion of England—Standard and popular variety; delicious flavor. Our stock is very choice. We have shipped to England the past four seasons several hundred bushels of this variety; five feet, - qt. 50c.; pt. 25c.; $\frac{1}{2}$ pt. 15c.

Waite's King of the Marrows—Large, sweet, productive and long bearer; five feet, - qt. 65c.; pt. 35c.; $\frac{1}{2}$ pt. 20c.

Veitch's Perfection—New; blue, wrinkled, delicious and productive; 2½ feet; qt. 60c.; pt. 35c.; ¼ pt. 20c. 10
Dwarf Sugar—Edible pods; cook as Snap Beans; very sweet; three feet; qt. 75c.; pt. 40c.; ¼ pt. 25c. 10
Tall Sugar—Edible pods; cook as Snap Beans; very large and long; five feet; qt. 75c.; pt. 40c.; ¼ pt. 25c. 10
Large White Marrowfat—Fine, late; good flavor; five feet; qt. 50c.; pt. 25c.; ¼ pt. 15c. 10
Large Black Eyed Marrowfat—Pods large and full; prolific. Is an admirable, late market variety, and very popular with market gardeners; four feet, qt. 50c.; pt. 25c.; ¼ pt. 15c. 10

We would draw special attention to our assortment of Peas. Our stock in *quality* and *quantity* is unequalled in this country. To those who purchase by the bushel, we would say that we are in a situation to furnish the following leading, choice and desirable varieties, in almost any quantity, viz: **Extra Early Kent**, **Carter's First Crop**, **Tom Thumb**, **Bishop's Early Dwarf**, **Champion of England**, **Large White Marrowfat**, **Black Eyed Marrowfat**. On application we will give prices, by the bushel, of either of these varieties.

PEPPER.

Cherry-formed—Fruit erect, small, productive and ornamental; oz. 30c.; ¼ oz. 15c. 5
Long Yellow—Pods long and tapering; rather late; two feet; oz. 30c.; ¼ oz. 15c. 5
Long Red—Fruit brilliant; very productive; fine for pickling; two feet; oz. 30c.; ¼ oz. 15c. 5
Squash or Tomato-shaped, Red—Large, ribbed, flesh thick; mild; oz. 30c.; ¼ oz. 15c. 5
Large Bell or Bull Nose, Red—Very large and early; fine for pickling; oz. 30c.; ¼ oz. 15c. 5
Sweet Spanish—Large, early and mild; for salads or pickling; oz. 35c.; ¼ oz. 20c. 5
Sweet Mountain or Mammoth—Remarkably large; excellent for mangoes; oz. 40c.; ¼ oz. 20c. 5
Monstrous or Grossum—Not quite so large as Sweet Spanish or Sweet Mountain; not very pungent; sweet. This variety has never succeeded with us; oz. 60c.; ¼ oz. 30c. 10
Small Red Cayenne—Pods small, cone-shaped, coral red when ripe; intensely acid. The Cayenne Pepper of commerce; used for pickles and for making Pepper Sauce; a perennial of tropical origin, and will not succeed at the North in open culture; oz. 60c.; ¼ oz. 30c. 10

PUMPKIN.

Cushaw—A fine and sweet variety; excellent keeper, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Large Cheese—Medium size; best for cooking, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Connecticut Field—Large; best for stock, lb. 50c.; ¼ lb. 30c.; ½ lb. 20c.; ¼ lb. 15c.; oz. 10c. 5

RADISH.

Early Oval Rose or Olive Shaped—Tender and excellent, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Early Scarlet Oval or Olive-shaped—Early, fine, tender, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Oval White or Olive-shaped—Differs from above only in color; lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
New French Breakfast—White tipped; very early, elegant. This variety takes the attention of those who visit the Paris vegetable markets. It is the French sort, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Salmon Colored—A long, light colored variety; good, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Long White Naples—Gr top; long, slender and fine, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Early Long Scarlet, Short Top—A standard, favorite sort, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Early Long Scarlet—Very excellent, mild and tender, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Covent Garden Special Long Scarlet—Fine shape, very bright scarlet, being quite transparent when well grown; mild and brittle; superior. One of the finest, if not the finest, long-rooted Radish grown; lb. \$1.50; ¼ lb. 75c.; ½ lb. 40c.; ¼ lb. 25c.; oz. 15c. 10
Wood's New Frame—In shape between a Turnip Radish and a Long Scarlet; mild, brittle, and of fine flavor; early and very suitable for hot-bed and out-door culture, lb. \$1.25; ¼ lb. 65c.; ½ lb. 35c.; ¼ lb. 25c.; oz. 15c. 10
Early Yellow Turnip—Differs from the Scarlet and White Turnip Radish only in color, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Early Scarlet or Red Turnip—Round; flesh white, fine, early; lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Early White Turnip—Little later than last, and less pungent; lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Chinese Rose Winter—Excellent; medium size, and firm, lb. \$1.25; ¼ lb. 65c.; ½ lb. 35c.; ¼ lb. 20c.; oz. 15c. 10
Chinese White Winter—Fine grained, crisp, excellent flavor; lb. \$1.25; ¼ lb. 65c.; ½ lb. 35c.; ¼ lb. 20c.; oz. 15c. 5
Black Spanish Winter, Long—Rather late; for winter use, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Black Spanish Winter, Round—A standard variety, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Large White Spanish Winter—A desirable variety, lb. \$1.25; ¼ lb. 65c.; ½ lb. 35c.; ¼ lb. 20c.; oz. 15c. 10

California Mammoth White Winter—An introduction from China, and first grown in this country by the Chinese in California. A FIRST CLASS CERTIFICATE was voted this new Winter Radish, by the Royal Horticultural Society of London, England, December 6th, 1871. "The committee entertained a high opinion of its merits for winter use, and especially for cutting up for salads." Roots are from eight to twelve inches long, and from 2¼ to 3¼ inches in diameter, lb. \$2.50; ¼ lb. \$1.25; ½ lb. 65c.; ¼ lb. 35c.; oz. 20c. 10
Raphanus Caudatus—Japan Radish; a novelty; seed pods two feet long. Not recommended as valuable, 20

RHUBARB, OR PIE PLANT.

Myatt's Victoria—A large, choice and favorite variety, lb. \$2.00; ¼ lb. \$1.00; ½ lb. 50c.; ¼ lb. 35c.; oz. 20c. 5
Linnaeus—Large; tender, and excellent flavor, lb. \$2.00; ¼ lb. \$1.00; ½ lb. 50c.; ¼ lb. 35c.; oz. 20c. 5
New Emperor—Stalks green, very large, and of fine flavor, oz. 40c.; ¼ oz. 20c. 10

SALSIFY, OR VEGETABLE OYSTER.

Salsify or Vegetable Oyster—This is the ordinary variety. Our stock of seed was grown from selected roots, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
New Blue Flowered French—This is an improvement upon the common variety. The writer visited fields of both kinds in France, and saw specimens of each taken from the ground. The root of the **New Flowered French** is larger, smoother, and more perfect in shape, than the ordinary, and equal, if not better in quality, lb. \$2.00; ¼ lb. \$1.00; ½ lb. 50c.; ¼ lb. 25c.; oz. 15c. 10
Scotymus Hispanicus—A Spanish variety of Oyster Plant, producing larger roots than the above, and we think of a finer flavor. The leaves are thistle-like in appearance, and quite prickly. For its fine quality we pronounce it worthy of extended cultivation, lb. \$2.50; ¼ lb. \$1.25; ½ lb. 65c.; ¼ lb. 35c.; oz. 20c. 10
Scorzenera or Black Salsify—Culture the same as for the above. It is grown for the same purpose as the other varieties of the Oyster Plant, oz. 20c. 10

SPINACH.

New Zealand—Very large and luxuriant in warm, rich soil; will endure drouth; plants should stand two feet apart; lb. \$2.00; ¼ lb. \$1.00; ½ lb. 50c.; ¼ lb. 30c.; oz. 15c. 10
Round or Summer—The popular summer variety; lb. 75c.; ¼ lb. 40c.; ½ lb. 20c.; ¼ lb. 15c.; oz. 10c. 5
Prickly or Winter—Hardy; thick leaved; for fall sowing; lb. 75c.; ¼ lb. 40c.; ½ lb. 20c.; ¼ lb. 15c.; oz. 10c. 5

SQUASH.

Early Yellow Bush Scollop—An early, flat sort; flesh pale yellow, fine grained, good flavor; dwarf habit; productive; occupies but little room, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Early White Bush Scollop—Sub-variety of above; same habit; lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Summer Golden Crookneck—Esteemed as one of the choicest of summer varieties; bright yellow; skin warty and thin; flesh dry and well flavored; use while young, lb. \$1.00; ¼ lb. 50c.; ½ lb. 25c.; ¼ lb. 15c.; oz. 10c. 5
Winter Crookneck—For fall and winter; good keeper, lb. \$1.25; ¼ lb. 65c.; ½ lb. 35c.; ¼ lb. 20c.; oz. 10c. 5
Hubbard—Best Winter Squash grown; flesh bright yellow, fine grained; very dry; sweet, rich flavored; fine keeper, lb. \$1.25; ¼ lb. 65c.; ½ lb. 35c.; ¼ lb. 20c.; oz. 10c. 5
Boston Marrow—Fall and winter; popular in Boston market, lb. \$1.25; ¼ lb. 65c.; ½ lb. 35c.; ¼ lb. 20c.; oz. 10c. 5
Turban or Turk's Cap—A good, late variety; flesh yellow, thick and fine grained, sugary and well flavored, lb. \$2.00; ¼ lb. \$1.00; ½ lb. 50c.; ¼ lb. 30c.; oz. 20c. 10
Moore's Vegetable Cream—A new English variety, introduced by THOMAS MOORE, Esq., Secretary of the Royal Horticultural Society of London, and described as an improved, small, cream colored, oval shaped variety of vegetable marrow; of very delicate flavor, lb. \$3.00; ¼ lb. \$1.50; ½ lb. 75c.; ¼ lb. 40c.; oz. 25c. 10
Custard Marrow—A new English summer variety; shape similar to Scolloped; delicate flavor; recommended, lb. \$3.00; ¼ lb. \$1.50; ½ lb. 75c.; ¼ lb. 40c.; oz. 25c. 10
Marblehead—The flesh is of rather a lighter color than the Hubbard, while its combination of sweetness, dryness and delicious flavor, is something really remarkable. In yield it equals the Hubbard, while its keeping properties are declared to surpass that famous variety, lb. \$1.50; ¼ lb. 75c.; ½ lb. 40c.; ¼ lb. 25c.; oz. 15c. 10

TOMATO.

The seed we offer is grown by ourselves from fruit selected by our own hands, and is not the refuse, as is too often the case, of the market patch. We make **Tomato Seed** a specialty, growing no Tomatoes for market, and saving seed only from finest specimens.
Keyes' Early Prolific—Very early, of good size and quality, very productive, and though not entirely smooth, its irregularities are such as not to be objectionable. We have improved it by careful selection from year to year, ¼ lb. \$1.00; ½ lb. 50c.; oz. 25c. 5

EARLEY'S DEFIANCE—A new English seedling of great merit; round in shape, of deep crimson color, and a very heavy cropper; excellent quality. $\frac{1}{4}$ lb. \$1.25; $\frac{1}{2}$ lb. 65c.; oz. 35c.; $\frac{1}{2}$ oz. 20c. 10

Dwarf Orangefield—Very early; plant very dwarf in habit; fruit somewhat irregular, of medium size; fine quality and abundant; very desirable. $\frac{1}{4}$ lb. \$1.25; $\frac{1}{2}$ lb. 65c.; oz. 35c.; $\frac{1}{2}$ oz. 20c. 10

HUBBARD'S CURLED LEAF—The testimony as to this being the earliest tomato grown, is very strong. Those who have used it as an early market variety, have succeeded well. We have a number of certificates from practical men to show, and which we would publish if not limited to space. It is of dwarfish habit and a prolific bearer; fruit is of fair size, somewhat irregular in shape; ripens up well; is of good color and flavor. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; oz. 25c.; $\frac{1}{2}$ oz. 15c. 5

Extra Early Red—One of the earliest; very smooth, round, and regular in its outline; of medium size; skin rich deep crimson; productive and of good quality. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; oz. 25c.; $\frac{1}{2}$ oz. 15c. 5

General Grant—This is an excellent family and market variety, and but little later than the earliest; fruit generally smooth; bright red color; ripens up well, is solid, and of excellent quality. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; oz. 25c.; $\frac{1}{2}$ oz. 15c. 5

Boston Market—An improved variety of the "Large Smooth Red." Very productive, showy, and of excellent quality. Much grown by market gardeners in the vicinity of Boston, by whom it is highly esteemed. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; oz. 25c.; $\frac{1}{2}$ oz. 15c. 10

Large Red Smooth or Round—Smooth and fair; nearly round, sometimes flattened; color somewhat red; an excellent market variety. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; oz. 25c.; $\frac{1}{2}$ oz. 15c. 5

The Cook's Favorite—Plants strong and vigorous; fruit smooth, round or oval; of a rich, deep color; solid; productive; of medium size and of excellent quality; good market sort; oz. 30c.; $\frac{1}{2}$ oz. 15c. 5

Orangefield or Sims' Cluster—Fruit grows in clusters of half a dozen or so in each; nearly round, below medium size, smooth, and superior flavor; very desirable for family use. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; oz. 25c. 5

De Laye or Upright Growing—New, upright growing French sort, **Early Smooth Red**—Early, good size and desirable. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; oz. 25c.; $\frac{1}{2}$ oz. 15c. 10

Cedar Hill—Medium size; early, tolerably smooth and solid; $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; oz. 25c.; $\frac{1}{2}$ oz. 15c. 5

Mauney's Superior—Large, smooth and round; solid. $\frac{1}{4}$ lb. \$1.25; $\frac{1}{2}$ lb. 65c.; oz. 35c.; $\frac{1}{2}$ oz. 20c. 5

Tilden—Very large, oval and smooth; thick meat; good flavor; $\frac{1}{4}$ lb. \$1.25; $\frac{1}{2}$ lb. 65c.; oz. 35c.; $\frac{1}{2}$ oz. 20c. 5

Large Yellow—Hardy; excellent for preserves, &c. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; oz. 25c.; $\frac{1}{2}$ oz. 15c. 5

Fejee Island Red—Large, sometimes ribbed; hardy, ripens poorly; $\frac{1}{4}$ lb. \$1.25; $\frac{1}{2}$ lb. 65c.; oz. 35c.; $\frac{1}{2}$ oz. 20c. 5

Lester's Perfected—Large, bright red; flesh firm, good quality; $\frac{1}{4}$ lb. \$1.25; $\frac{1}{2}$ lb. 65c.; oz. 35c.; $\frac{1}{2}$ oz. 20c. 5

Mammoth Chihuahua—Sometimes weighs two to three pounds; irregular. 10

Golden Striped—Large, good quality; yellow and red striped; oz. 30c.; $\frac{1}{2}$ oz. 15c. 5

Apple Shaped Red—Fruit of good quality, round, of medium size, inclined to grow in clusters. 10

Pear Shaped Yellow—Excellent for preserving and pickles. 5

Plum Shaped Yellow—Good for preserving and pickles. 5

Cherry, Red and Yellow—For preserving and pickles—each. 5

Red Currant—Habit and foliage more slender than the common tomato; fruit of a bright red color, growing in long drooping racemes, similar to the currant; quite ornamental. 10

Hathaway's Excelsior—This is a very early, smooth, solid and productive tomato, of good marketable size, and of superior quality. Our crop of this variety this season was the finest we ever saw. It was grown from seed of our own selecting from previous crops; pronounced by a Long Island gardener who visited our grounds, the finest crop of tomatoes he ever saw. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; oz. 25c.; $\frac{1}{2}$ oz. 15c. 10

Trophy—Fruit very large in size; smooth; ripens early; of excellent flavor, and produces a much greater weight of fruit than any other variety yet introduced; lb. \$6.00; $\frac{1}{2}$ lb. \$2.50; $\frac{1}{4}$ lb. \$1.25; $\frac{1}{2}$ lb. 75c.; oz. 40c.; $\frac{1}{2}$ oz. 25c. 10

Canada Victor—This variety we have never grown, and therefore cannot speak of it comparatively. It is said that "in this fine Tomato we have earliness, good market size, solidity and quality combined, while the trait of ripening fully about the stem without cracking, adds to its great value." A perfectly reliable customer of ours tells us that he tested it side by side with the General Grant, and that it is from two to three weeks earlier than the Grant. Fine article, from the original grower; oz. 30c.; $\frac{1}{2}$ oz. 15c. 10

Burnett's—A large, tolerably smooth, faintish red colored, new variety, of fair quality. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; oz. 25c. 5

Alliance—A rather flattish, smooth, solid, pink colored variety, of excellent quality. It has the serious fault of being late. 10

Sill's New Funchal—Early, medium sized, smooth, solid, new variety, of good color and quality; rather desirable. 10

Persian—A very large, tolerably smooth, solid, yellowish variety, of excellent flavor and quality. 5

English Grape Shot—Similar to our common Red Cherry Tomato, 10

Hepper's Goliath—This is a new English variety. "A very superior and extra large red variety, of fine shape and of excellent quality." It is similar in size, shape, color, quality and productiveness, to the much esteemed Trophy, but regarded as earlier, and ripens up well at the stem. 10

Many ask us to give them the benefit of our knowledge of Tomatoes. They wish to know which variety, or few varieties, of our long list are really the most desirable. To such of our enquiring

friends we would say that we regard the following the best six of our list: Earley's Defiance, Hubbard's Curled Leaf, General Grant, Hathaway's Excelsior, Trophy and Hepper's Goliath. The best three kinds: General Grant, Hathaway's Excelsior and Trophy, or Hepper's Goliath. The best two varieties: Hathaway's Excelsior and Trophy, or Hepper's Goliath. The best kind for the family garden: Hathaway's Excelsior, though it would be advisable to grow both the Excelsior and Trophy, or Hepper's Goliath.

TURNIP.

Early White Flat Dutch—Medium size; juicy and excellent; lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Teltow—Much grown in Germany and France, and especially about Berlin, for market purposes; roots long and small; top small; skin white; firm, fine grained, sugary, and of excellent flavor. Best for table use. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Early Yellow Dutch—Excellent for garden; very tender. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

White Stone—Medium size, round sort; fine quality, lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Fine Garden Stone, White—Choice for table use, lb. \$1.25; $\frac{1}{2}$ lb. 65c.; $\frac{1}{4}$ lb. 35c.; $\frac{1}{2}$ lb. 20c.; oz. 10c. 5

Yellow Stone—One of the best for garden cultivation; lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

White Six Weeks, or Snow Ball—Early and fine. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Orange Jelly, or Robertson's Golden Ball—Superior for table. $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Jersey Navet—New; long, early, delicate, very sweet; for table; lb. \$1.25; $\frac{1}{2}$ lb. 65c.; $\frac{1}{4}$ lb. 35c.; $\frac{1}{2}$ lb. 20c.; oz. 10c. 5

Purple Top Strap-Leaved—Most desirable field, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Purple Top Strap-Leaved, Fine American, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Yellow Malta—Early; good size; smooth; fine flavor; lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Long Red Tankard—For field culture, lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Large Yellow Scotch, or Aberdeen—Table or cattle; lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Long White French—Firm and sweet; table or stock; lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Large White Globe—Superior for field culture, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Flat Norfolk—Table and cattle, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Cartor's Imperial Purple Top—The growers say of this; "After careful selection, we have produced a stock of superior quality, and can strongly recommend it for sowing for early feed. Grows quick; root is juicy, large and firm, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

The following are Swedes, or Ruta Baga Turnips:

White Sweet—A standard field variety; table or stock, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

White Red Top—Good size; fine for table or cattle, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Skirving's Liverpool Purple Top—For stock or family use, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Laing's Purple Top—One of the earliest; solid; fine flavor, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Marshall's Extra Purple Top—Choice and productive, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Sutton's Champion—A favorite with fock breeders, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Large London—Large and fine; for table or cattle, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Cartor's Imperial Purple Top, Hardy Swede—Choice, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

Bangholm Swede—His variety of Swede is much used in England, and has an excellent reputation among our customers in Canada, where it is largely used, $\frac{1}{4}$ lb. \$1.00; $\frac{1}{2}$ lb. 50c.; $\frac{1}{4}$ lb. 25c.; $\frac{1}{2}$ lb. 15c.; oz. 10c. 5

POT AND SWEET HERBS.

As the Sweet Herbs are so valuable to the cook that they can be at times but illy dispensed with, a few at least, should be grown in every garden where any pretension to cooking is to be observed. All the following kinds are grown in European gardens, to be used in some shape or other in culinary purposes. All varieties put up in good sized papers.

LIST OF NOVELTIES OF 1874.

FLOWERING THE FIRST SEASON.

This LIST OF VARIETIES comprises our last year's Novelties. We again append the raisers' own descriptions. We grew last season all of the varieties, and found them to be very satisfactory; and some of them (as witness the Phlox Drummondii Grandiflora varieties) were surpassingly beautiful. We have in all cases reduced the prices, so that they are within the reach of all.

- 939—**AGERATUM, Imperial Dwarf**—This is an exceedingly fine bedding plant, of a beautiful azure blue, and produces a dense mass of blossoms throughout the summer; free, healthy and vigorous in growth. It has already won the admiration of all who have seen it. Unanimously awarded a First Class Certificate by the Royal Horticultural Society of London, - - - 15
- 940—**AMARANTHUS, Abyssinicus**—A new Abyssinian variety, forming vigorous, tree-like specimens, of five feet in height, by the same in diameter. The plant is composed of six to eight stout branches, each of which throws out as many smaller ones, which are all terminated in the first place by a large, drooping carmine red flower spike, this being subsequently surrounded by ten to twelve somewhat shorter ones, lending to the plant a highly curious appearance. Planted singly or in rows, it produces a striking and remarkable effect, and should be seen to be appreciated, - - - 10
- 941—**ASTER, Gollah**—A splendid addition; similar in growth and habit to the much admired *Mont Blanc*, sent out by us in spring of 1873-3. We offer four distinct and desirable colors—*Mont Rose, Dark Blue, Ash Grey, Crimson*, and the same mixed, - - - 20
- 942—**ASTER, Washington**—There is no exaggeration in pronouncing this new race to be one of the finest extant. It originates from the *Victoria Aster*, and is of similar, though far more robust habit. The flowers, but particularly the center ones are of larger dimensions, and have the additional superiority of being of a more globular form. In the *White* variety the color is extremely pure, surpassing in this respect that of any other race; the variety of the *Peach Blossom* is also exceedingly delicate. The *Washington Aster* is unquestionably an immense improvement on the *Victoria* class, both in habit as well as size and perfection of the flowers, and cannot fail to occupy the foremost rank among the finest existing sorts. *Peach Blossom, White*, and the same mixed. In separate packets, - - - 20
- 943—**CANDYTUFT, Deep Carmine**—A new and most beautiful deep carmine colored Candytuft, which will be hailed with delight by all lovers of fine flowers. This will form an elegant and desirable addition to these most useful of summer-flowering plants, - - - 20
- 944—**CONVOLVULUS MAJOR, picturata**—Very beautiful striped variety of this favorite climbing annual. Its vigorous growth, free blooming habit, and adaptation for artistic trellis work, has shown it to be one of the most elegant climbing plants yet known. It is beautifully barred and striped with bright rose, upon a pure white ground, - - - 15
- 945—**ORNAMENTAL GOURD (Cucurbita, melopepo striped, flat)**—Fine, interesting new variety; vigorous climber; fruit very numerous, dark green, striped and ribbed with white; excellent for trellis, verandah, &c., - - - 10
- 946—**PHLOX DRUMMONDI, coccinea striata**—A very useful, new variety, producing fiery scarlet flowers, prettily striped with white. The pure white stripes show off the brilliant ground color to great advantage. It has proved to be constant in habit, - - - 20
- 947—**PHLOX DRUMMONDI, Rose Chamois striata**—This charming novelty is of a very vigorous constitution, and of erect and compact habit, thus being a marked improvement. The color, too, shows no tendency to vary, as is the case with the old sort, but is quite constant and of a delicate *Chamois Rose*, distinctly striped with white—a combination of tints hitherto lacking in this genus. Being highly effective, it will be accorded a foremost place for decorative purposes, - - - 20
- 948—**PHLOX DRUMMONDI, Grandiflora varieties**—By a careful selection, a class of *Phlox Drummondii* has been obtained remarkable for unusual size of flowers, which are similar in form to those of the perennial sorts, rendered very striking by a large center and fine dark violet eye, - - - 20
- 949—**SWEET PEA, The Queen**—The upper petals or standard, is crimson lake in the center, fading off toward the edges, similar to a *Pelargonium*; the wings or side petals are flamed or splashed with the same color, like a *Carnation*; the lower petals or keel being white. It is robust in habit, free blooming, and a decided acquisition, - - - 10

GREENHOUSE SEEDS.

- 950—**ABUTILON, hybridum album**—A new white-flowered variety of this showy and desirable class of plants, which, as it flowers freely in winter, must become invaluable to florists and amateurs for wreaths and bouquet making, - - - 25
- 951—**BEGONIA, Sedeni Magnifica**—A cross between *B. Sedeni* and *B. Boliviana*, with flowers as large again as those of *Sedeni*, and of more brilliant color. Excellent for groups and pot culture, and worthy of being highly commended, - - - 50

- 952—**BEGONIA, Sedeni Victoria**—A splendid hybrid of *Sedeni*, having bright carmine scarlet flowers, and a strong, compact habit. Being well adapted for bedding and a continuous bloomer, it cannot be too highly recommended. From the beginning of June of the present year until end of October, plants bedded out and unprotected, were loaded with their dazzling blossoms, and elicited general admiration. Cover seed very lightly, and keep moist until the plants make their appearance. This and the preceding will be offered by the leading florists of the country in a year or two, at from \$2.00 to \$3.00 each, - - - 50
- 953—**CINERARIA, hybrida flore plena, Double-flowered Cinerarias**—This is considered to be the best and most desirable novelty sent out for several seasons, producing flowers of the greatest possible interest and beauty, which are perfectly and evenly double, being made up of ligulate florets, and are of various colors and shades of same, as well as being tipped with various tints of different colors. The flowers are of good size and quite symmetrical. The habit of the plant is good and vigorous. It is needless to dwell upon the value of Double varieties of such a favorite florist's flower, as double flowers last so much longer than single ones. THOMAS MOORE, Superintendent of the Botanic Garden, Chelsea, London, Dr. W. NEUBERT, of Germany, and Dr. REEGL, Director of the Imperial Botanic Gardens of St. Petersburg, Russia, speak highly of this novelty, - - - 75

NEW VEGETABLES.

- 954—**CUCUMBER, Russian Notted**—This very interesting kind is a native of the Ukraine country, and of an extraordinarily prolific nature. In hardness it surpasses all other known kinds. It is of middle size, the flesh white, and the skin covered with a pretty white net-work, which gives to the fruit a peculiar as well as handsome appearance. A Certificate was awarded it at the Vienna International Exhibition, where its fine appearance excited curiosity. It is edible as well as ornamental, - - - 10
- 955—**CUCUMBER, Swan Neck**—For its excellent qualities this variety is recommended for general cultivation. Has proved to be constant in habit and character the past four seasons. It attains a length of 35 inches or more; is free from seed, flesh being very tender and of delicious flavor. An abundant cropper, producing fruit until late in autumn. For open ground or frame, equally well adapted. Eight seeds, - - - 25
- 956—**MELON, Green Climbing**—An exquisite new French variety, cultivated on a trellis or on poles; in sunny places it will produce without trimming, a large number of Melons of the size and shape of an *Ostrich egg*. Ripening successively from summer till autumn. Flesh green, very sweet, juicy, very fine flavor, and very melting; skin thin, slightly ribbed; fine. 8 seeds, - - - 25
- 957—**SQUASH, Round Warty Marrow**—Fruit middle-sized, with orange colored flesh, melting of very good quality, keeping during the whole winter and until spring. The skin is of a bright red, and covered and notted all over with grey warts, - - - 20
- 958—**TOMATO, Belle de Leuville**—Fine variety; fruit large, very fleshy and succulent; skin of a peculiar red color, running into violet. Great favorite of the Paris green-grocers. This and the succeeding are new French varieties, - - - 10
- 959—**TOMATO, Early Dwarf Red**—Very fine; exceedingly early; very dwarf, producing abundantly early clusters of middle-sized fruit, of very good quality; smooth skinned and full-fleshed. The smallness of this plant, its earliness and great produce, will make it soon a general favorite for forcing as well as open air cultivation, - - - 10

OMISSIONS.

- The following varieties were inadvertently omitted from the body of the list, and as we cannot dispense with them we find space for them here:
- 83½—**ASTER, Gefulte's Dwarf**—A very free-flowering, pretty, new dwarf variety; flowers an inch in diameter; height eight to ten inches; colors mixed, - - - 20
 - 83¾—**ASTER, Gefulte's Pyramidal**—A new Aster, of fine habit, producing well-formed double flowers in abundance; flowers 2½ inches in diameter; height 18 inches, - - - 20
 - 236½—**Euphorbia marginata**—A desirable, variegated plant, growing to the height of fifteen inches; suitable for the ribbon-border, groups, or as single plants; flowers small, white, and inconspicuous. Desirable as a foliage plant, - - - 10
 - 568½—**Gomphrena globosa, Isabellina**—Silvery white, shaded with orange, - - - 10
 - 669½—**Gomphrena globosa—Dark Violet**; a most beautiful color; very desirable, - - - 10
 - 669¾—**Gomphrena globosa—Light violet**; lighter in color than the preceding; equally as desirable, - - - 10
 - 827½—**LYCHNIS, Haageana Lilacina**—Of the same style and habit as *L. Haageana*, but producing flowers of a fine lilac color, - - - 15
 - 874½—**Primula Japonica, (The Queen of Primroses)**—A beautiful new, hardy Primrose, producing flower stems a foot and one-half high, bearing four or five separate whorls of flowers, each flower an inch in diameter, and of several beautiful colors. Finest mixed, - - - 40

NOVELTIES FOR 1875

We again present our readers with what we consider to be the cream of the **New Varieties** offered by foreign seedsmen. We have no doubt but that the **New Phlox Drummondii grandiflora splendens** will be found to be a great acquisition. **MR. BENARY**, its raiser, is by no means a full fledged florist, but stands at the entire head of all the seedsmen florists in the whole world. We always introduce his commendations with full confidence, believing that his opinion in the matter of **New Varieties**, barring climate, can always be depended upon. The other varieties are secured from men equally as high and pains-taking in their profession, and we have no doubt but that their descriptions will be in the main correct, and that these new varieties will, as a rule, give entire satisfaction.

ANNUALS, &c., BLOOMING THE FIRST SEASON.

- | | |
|--|--|
| <p>954—AGERATUM, Countess of Stair—This is, without doubt, a decided improvement upon the Imperial Dwarf Ageratum, for profuse and compact as is the habit of the latter variety, the flower heads in Countess of Stair are still more dense and compact. There is not a shoot but throws up a head of dense blossoms, beginning at only a few inches from the ground, and only ending when its entire length of 6 or 8 inches is attained; whole top of the plant is one dense mass of fragrant lavender-blue blossoms. - - - - - 25</p> <p>955—ALONSOA, Linifolia Roezli—This species surpasses in every respect, the few sorts of the genus <i>Alonsoa</i> at present known. An uncommonly free-blooming nature, and dwarf, graceful habit, combined with an exceedingly pretty, dark green foliage, agreeably contrasting with its gay colored flowers, are characteristics possessed by this novelty, which cannot fail to procure for it rapid and universal cultivation. It is easily grown, and is susceptible of both pot and open ground culture. Employed either for large or small masses, or as single specimens, the <i>Alonsoa linifolia</i>, bearing as it does, a striking resemblance to certain of the elegant New Holland Plants, will produce a surprisingly beautiful effect. - - - - - 25</p> <p>956—AMARANTHUS HENDERI—This strain of <i>Amaranthus</i> differs from all others ever sent out; being a cross between <i>A. Elegantissima</i>, <i>A. Tricolor</i>, and <i>A. Salicifolius</i>, it has produced a range of colors never before seen in any class of plants. From its graceful habit and brilliant colors, it produces a striking effect, either for table decoration, conservatory, or sub-tropical gardening. They have been greatly admired, especially for table decoration, having a transparency which show their various colors distinctly when seen against the light. When young, the colors of the leaves are brown, madder and bronze; as they grow larger, each plant assumes its distinctive color. The leaves vary in length up to twelve inches, all gracefully bending. Awarded First-class Certificate by the Western Horticultural Society, and commended by the Royal Horticultural Society, South Kensington. The editors of the <i>Gardener's Magazine</i>, <i>Gardener's Chronicle</i> and <i>The Garden</i>, all speak in high terms of this beautiful novelty. - - - - - 50</p> <p>957—AMARANTHUS, salicifolius splendissimus—Very beautiful novelty, with elegant, rich, golden and purplish red leaves. It is very bushy in habit, and as an ornamental plant, of a most telling effect. - - - - - 25</p> <p>958—BLUMENBACHIA (Cajaphora) Coronata—Dwarf, shrubby growing annual, forming handsome tufts about 1½ feet high by one foot through. The flowers, which are borne in great profusion, are of a striking orange-red color, conical shaped, and are about three-fourths of an inch deep by one and a half inches in diameter. This plant, like the <i>Loosa</i>, is of a stinging habit. MR. WORTHINGTON SMITH thus speaks of it in the <i>London Gardener's Chronicle</i>, of September 6th: "The presence of danger always renders beautiful objects still more fascinating. 'The rose with all its thorns is best of all.' This is the reason why the beautiful plant of the <i>Blumenbachia coronata</i>, exhibited by Messrs. VERRCH, at the Royal Horticultural Society, proved so attractive to many a visitor in the Council room. The beautiful habit and fine, large, orange-colored flowers of this plant, were fascinating enough in their way, but the label requesting no one to touch it on account of its stings, completed the charm." - - - - - 25</p> <p>959—CELOSIA Cristata Variegata, New early-flowered variegated Tail—As early as common sorts, is perfect in form of the heads; a beautiful Novelty. Twenty seeds. - - - - - 25</p> <p>960—CELOSIA Cristata Variegata, New early-flowered variegated Dwarf—Extremely beautiful, and of as fine quality as any of the superior dwarf kinds. Twenty seeds. - - - - - 50</p> <p>961—CLEOME SESQUIGYALIS—A remarkable South American annual, about ten feet in height, with leaves for a plant of this genus, of enormous dimensions. It has the habit of the <i>C. pungens</i> and <i>splendens</i>, and is of similar aspect, though double the size. Highly ornamental novelty. - - - - - 25</p> | <p style="text-align: right;">PKT. CTS.</p> <p>962—FENZLIA, dianthiflora alba—A white-flowering variety of this highly interesting and pretty miniature annual. - - - - - 25</p> <p>963—MARIGOLD, (Crusell's International Prize)—Seed of this celebrated strain, which is the result of fifteen years careful selection, is now offered for the first time. Every seed offered guaranteed to be sved from flowers of equal merit to those shown at the International Exhibition, Manchester, September 3d, 1873; of which BRUCE FINDLAY, Esq., the Secretary, writing to Mr. Crusell, says: "I am sorry to say your <i>glorious Flowers</i> did not arrive until 10 o'clock, on the 3d, after the judging was over. They were, however, awarded an <i>Extra Prize, equal to First.</i>" Four first prizes were awarded this fine strain in 1873, and four first and an extra prize during the year 1874. African, very finest mixed. - - - - - 25</p> <p>964—MARIGOLD (Crusell's International Prize)—French, very finest mixed. - - - - - 25</p> <p>965—MIGNONETTE, The New Prize-taker—This variety has taken prizes at all the Exhibitions on the Continent of Europe, and excels all other varieties in beauty of color and size of flowers, and can be really recommended. - - - - - 25</p> <p>966—PHLOX DRUMMONDI, grandiflora splendens—The large-flowering varieties of <i>Phlox Drummondii</i>, sent out last year, have been generally and highly appreciated. We offer, in the present novelty, by far the most beautiful of them; the striking characteristic of it is the refulgent scarlet-red color of its flowers, rendered further remarkable by a large white eye, the center of which is encircled with a well defined violet edge. A more effective plant for producing rich masses of color, could not easily be found; so that in future the sorts of this category will unquestionably be greatly in request. 8 seeds, 25 cts.; 16 seeds, 40 cts.</p> <p>967—PYRETHRUM, Golden Gem—<i>The Golden Feather</i> plant, as it is called, has been recommended from time to time as a valuable plant for summer decoration. We never thought it exactly the thing, owing to its losing its bright color here with our hot suns, but have no doubt that this new variety will be greatly superior to it. The following is MR. WILLIAMS' (London, Eng.) description of it: "This superb plant is a great acquisition for summer bedding or ribbon work, and is also equally effective when grown in pots, for the decoration of the green-house or conservatory; it grows from nine to twelve inches, becoming much branched from the base upward; <i>the leaves are brighter than those of the old Golden Feather</i>, larger and more lacinated, and is far superior, as it produces large, elegant, double, white flowers, which are continued without intermission from April to November. It comes perfectly true from seed. - - - - - 25</p> <p>968—RHODANTHE MANGLESII, fl. pl., Prince Bismarck—This new double variety is undoubtedly a great acquisition to this most beautiful and elegant class of fine Everlastings; the flowers are large and double, and it is very highly recommended. 10 seeds. - - - - - 50</p> <p>969—RICINUS GIBSONII—Introduced by the Messrs. VETCH, of London, who thus describes it: "A very fine, dark-leaved variety of this useful group of sub-tropical plants. It grows from four to five feet high, has a fine branching habit, and particularly distinguishes itself from every other variety, by its intense deep red color of its foliage, reminding one of some of the dark-leaved varieties of <i>Amaranthus</i> which are so much grown for the purpose of giving coloring and effect to groups and masses. It will undoubtedly take a high position in the sub-tropical garden, on account of its bright hue, which is retained during the whole of the season. It is in every way so distinct and fine a kind that we have considered it worthy of being named after Mr. Gibson, late of Hyde Park, who has done so much for the advancement of sub-tropical gardening in this country. It was imported by us from the Philippine Islands. Four seeds, - - - - - 30</p> |
|--|--|

ORNAMENTAL GRASSES.

- | |
|---|
| <p>970—Agrostis minutiflora—An extremely elegant and graceful Ornamental Grass, of thick, tufty growth, throwing up more than a hundred erect culms, terminated by a large inflorescence of airy lightness. Fine for growing in vases or for perpetual bouquets. - - - - - 25</p> <p>971—Eragrostis maxima—A new Abyssinian Ornamental Grass, forming a vigorous tuft, often exceeding three and a half feet in height, which is capable of producing 50 to 100 richly leaved culms. Of very handsome and decorative aspect. - - - - - 25</p> <p>972—Salvia Candidissima—Hardy Biennial. A noble looking plant, with large, silvery leaves of ornamental character, covered with thick, snow-like down; fine for shrubberies, where single specimens would form a conspicuous ornament. - - - - - 10</p> |
|---|

NEW VEGETABLES.

GREEN GAGE TOMATO—The following is Messrs. CARTER & Co.'s description of this New Tomato: "We have much pleasure in offering for the first time our new Tomato, "*Carter's Green Gage*." It was exhibited before the Fruit Committee of the Royal Horticultural Society, on Wednesday, October 7th, and awarded a First Class Certificate for its very fine flavor and clearly defined and distinct character. It is very prolific, bearing clusters of fruit of a beautiful citron color, irregularly penciled with steel colored flakes on the upper surface, which renders it very ornamental. In a raw state it has the agreeable acid of an American Cranberry, with a fine sugary flavor. This variety, selected by us at our Seed Farm, from Hathaway's Excelsior, is very early, and ripens readily in our English climate out of doors. It is quite distinct in color, form and flavor from any other Tomato. We have received the following testimonials [we only append one of them—B. & B.]: Mr. PENNY, Gr. to His Royal Highness the Prince of Wales, writes as follows: "Messrs. CARTER have sent me some of their Green Gage Tomato, which should be called Golden Gage. It is a great acquisition. Having tested it, together with one of the best red varieties, I find it is greatly superior. The flavor is something delicious when cooked, and combines the Apple and Tomato beautifully blended. No garden should be without this novelty. I shall grow it largely." 25

MUNROE'S LITTLE HEATH MELON—This is one of the most prolific and hardy Melons in cultivation. It is a very imposing scarlet-fleshed Melon, large ribbed, pale netted, and excellent in flavor; has been grown as heavy as 10 pounds, its average weight is 6 pounds. When exhibited before the Royal Horticultural Society it received the high award of a First Class Certificate. 25

RUSSIAN FRAME RADISH—Mr. BENARY describes this as follows: "This variety has been thoroughly tested by me, and I do not hesitate to proclaim it a valuable acquisition. Sown under glass it comes into use as rapidly as any other sort; in the open ground it is ready for use in about four to five weeks from time of sowing. The root exceeds ten inches in length, and is of an average thickness throughout of about an inch. Owing to the smoothness and tenderness of the skin no scraping is required before being eaten. The flesh is white, succulent, very delicate and fine flavor." 20

CHOICE FLOWERING POT PLANTS,

FOR THE HOUSE AND GARDEN.

Plants sent free by mail, at the prices quoted below. Parties wishing large plants can have them sent by Express; those so ordering, to pay their own Express charges. A few plants in pots will make beautiful ornaments for the window, verandah, hanging basket, vase and open garden. The following are tried varieties, and will give the most satisfactory results.

- | | |
|---|-----------------|
| | EACH, CTS. |
| PEGONIA, coccinea —Elegant plant for pots, baskets, vases, and open garden; flowers crimson scarlet; a perpetual bloomer. | 50 |
| CALA LILY —Excellent house plant, with large, pure white flowers; fine for aquariums; needs plenty of water. | 50 |
| COLEUS —Grand leaf plants; beautiful and elegant in appearance; desirable. <i>Attraction, Her Majesty, Golden Gem, Princess of Prussia, Verschaffelti.</i> | 80 |
| FUCHSIA —Elegant plants, with beautiful flowers; very desirable. <i>Single—Try-me-oh, very dark, extra fine; Arabella, light; Duchess of Lancaster, light, &c., &c.,</i> | 80 |
| <i>Double—George Felton, violet corolla, extra; Avallanche, dark plum color; Princess of Wales, white corolla, double white.</i> | 80 |
| GERANIUMS, Double — <i>Marie Lemoine, pink; William Pfitzer, scarlet; Crown Prince, rose,</i> | 80 |
| <i>Zonale—Madam Vaucher, white; Coleshill, scarlet; Jean Sisley, extra scarlet; Master Christine, pink, extra fine,</i> | 80 |
| <i>Scented Rose, Dr. Livingston, cut foliage, fine,</i> | 30 |
| <i>Album Plenum</i> —This is the first raised Double White Geranium. | 50 |
| <i>Alice Crossin</i> —White, flushed with rose. This we think the most pleasing of the three. | 50 |
| <i>Aline Sisley</i> —Pure White, considered by some the best Double White. | 50 |
| VERBENAS —In twelve superb kinds. | per dozen, 1 75 |
| SEDUM, Seiboldi variegatum —One of the finest hardy plants we possess; extra fine for the garden, cemetery, pots, &c. | 40 |
| <i>Seiboldi</i> —Green leaves and purple flowers. | 80 |
| ROSES, Hybrid Perpetual — <i>Louis d'Arzans; color white; a profuse and perpetual bloomer,</i> | 50 |
| <i>Moss—Princess Adelaide; color red; vigorous grower.</i> | 50 |
| <i>Tea—Mad. Margottin; fine yellow; fragrant, vigorous and desirable; new,</i> | 60 |
| <i>Safrano</i> —Fine buff; <i>Janne d'Or</i> , golden yellow. | 60 |
| <i>Gem of the Prairies</i> — <i>New Prairie Rose</i> ; large, fragrant flowers; desirable. | 50 |
| <i>Pearless</i> —A new, hardy, cluster Rose; desirable. | 50 |

HARDY FLOWERING SHRUBS.

All our customers who have the least vacant space, should not fail to plant a few fine flowering shrubs, as nothing adds more cheerfulness as well as money value to a place. **Hardy Shrubs** carry as safely as a letter by mail. The following are all desirable:

- | | |
|--|------------|
| | EACH, CTS. |
| DEUTZIA, gracilis —A very chaste, dwarf, white flowering shrub; free flowering and desirable. | 50 |
| <i>Japonica</i> — <i>New, pure white double flowers,</i> | 50 |
| <i>crenata, flore pleno</i> —Magnificent double rose and white flowers; the finest shrub grown. | 50 |
| FORSYTHIA, Fortuni (Golden Bell) —Earliest spring flowering shrub; flowers bright yellow; new, desirable. | 50 |
| SPIREA, callosa alba —A dwarf, very free flowering shrub; flowers white, continuing a long time in bloom. | 50 |
| WEIGELA, rosea —Popular, blooming profusely; rose colored. | 50 |
| <i>variegata, par excellence</i> —The most beautiful of variegated shrubs; flowers rose. To be recommended. | 50 |

HARDY CLIMBING SHRUBS.

- | | |
|---|----|
| AMPELOPSIS, hederacea (American Ivy) —A very desirable, rapid growing, hardy climber, foliage changing to scarlet crimson in fall; best hardy climber. | 50 |
| <i>Veitchii</i> —Most elegant climbing plant in cultivation; superb for dwellings, verandahs, &c. | 50 |
| CELASTRUS SCANDENS (Roxbury Wax-work) —A hardy climber, small, scarlet, wax-like berries; rapid grower; for verandahs, &c. | 50 |
| HONEYSUCKLE, Halliana —Very sweet-scented; color white, changing to buff; very desirable climbing plant for any purpose; new. | 50 |

CLOVER AND GRASS SEED.

- | | | |
|--|--|----|
| Our own Mixture for Door Yards, Lawns, &c., | per bushel, \$5.00; 1/4 bushel, \$2.75; peck, \$1.50. | 30 |
| Lawn Grass, best English mixed, | per bushel, \$5.00; 1/4 bushel, \$2.75; peck, \$1.50. | 30 |
| Kentucky Blue Grass (Poa pratensis), | per bushel of 21 lbs, \$2.50; 1/4 bushel, \$1.25; peck, 75c. | 20 |
| Perennial Rye Grass (Lolium perenne), | per bushel, \$3.50; 1/4 bushel, \$1.75; peck, \$1.00. | 25 |
| Red Top (Agrostis vulgaris), | per bushel, \$2.00; 1/4 bushel, \$1.25; peck, 75c. | 20 |
| Sweet Vernal Grass (Anthoxanthum odorata), | lb, \$1.00; oz, 10 | 10 |
| Clover, White Dutch—First quality, imported, | lb, 70c.; oz, 10 | 10 |
| <i>Alsike</i> —First quality, | lb, 70c.; oz, 10 | 10 |

The above by the quart and pound, at quart and pound rates, will be sent FREE. By the bushel, will be delivered at Express or Freight Office here—charges for carriage to be paid by the purchaser. No charge for bags or packing.

TOBACCO.

- | | | |
|---|------------|----|
| Extra Connecticut Seed Leaf, | oz. 40c. | 10 |
| Latakia —Said to be the best smoking Tobacco in the world. Introduced by Bayard Taylor, from Mount Lebanon, where it is esteemed the most delicate flavored tobacco known. Cultivate the same as the American variety. | oz. \$1.00 | 25 |

BROOM CORN.

- | | |
|--|---|
| Broom Corn, | per bushel, \$3.50; peck, \$1.00; quart, 80 |
| Broom Corn by the bushel, will be sent by Express or Freight, charges to be paid by the purchaser. No charge for bags, &c. | |

OSAGE ORANGE AND RAPE SEED.

- | | |
|----------------------------------|---------------|
| Osage Orange, for Hedges, | per quart, 65 |
| Rape Seed, best English, | per pound, 40 |

ASPARAGUS ROOTS.

- | | |
|--|-----------------|
| Conover's Colossal New Asparagus —A new and very important introduction, producing immense heads of this fine eatable delicacy; recommended as the finest and largest of all the Asparagus; extra fine, one year old plants, by mail, | per 100, \$1 25 |
| <i>Two year old plants, by mail, prepaid,</i> | 3 00 |
| Grayson's Giant —Fine one year old plants, by mail, | 1 25 |
| <i>Two year old plants, by mail, prepaid,</i> | 3 00 |
| Leshor's Mammoth —This is described as very large and superior, rivaling, if not surpassing, Conover's Colossal; extra fine, one year old plants, | 1 25 |
| <i>Two year old plants, by mail, prepaid,</i> | 3 00 |
| Giant Elm —Fine one year old plants, by mail, | 1 25 |
| <i>Two year old plants, by mail, prepaid,</i> | 3 00 |
- Two year old plants sent per Express (not prepaid), when wanted in quantities, at \$2.00 per hundred.
